

## Children Cry for Fletcher's

## CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Dr. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

## THE HOME GARDEN

Starting Long Season Vegetables  
Indoors.

There are some factors, such as essentials of gardening, planning the garden, etc., which should ordinarily be considered first; but our readers may desire to prepare for some long season vegetables by starting seed indoors.

The average garden will contain comparatively few celery and tomato plants and early cabbage and cauliflower, and they may be bought from the local florists or growers early in June. However, those who wish to raise their own plants should proceed as follows:

The seed box or flat, which is kept in the house, is the most practical device for this purpose. It should be not deeper than three inches, from 12 to 14 inches wide and about 20 to 24 in. long. Place a layer of about 1 inch of gravel or cinders in the bottom of the box and then fill to the top with garden soil. A finer soil may be obtained by putting through a sieve of about 1/4 inch mesh.

Press soil down firmly with small piece of board. Mark shallow drills crosswise 1/4 to 1/2 inch deep and 2 inches apart. Sow about 8 seeds to the inch and cover nearly level with the surface, pressing the soil lightly with the hand to firm it. Celery seed should not be covered more than 1/2 inch. Water a little and set in a warm light place, inside a sunny window.

Keep the soil moist, but not wet enough to leak through the box.

## House Passes Address

(Continued from page 6.)

of Ontario that has taken place in Canada during the present year.

Last year he (the Premier) had said that he hoped that the war would be ended before the House convened for another session, but still it goes on, and the Empire must go forward with high head and steady step, hoping that before the end of another year peace will have been declared. Certain sections of the press over which the Leader of the Opposition seems to have control, had been making rash statements regarding himself. He courted criticism, but he expected it to be fair and truthful, if not, steps should be taken to place the truth before the people. He hoped that this session would be marked by the enactment of much valuable legislation for the welfare of the people as a whole.

MR. MURRAY (Kings) stated that the mention had been made of newspapers over which he was supposed to have control. He wished to state for the benefit of his Hon. friend that he had no control over any newspaper, and used no persuasions with any. His Hon. friend should not be thin skinned as criticism was directed at those on both sides of the House.

## MUNICIPALITY OF YORK.

## Orders for Seed Grain.

All orders for Seed Grain should be in the hands of the Seed Grain Committee or the Secretary-Treasurer of this Municipality, not later than Saturday, the 16th inst. We wish to remind those who filled in and signed the Seed Grain Cards distributed by the Agricultural Department, that these did not constitute orders. Place your orders with your Councillor now.

A further notice from the Agricultural Department regarding prices is published in this issue. Five cents per bushel will be added by this committee to cover cost of distribution.

T. C. EVERETT,  
Chairman Seed Grain Committee,  
Municipality of York.

Strengthens the Throat,  
Assists Public Speakers

Catarrhzone is the Greatest Invention of the Age for Weak Throat, Hoarseness, etc.

Strongly Endorsed by the Clergy.

Because of its strengthening influence upon the vocal cords, Catarrhzone cannot be too highly recommended as a wonderful voice improver. It almost instantly removes huskiness or hoarseness, thus insuring clearness and brilliancy of tone. The most eminent speakers and prima donnas are seldom without Catarrhzone, and credit in no small degree their uniform strength and brilliancy of tone to its influence.

"For many years I have been a sufferer from that terrible disease known as CATARRH.

"Being a professional singer, you can readily understand that Catarrh would be a serious hindrance to my professional skill.

"One year ago I read in the 'Progress' a convincing testimonial from one who had been cured of this disease through using your God-sent invention, Catarrhzone.

A "Believing in the merit of Catarrhzone, I tried it.

"Catarrhzone cured me, and has been the means of my success.

"You are at liberty to use my name if it will help relieve some from suffering, and I will always remain,  
"Bob Bixley, New Glasgow, N. S."

Mr. Bixley is one of the best known singers and entertainers in the Maritime Provinces. Everyone knows him, and his testimonial for Catarrhzone is the best sort of evidence of what great benefit Catarrhzone is to those suffering from throat weakness or catarrh.

Two months' treatment (large size) \$1.00; smaller size, 50c.; sample size 25c. at all storekeepers and druggists, or The Catarrhzone Co., Buffalo, N. Y., and Kingston, Ont.

When plants are 1 1/2 inches high, thin out to 2 inches apart in the row. This gives them space enough to make a strong stocky growth. If you wish you can keep the plants thinned out by setting out in similar boxes.

When tomato plants are about 5 or 6 inches high, thin out to 4 or five inches apart. The thinned out plants may be set one each in berry boxes. Then when finally planted into the garden, the bottom of the box is cut away and the box sunk in the soil in the permanent location without disturbing the roots.

Cabbage and cauliflower when the plants begin to crowd after the first thinning out should be transplanted 2 1/2 to 4 inches apart. Leave celery plants 2 inches apart.

Further directions on the after-handling of these plants will appear later.

A packet of each vegetable seed should be plenty. The following varieties are recommended: Tomatoes, Alacrité or Early Jewel; cabbage, Early Express or Jersey Wakefield; Cauliflower, Early Snowball or Dwarf Erfurt; celery, Golden Self-Blanching or Perfected White Plume.

Approximate time for germination: Celery, 10 to 20 days; cabbage and cauliflower, 5 to 10 days; tomato, 6 to 12 days.

WOMEN WITH WEAKNESS  
FIND NEW STRENGTH

For all special weakness from which girls and women suffer, no surer remedy exists than Dr. Hamilton's Pills; they maintain that bracing health every woman so earnestly desires, they uproot disease and bring strength that lasts till old age.
