Howard Rogers, King Street.

We can equip your home from cellar to attic. Special Low Prices on Stoves and Kitchen Utensils. Remember a Dollar Saved is a Dollar Earned.

SAYS A CORN ACTS LIKE ELECTRIC BELL

Tells why a corn is so painful and says cutting makes them grow.

Press an electric button and you form a contact with a live wire which rings the bell. When your shoes press against your corn it pushes its sharp roots down upon the sensitive nerve and you get a shock of pain.

Instead of trimming your corns, which merely makes them grow, just step into any drug store and ask for a quarter of an ounce of freezone. This will cost very little but is sufficient to remove every hard or soft corn or callus from one's feet. A few drops applied directly upon a tender, aching corn stops the soreness instantly, and soon the corn shrivels up so it lifts right out, root and all, without pain. This drug never inflames or even irritates the surrounding tissue or skin.

CANADA'S PART IN PROVIDING MUNITIONS

What Canada is doing in the way of war supplies was reviewed by a Canadian banker in a recent address as follows:

We have found it rather more difficult than usual to obtain statistics regarding the quantity and the value of the various kinds of war supplies made in Canada, but as heretofore such figures as we are able to give are highly illustrative as to the importance of this work, both as a part of our contribution to the war and as the main basis of our prosperity at the moment. There is a reduction in the output of many kinds of shells, fuses and cartridge cases, as purchases are being restricted to certain sizes. On the other hand, however, there is an important development in the building of steel and wooden ships and aeroplane engines, and also of aeroplanes of a certain type. With these exceptions there is a large decrease in purchases by Great Britain due doubtless to the inability of Canada to grant the necessary credits. It is therefore most gratifying to know that the Chairman of the Imperial Munitions Board has made arrangements with the Ordnance Department of the United States to use, until next midsummer, such surplus facilities existing here for the pro-

GOT WET FEET TOOK AWFUL COLD Could Not Sleep for Cough.

A bad cold accompanied by a distressing cough that keeps you awake at night is most aggravating, and unless it is attended to at once may develop into something very serious.

Dr. Wood's Norway Pine Syrup is the remedy you should take. It heals the mucous surfaces, relieves oppression and tightness of the chest, removes the accumulation of phlegm, quiets the most obstinate and distressing coughs, and secures rest and sleep at night, not only to the sufferer, but to others whose rest would otherwise be broken.

Mrs. Ezekiel Acker, Lake Pleasant, N. S., writes: "I got wet feet and took an awful cold; could not sleep at night, and would do nothing but cough. My husband got me a bottle of medicine, but it was not worth bringing home. I was going to call the doctor in when a friend asked me to try Dr. Wood's Norway Pine Syrup. I told her I had not faith in it, but she urged me to get a bottle. I did, and I must say that of all medicine I ever took, it is the best, and relieved me the quickest of anything I ever saw."

"Dr. Wood's" is put up in a yellow wrapper; three pine trees the trademark; price 25c and 50c; manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

THE KIND OF BOOKS GREAT MEN READ

(Chicago News.)

"I have wasted some time in my life," confessed the learned physician. "But I never wasted any of it on trashy books. Our esteemed bookseller tells me that where he disposes of one worth while volume he sells a hundred sensational novels. The fact is deplorable, even alarming."

"There's no use getting excited," observed the librarian. "Things are not as threatening as they seem. Reading novels is a relaxation, not a vice, and I feel sorry for any man who hasn't fooled away a little time that way. If you read nothing but instructive literature all your days you are likely to dry up and blow away, and in any event you are sure to be a bore, for any one who acquires a lot of heavy information goes around suffering to unload it on others."

"Many of our greatest statesmen and thinkers are confirmed detective story fans. They have standing orders at their bookshelves for all the sleuth stuff that appears, and so there is a perennial market for this class of junk. All publishers are lying awake at night hoping the morning mail will bring them a few corking detective stories, for they are sure sellers, while it is necessary to throw in a chromo or a corkscrew if one would get rid of a truly helpful book."

"Even the proud and haughty Roscoe Conkling, who looked and acted like a Roman senator, would walk nineteen miles through a pouring rain to get hold of a good mystery story, and it is related that when he tackled 'The Leavenworth Case' he locked the doors of his office and refused to see anybody until he was done with it. John G. Carlisle and James G. Blaine also were fond of frivolous stories in their hours of ease, and nobody is going to accuse them of being inclined to fool away their opportunities."

