

DEPARTMENT OF RAILWAYS AND
CANALS, CANADA.

CANADIAN GOVERNMENT RAILWAYS

SEALED TENDERS, addressed to J. W. Pugsley, Secretary Department of Railways and Canals, Ottawa, Ont., marked on the outside "Tender for Stores Building—Campbellton," will be received up to and including twelve o'clock noon, Tuesday, October 8, 1918, for the construction of a wooden Stores Building at Campbellton, N. B. Plans, specifications and blank form of contract may be seen at the office of Chief Engineer of the Department of Railways and Canals, Ottawa, Ont., at the office of the Chief Engineer, Canadian Government Railways, Moncton, N. B., and at the office of the resident engineer, Campbellton, N. B.

All the conditions of the specifications and contract forms must be complied with.

Tenders must be put in on the blank form of tender, which may be obtained from any of the offices at which plans are on exhibition.

Each tender must be accompanied by an accepted bank cheque payable to the Honourable the Minister of Railways and Canals for an amount equal to ten per cent. (10 p.c.) of the tender. The lowest or any tender not necessarily accepted.

By order,

J. W. PUGSLEY,
Secretary,
Department of Railways and Canals,
Ottawa, Sept. 26, 1918.

SEPARATE SEALED TENDERS, addressed to the undersigned, will be received until 12 o'clock noon, Tuesday, October 22, 1918, for the construction of an Administration and Surgical Building, Officers' Ward, Neurological Ward, Orthopedic Active Treatment Ward, and Nurses' Home, Military Hospital, Camp Hill, Halifax, N. S.

Each tender must be sent in a separate envelope and endorsed: "Tender for Administration and Surgical Building, Military Hospital, Camp Hill, Halifax, N. S., etc., as the case may be."

Plans and specifications can be seen and forms of tender obtained at the offices of the Chief Architect, Department of Public Works, Ottawa, the Inspector of Dominion Buildings, Halifax, N. S., and the Superintendent of Military Hospital, Camp Hill, N. S.

Tenders will not be considered unless made on the forms supplied by the Department and in accordance with the conditions set forth therein.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to 10 p.c. of the amount of the tender. War Loan Bonds of the Dominion will also be accepted as security, or war bonds and cheques if required to make up an odd amount.

By order,
R. C. DESROCHERS,
Secretary,
Department of Public Works,
Ottawa, September 28, 1918.

VICTORY LOAN, 1918

MEETINGS in the interests of the Victory Loan Campaign have been arranged as follows:

At Stanley, Fair, Oct. 8th—

Speakers—
Very Rev. Dean Neales,
R. B. Hanson, Esq.,
C. D. Richards, Esq.

At Kingsclear, Temperance Hall, Oct. 9th—

Speakers—
Dr. Crockett, M. L. A.
Chancellor Jones

At Millville, Oct. 9th—

Speakers—
Col. McLeod, M. P.
Rev. G. C. Warren.

At Harvey Station, Public Hall Oct. 10th—

Speakers—
Judge Wilson, R. B. Hanson, Esq.

At New Maryland (Nasonworth), Oct. 10th—

Speakers—
J. Bacon Dickson, Esq.
Prof. Stiles, Rev. Mr. Lewis.

At Marysville, Oct. 11th—

Speakers—
The Bishop, Hon. O. S. Crockett.

At Pokiok, Public Hall, Oct. 11

Speakers—
R. W. McLellan, Esq.
C. D. Richards, Esq.

At Burt's Corner, Foresters' Hall, Oct. 12th—

Speakers—
Hon. J. H. Barry,
J. J. F. Winslow, Esq.
Other Meetings will be announced later.

THE SAINT JOHN & QUEBEC RAILWAY COMPANY.

Notice is hereby given that the plan and book of reference covering the location of this Railway across Lot No. 449, in District A, in the Parish of Westfield, County of Kings, has this day been deposited with the Minister of Public Works at Fredericton and with the Clerk of the Peace in the County of Kings, where the same may be examined as provided by law.

