WOMEN'S INSTITUTE CONVENTION CLOSED THIS MORNING; PASSED MANY IMPORTANT RESOLUTIONS

The Appointment of Women to Rural School Boards, Hospital Boards and Other Bodies Asked—Prohibition Endorsed and Drastic Action re Flavoring Extracts and Patent Medicines Favored—Mrs. Martha F. Harvey Makes Explanation of Previous Remarks.

The convention of Women's Institutes held the final meeting this morning in the gymnasium of the Normal School. Several resolutions were placed before the meeting and some met with approval while the rest were discussed. The meetings here have been very well attended and the thanks of the delegates were expressed to Miss McCain, Mrs. Lawlor, Miss Michaud and Miss Nutter for so ably conducting them.

The session opened this morning with Miss Hazel McCain, the supervisor presiding. Several reports of the various delegates were read and proved interesting to all. Miss Nutter presided while the committee reports were read. The reports of the Institutes were continued, Miss A. Michaud receiving those in French. The various reports of the committee all showed the value of the work and the excellent contributions made to the various organizations by which their help was greatly appreciated. Great work is being done by the various branches of the Institute in providing Christmas boxes, scarfs, socks, etc. and delicacies for the soldiers. About sixty delegates in all were in attendance this morning.

Resolutions Before Meeting

After the reports of the various committees were read some resolutions were put before the meeting and passed. The resolutions are as follows:

Resolved that a committee be sent to petition the Provincial Government that one lady member be placed on the Censor Board for this province.

Resolved that the Medical Inspection of schools as outlined by Hon. Dr. Roberts be given the hearty approval of the meeting and that the policy of having women on the health boards of the province be carried before the government.

Wednesday Afternoon

The Wednesday afternoon session opened at 2 o'clock with Mrs. A. J. Ferguson of Newcastle presiding. An excellent address was given on "Food Value of Milk" by Mr. Frank Hens of London, Ontario. Mr. Hens passed samples of the various kinds of milk through the assembly and much interest was shown in them. A report of Miss VanWart's tour through the province was read and then the reports of the Institutes were continued. A solo was rendered by Miss Helen VanWart, the accompaniment being played by Mrs. J. Hugh Calder. Mrs. J. W. V. Lawlor then addressed the meeting on her work with the different institutes, her tour lasting the whole of the summer dwelling on the necessity for after the war preparation and also the necessity for the union and lining up of the work necessitated by peace.

Miss Jean Peacock.

Miss Jean Peacock was called upon to deliver an address on "School Lunches."

Miss Peacock's address in part is as follows: As you know, food occupies a very important place at this critical time along with our soldiers, munitions and ships. This war has made food more scientific and as a general result we talk less of what we like and what we dislike and have to be well satisfied to get what we can. Even if we older people sacrifice food, we must give proper food to our children to enable them to have good healthy bodies and thus live happy lives.

Butter and sugar are among the necessary foodstuffs for our children. Many of the children in our homes have what is known as malnutrition, not because they have not the proper foods, but because they eat those things they like best. It is a remarkable thing to say, but true nevertheless, that in the country the death rate is increasing, while in the city it is decreasing. In the country many of the children need, but very seldom get,

medical attention, which brings us back again to the question of proper foods. One strong reason for this is that in the country the children have to walk some distance to school and if the weather is especially bad, their lunches suffer—mostly in winter, when some of them are frozen.

Also, the school surroundings get into the spirit of the lunch and there is none of that home-like feeling found there. To eat food in surroundings like this has a very bad effect on the health. In the first place it is impossible to realize that one has a "home lunch," and in the second the lunch may not be in a proper lunch box. It is advisable to wrap the different articles in oiled paper to prevent them becoming all mixed together. A napkin added to be put on the desk, is a valuable asset. One is apt to improperly digest his food under these circumstances, and bad digestion is the heart of disease.

Varieties of food should be used in preparing lunches. Don't put in the same class of food every day, and when possible prepare a surprise for the kiddies in the form of fruit that will escape their sight on first opening the box. Make everything as sanitary as possible and add a few tiny jars of jellies, etc. It is your duty as parents to see that your children get the proper kind of lunches to establish a good healthy body and mind.

Miss Peacock also gave many suggestions as to the proper kind of lunches, giving a list of the more nutritious foods that should be chosen.

Wednesday Evening.

The meeting on Wednesday evening opened with Mrs. G. W. V. Lawlor presiding. Selections were rendered by Rowan's Orchestra. An address was given by Capt. Boyd, who is a returned soldier in charge of the Vocational Education for soldiers in this city. An excellent reading was given by Miss Margaret Lynds of the Normal School Staff, after which a masterful address was given by Dr. W. C. Kierstead of Fredericton on Food Control. The address of Capt. Boyd in part is as follows:—

Vocational Training

"You all know we are doing a work for the boys who have bravely done their duty and done it nobly and gallantly over there, so I will attempt to tell you the kinds of work we are attempting to carry out at our Vocational School in this city.

"Approximately ten per cent of the returned men are able to take up work. It is possible to give every man training in what he has had some experience at or to assist him in a new training. When a man is returned unfit for further military service he is met and interviewed as to his education and ability. If fit for discharge he resumes his former occupation when he is given his discharge and if not he is taken on at the hospital after reporting to the officer in charge and begins that line of vocational work which he is best suited for. Some cases have come to us where the soldiers could neither read nor write so the usual case is a general training of History and Mathematics, etc. We try to keep men more or less in their old vocations but if a man is unfit for heavy work he is given some light work. He receives his recommendation from the head office. As there are practically no technical training schools in the province a large number of the men are sent to other provinces to carry on the training. When a man is granted this training he is struck off the force if single he is given an allowance of \$50 per month and if married he gets an allowance of \$70 per month. Two of the most popular courses are engineering and telegraphy studied at Halifax. At present we have no facilities here to give the course but we expect to be able to before the winter is over. Many men of the west who enlisted here are going to Calgary to study farming. Mining is studied at Toronto. The shoe-making course is a very good one for men who have very little education or for a man who has lost a leg. A commercial course is given by the government to the boys who have left High School to enlist. Steam engineering is another course to be given to others of our boys. As it is very hard for one of the boys to go out into civil life right after taking the course he is taken in by some firm and after a reasonable time in which he finishes his training he is prepared to go into business for himself. To undergraduates the commission grants the payment of tuition fees, books and
