AWFUL ATTACKS OF HEART TROUBLE

Eased by Second Dose of Milburn's Heart and Nerve Pills.

One of the first danger signals announcing something wrong with the heart is the irregular beat or violent throb. Often there is only a fluttering sensation, or an "all-gone" sinking feeling, or again you may experience a smothering sensation, gasp for breath and feel as though about to die.

In such cases the action of Milburn's Heart and Nerve Pills in quieting the heart, restoring its normal beat and imparting tone to the nerve centres, is, beyond question, marvelous.

Mrs. Frank Areseneau, Newcastle, N. B., writes: "I had awful attacks of heart trouble for the past five or six years, and as I had tried many kinds of medicine without getting any better, I decided to give Milburn's Heart and Nerve Pills a trial, and to my surprise I found ease from the second dose. I continued taking them until I had used six boxes, and now I feel as well as can be."

"At present my sister is taking them for nervousness, and finds great comfort by their use."

Milburn's Heart and Nerve Pills
T. Milburn Co., Limited, Toronto, Ont.

num is given by the Latin-American Division of the Bureau of Foreign and Domestic Commerce.

Platinum was discovered in what is now Columbia in 1735, by a Spaniard named Don Antonio de Ulloa, who accompanied a French scientific expedition, and his account of it was the first information regarding the metal to be brought to the attention of Europeans. Its res'tability to acids and the difficulty of working it were remarked upon, but it was not considered to be nearly as precious as gold, and was used at times by counterfeiters as a basis for coins. It was not until the middle of the nineteenth century that the demand for platinum for use in chemical laboratories and for electrical uses brought its value up to the point where it ranked a sone of the most precious metals.

Was Thrown Away as Waste

In the placer mining of gold in Columbia it was formerly thrown away as waste, and when the rise in price made it more valuable than gold the ground on which the waste had been thrown became in its turn a field for mining operations, and even the streets of the principal centre of gold refining in Columbia, Quibdo, were torn up and the soil washed for particles of the new treasure. One man tore down his store in order to get at the ground beneath, and found so much platinum that he was enabled to rebuild and make an extra \$4,000 for his trouble.

Platinum is recovered principally from the beds of streams, the particles having ben deposited there through erosion of large rocks, classified geologically as "Tertiary conglomerates." The platinum grains are found with gold, the proportion varying from 5 to 50 per cent of platinum. The two metals are recovered by washing the sand and gravel of streams.

The marked rise in the price of platinum in the last two or three years has considerably stimulated mining activities in Columbia, especially on the part of the native miners.

Present imports of Columbia platinum by the United States represents almost the total visible exports of that country.

Germany might help Austria home if it only dared let go its own lamp post.

Rhubarb had a mighty hard time to get around the government's sugar ration order.

PLATINUM IS NOW THE MOST SOUGHT AFTER METAL

The United States Government Has Fixed the Price at \$105 Per Ounce---Warnings of Experts at the Beginning of the War Were Unheeded--Is Much Used by Jewellers and Dentists--Precious Metal Was Discovered in 1735

Washington, June 22--New chapters in romance of platinum, once thrown away as waste, but now the most sought-after metal in the world, have been written since the war began. Nations are fighting for it. Adventurers are risking their lives to obtain it. Women spies and diplomatic agents are playing the game of international intrigue to control even an ounce of the "noble metal" as it is known to geologists, so valuable has it become, and so necessary to the prosecution of the war.

The United States Government recently took a hand in the game by commandeering all unworked platinum in this country, setting, therefore a price of \$105 an ounce, as compared to \$22.85 ten years ago. Even this action, however, has not obtained sufficient of the metal for war purposes. Officials who failed to heed the warnings of platinum experts at the beginning of the war are wondering how they can retrieve their error in not vigorously meeting the national necessity by using every legitimate means to obtain platinum. For, the total amount of known platinum throughout the world is only 4,000,000

ounces, of which about one-fourth is in the United States. Much of that is virtually irreclaimable through use in dental work and personal jewellery, and the output, since the Russian debacle has fallen to a fraction of what it was in times of peace.

It is the last reason which is giving officials so much concern. Russia has been the source of most of the world's platinum, and, in 1913, was credited with a production of 250,000 Troy ounces, Columbia with 15,000, New South Wales and Tasmania 1,275, United States (California and Oregon being almost the only producing States), only 433, Borneo and Sumatra 200, and Canada 50.

The German invasion of Russia gave the enemy the opportunity of replenishing his stocks of platinum, to the detriment of the Allies. Mining in Russia virtually has ceased now even if the metal could be shipped out of the country, and the world looks to Columbia for platinum. Suggestions for a Government monopoly of platinum have been advanced in the Columbian Congress. Whatever action is taken, the fortunes of war will mean wealth for the southern re-

public.

Spectacular Feat of the War

One of the most spectacular feats of the war was the concentration of 20,000 ounces of platinum in Russia by a young American mining engineer, attached to the embassy there who recognized the importance of obtaining the metal. Each precious brick, wrapped in a leather cover, was brought half-way across the world to the United States and turned over to the Government for use in the manufacture of sulphuric acid, a constituent of explosives, for the manufacture of contact points in electrical apparatus and other uses necessary to war. An interesting history of platinum.

MANY A MAN HAS FOUND IT GOOD BUSINESS to change his habits of life, to cut out his Cocktail or his Highball.

A few years ago this would have sounded like "Old fogey talk", but the trend of the times points out the fashion. A great many former tea and Coffee Drinkers now use POSTUM

It's the same trend for the same reason.

PALMER'S Summer Packs

for the

You can't enjoy farm labor with tired, aching feet. So, boys, slip your feet into Palmer's Summer Packs. Made from durable yet soft, pliable, oil-tanned, Skowhegan waterproof leather—the ideal farm shoe for comfort and wear.

Easy to put on and take off. Large eyelets, quickly laced. Solid leather heel, sole and insoles. Bellows tongues.

Ask your dealer to show you "Moose Head Brand"

JOHN PALMER CO., LIMITED
Fredericton, N.B., Canada

Wholesale Dry Goods and Woollens

House Furnishings For Spring

Lace Curtains
Serim Curtains
Curtain Muslin and Draperies of all kinds