THE ST. JOHN & QUEBEC
RAILWAY COMPANY.

E. S. CARTER,
Secretary.

Dated at St. John, this 26th day of September, 1918.

THE HON. W. F. ROBERTS ON MEDICAL INSPECTION

(Continued from page 6)

In Canada
In Canada, Ontario was practically the first province to adopt medical inspection. It was first carried out in Toronto and now the remotest portion of the province is under this legislation. Later the Western provinces have fallen into line, and nearly every province has either separately or in association with the Educational Department, some form of Medical Inspection.

Banner Province

New Brunswick, I might humbly suggest, is the banner province of the Dominion in having an Act calling for a Department of Health, represented upon the Executive the same as the other departments; in other words, placing the question of the health of the people in the foreground where it naturally belongs. This means that medical inspection will be controlled by the state in this Province and the argument for the support of this rests upon the fact, and it cannot be denied, that there are present in the schools (town and country alike) children suffering from preventable and remediable diseases, of which both the teachers and the parents are ignorant; besides others suffering from diseases the serious nature and consequences of which no one but medical men can recognize. This assertion scarcely needs the support of figures and statistics, but in passing let us recall the fact that more than 80 per cent of the children are suffering from defective teeth, and 50 per cent are affected with vermin or other parasitic conditions; 20 per cent with defective vision, and that 10 per cent are retarded in their educational progress by physical defects such as anaemia, general debility and deafness, resulting from adenoidal growths or discharging ears. These figures may not be exact, but the general inference is sufficiently sound and inasmuch as the greater National asset is Men and not Money, it behooves the state to be up and doing, particularly at this, the most unique time in the history of the world regarding the question of the conservation of health and life.

Must Have It

Then a further argument to my mind is that if we have the law of compulsory education, we must of necessity have that of medical inspection. It is hardly fair to insist upon attendance at schools on the part of the child, and at the same time fail to make the environment of such safe for the child to remain in.

Systematic medical inspection benefits the province from an educational standpoint inasmuch as one of the principal pillars supporting education is Efficiency; and one of the important ways in which this can successfully be brought about is quite obvious. The higher the percentage of attendance the more chance there is that the education given will prove beneficial to a greater number of children, so that efficiency indirectly depends upon attendance and most measures that increase attendance make for increased efficiency in education.

Quoting from a portion of an article from D. Cody the New Minister of Education of Ontario, we find him saying that "It will be the business of the oncoming generation to reconstruct the world. Immediate measures will be taken by those who are in active life but for the full expression and character of the new world after the war, we must wait for the efforts of the young and hopeful who, spared the actual horrors through which the present generation has passed, shall take off its coat and reshape the world to the heart's desire. One child therefore becomes all important in the scheme of things. The application of eugenics would guarantee him proper birth,—but if that scheme cannot be statutorily employed, every possible assuagement of existing conditions should be offered. The business of the child now newly born is no less onerous than to remake this planet, and therefore every amelioration should be applied to produce fitness for the task imposed by the circumstances of the war.

Training for Motherhood

The girl should be trained for motherhood. Motherhood itself should receive a fresh consecration in the general heart and mind and every creature, male and female, who encourage or condone race suicide, should repent in sackcloth and ashes."

Also another quotation from an address delivered by Dr. Cody at Agricultural College in Guelph, as follows: "There is a real need throughout our rural schools particularly for medical and dental examinations. I don't think it will ever do to let this rest as merely an optional matter. We are not conserving our children if we do not try to conserve them in body. I feel that this matter must be taken up and dealt with right speedily. The Women's Institutes are doing excellent work in some parts of the Province in carrying out medical inspection, but at the best it is only spasmodic. The system when introduced in this province must be compulsory and universal. In conclusion there are many features of this work that time will not permit on this occasion to consider. We have had the History, the arguments for the some illustrations as to the findings of a systematic medical inspection, which by the way is argument enough in itself for the bringing into life such legislation and then applying same.