"The man who doesn't read the cheap stuff and who loads himself with useful information all the time, never will know anything about books. He has no standard of comparison. He has mental indigestion. He is like one who eats roast beef all the time and thinks it undignified to sample the strawberries."

"When I was a kid," related the real estate man, "we had a dandy teacher in our school. He boarded at a farmhouse in the neighborhood and one day the farmer's wife squinted into his trunk, and found a whole stack of the old fashioned dime novels, stories of avengers who roamed the woods potting Indians."

meet the requirements of that country.

550 Munition Factories.

Canada is producing gun ammunition, including propellants, high explosives, fuses and cartridge cases in 550 factories situated from St. John in the east to Victoria in the west. In addition to contracts given to private corporations, the Imperial Munitions Board has developed government factories for the loading of fuses, for the production of powder and high explosives, for the manufacture of sulphuric and nitric acids and acetone and of steel and forgings, and for the construction of aeroplanes. On these plants the sum of \$13,500,000 has been expended for account for the Imperial Government. The Board has also contracted for the building of a large number of the latest type of high-power aeroplane engines for the use of fighting planes at the front. This engine represents the highest type of workmanship of any engine that has been produced, and we may well be proud that such a young and inexperienced country as Canada is able to undertake the work.

CASTORIA

For Infants and Children In Use For Over 30 Years

Always bears the Signature of *Chas. H. Hitchcock*

"She couldn't keep this frightful discovery to herself. She told it around, and the grave and reverend school directors fired him. They did not consider it safe to have such an immoral man in charge of the youth of the neighborhood. They were convinced that he would end on the gallows."

"A few years later they were the sickest bunch! That school teacher was in the United States senate, and was one of the most honorably distinguished men in this country. And now I am going to blow myself for that new book of Sherlock Holmes stories."

OUR MINSTRELS.
(From the Listening Post.)

Opening Chorus:—

"When You Wore a Tunic and I Wore Civilian Clothes."

Interlocutor: "Gentlemen, be seated. That was splendid. That song always reminds me of home—beautiful England. You must all know that England has the finest soldiers in the world. Look at the Grenadier Guards! Every one of them stands over six feet in his stockings."

Endman: "That's nothing! Look at the Canadian Army! We have with us tonight men who, until they joined the army, never wore a stocking—and some of them are over six feet tall."

Interlocutor: "Yes, but you must admit that our soldiers are always cool under artillery fire."

Endman: "Oh, I don't know so

much about that. I was one of the coolest men in our regiment. I shivered from the time I went in until I came out. I thought every one was aimed at me."

Interlocutor: "Listen to this. In the English Army we had a sniper who killed 26 men before dinner."

Endman: "That's nothing. In our regiment we had a man who killed off a whole company at dinner time, and he was none of your crack sharpshooters."

Interlocutor: "Who was this marvelous man?"

Endman: "Patty, the cook! But, take it all round, there is only one fault I can find with this army: They don't pay enough money. They give you only 33 bucks to go and get shot, and according to old Phil that's not enough to get you half-shot."

Interlocutor: "That will do. We will now sing that beautiful ballad entitled: 'I've Got Another Mascot in My Shirt.'"

Endman: "I love that song. It is so moving. Did you notice how much

Wood's Peppermint Cure.
The Great English Remedy. Tones and invigorates the whole nervous system, makes new blood in old veins, cures nervous debility, mental and brain worry, despondency, loss of energy, palpitation of the heart, floating memory. (Formerly Walker.)

feeling was expressed in the audience?"

Grand Finale:—
"Dear Fritz, Somewhere a Voice is Calling."
Curtain.

EARTHQUAKES IN CHINA.

(Canadian Press direct wire.)
Amoy, China, Feb. 17. — Earthquake shocks continued here last night and today. Many persons have been injured and it is estimated that more than one hundred houses have collapsed. Cable communication with Hong Kong is interrupted.

Disappointment is the saucer belonging to the cup of sorrow.

What Other Food Helps To Conserve

As does

Grape-Nuts

Saves Wheat --- made partly of barley.

Saves Sugar -- contains its own sugar from its own grains.

Saves Fuel --- fully baked.

Saves Time --- ready to serve direct from the package.

Saves Milk --- requires less than the ordinary cereal.

Saves Waste --- eatable to the last bit.

You are conserving when you eat
Grape-Nuts