Provincial Organization

Now as to methods. It is our plan to have a Public Health Bureau, made up of Chief Health Officer, Chief Medical Officer, Chief of Laboratories, and a District Health Officer for each district. There will be three districts. Eastern—Comprising Restigouche, Gloucester, Northumberland, Kent and Westmorland.
Southern—Albert, Queens, Kings,

St. John City and county.

Western—Charlotte, Sunbury, York, Carleton, Victoria and Madawaska.

Each district will be subdivided into sub-districts and each county will constitute a sub-district. The sub-districts will be divided into parishes, each parish will have a medical school inspector who will examine the school at the beginning of each term and be on call from the teacher regarding any special condition that shall arise.

The teachers will receive a certain number of lectures at Normal School re recognition of communicable diseases, so as to be able to request the withdrawal from school of any pupil, who will be required to produce a certificate of family physician that they are eligible physically to return.

The district health officer will have charge of the medical inspectors in his own district, and each medical inspector who is an appointee of the sub-district board of health must receive the approval of the Chief Medical Officer before contract is closed. The above refers to rural schools. To city, town and consolidated schools the medical inspector in some instances will be an all time official, in other instances will visit the schools as often as it is thought necessary.

The premises of school buildings are inspected by the medical inspector and district health officer, and recommendations for their betterment from a sanitary standpoint will be left for the trustees to act upon, and will be kindly compulsory.

The system of school inspection is good, but rendered much more effective by a school nurse whose duty it will be in cities and towns at least to visit the school with the inspector and then to follow up the work at the home of the child to see that such is being attended to.

I have in mind some service of a similar nature for rural districts, but it will take some little time to develop same.

I fear I have already wearied you, but there is so much to be said, it is difficult to know when to stop writing. It is needless at this stage to direct your attention to the fact that the effect of medical inspection on future citizenship will be the robbing of our hospitals, asylums, sanatoriums, etc. of their patients and handing them over as practically healthy units to the state as an all-round asset, and all that means to the home and the various callings in life.

WIFE AND LITTLE BOY SAVED BY

DR. FOWLER'S

EXTRACT OF

WILD STRAWBERRY

BOTH HAD DYSENTERY

Dysentery comes on very suddenly and is one of the worst and most dangerous of all bowel troubles. The pains in the bowels become intense, the discharges occur with great rapidity, and are very often accompanied by blood. Unless these discharges are checked the sufferer becomes weak and languid, and very often death ensues. There is only one remedy to use in all cases of dysentery or any other looseness of the bowels, and that is "Dr. Fowler's Extract of Wild Strawberry."

It will cure where all others fail. It has been on the market for 73 years.

Don't accept a cheap substitute and thus endanger your health.

Mr. W. J. Metcalfe, Tofield, Alta., writes: "I wish to state that we have used Dr. Fowler's Extract of Wild Strawberry with good results. I will say that it can't be beat. It saved my wife and little boy, last summer, when they were very low with dysentery. We always have a bottle of it in the house, and would not be without it if it cost five dollars a bottle."

The genuine "Dr. Fowler's" is manufactured only by The T. Milburn Co., Limited, Toronto, Ont. Price 35c.

THE BELGIANS DOING THEIR BIT

Paris, Oct. 2.—President Poincare yesterday received from King Albert of Belgium a telegram replying to congratulations sent by M. Poincare on the success of the Belgians in their fighting against the Germans in Flanders.

"The Belgians," said King Albert, "are very proud to contribute by all means in their power to the triumph of the sacred cause of the Allies."

A REAL SURPRISE

"I was talking to my colored man of all work the other day," said James Yates Mellen of Cleveland, "and asked him if he went to church.

"Yessur, goes to church every Sunday," he said.

"Are you a member?"

"Yessuh."

"What church?"

"Prespeteeryn."

"Do you believe in the doctrine of election?"

"Yessuh."

"Do you know I am elected to be saved?"

"Law, Mr. Mellen, I didn't even know you all was a candidate."

Cook's Cotton Root Compound.
