

AMERICAN COAL OPERATORS ARE WILLING TO HELP

Would Lend a Hand in the Development of the Coal Mines of New Brunswick --- Fuel Situation is Giving Americans and Canadians Much to Worry Over--- Municipalities Urged to Lay in a Supply of Wood

Ottawa, June 24—As a result of the visit to New Brunswick of a number of leading American Coal operators, accompanied by C. A. Magrath, Canadian Fuel Controller an offer has been made to New Brunswick to develop the coal mines of the Province which will result in a production of at least 300,000 tons of coal within the next few months.

Mr. Magrath was accompanied on this visit by F. S. Peabody, president of the Peabody Coal Company; Mr. Pelletier, president of the Monarch Coal Company, Wyoming; L. O. Gahany, geologist for the Peabody interests and S. H. Taylor, one of the leading engineering operators in the United States, who is technical adviser to Doctor Garfield, American fuel administrator. F. B. McCurdy, M. P., represented the Canadian Government on the trip.

They looked over the entire situation in the Maritime Provinces and Mr. Peabody made proposals to the Government of New Brunswick for a coal shipping proposition which would provide for immediate development of three hundred thousand tons.

Much to Worry Over

The whole fuel situation is giving the Canadian as well as the American administrators much worry, the plain fact is that the entrance of the United States into the war has vastly increased the difficulties of the fuel controllers of the two countries.

American consumption has vastly increased. The New England States alone, as a result of munition orders, are asking for fifty million more tons this year. The labor situation is acute while the American transportation system has proved inadequate.

The result is that the domestic allotments of most of the central and western States has been greatly reduced, in some cases fifty per cent. Considering that we are almost entirely dependent for our anthracite on the United States, the American Government has treated Canada very fairly and our allotment of domestic coal has only been reduced twenty per cent.

So far coal has been coming into Canada in quantities. Whether it will continue depends entirely on the American situation. In the meantime, Mr. Magrath is urging municipalities to lay in supplies of wood.

The most troublesome Canadian situation centres in Manitoba, and a Manitoba delegation headed by Mayor Davidson of Winnipeg, and Mr. T. A. Hunt, city solicitor of Winnipeg, had a long conference this morning with Mr. Magrath, Hon. T. W. Crothers and Hon. T. A. Crerar.

Manitoba in Arms

Last spring a delegation of Alberta and British Columbia mine operators went to Washington and represented they could supply the whole of the prairies with coal. The American authorities, hard pressed to meet their demands and anxious to conserve their supplies naturally took

LETTER FROM AN AMERICAN TRAINING CAMP

Former Fredericton Girl Serving with the U. S. Army Writes a Breezy Letter.

A former Fredericton girl who is now a nurse serving at a military training camp in the Southern States, in a letter to a relative here, says in part:

"Well, I have now been in the army for almost three months, and like it ever so much. The work is as interesting as it can be. At first I was pretty blue and lonely, as none of the girls I knew came to this camp, but since I have become acquainted and made friends, I have not minded it a bit. The weather down here is mighty trying to we northerners. The days are almost intolerably hot, but we are blessed with cool nights. At the present time I am on night duty; have been on for four weeks and only have two more, for which I surely am glad. I have been attached to a base hospital which is mobilizing here, and we are expecting to receive moving orders before long. I am so glad, as I do want to get across where the big work really is. Of course, nurses are undoubtedly needed here in the cantonments, as there is a good deal of sickness among the newly enlisted boys. However, we are all keen to get into the actual war work.

"The country down here is very pretty and the southern people are charming, and so hospitable. We have quite a good time, although the camp life at best is bound to be monotonous. The nurses are allowed to go with the officers, and they do give us a good time. The camp is about nine miles from the city, and we go in there and get a good square meal once in a while. Then we have a big shed here which is used for a dancing pavilion and we have a dance about once a week. We go on picnics, as there are some wonderful picnic places around within motoring reach.

"We have some pretty strict rules which we have to obey, but these are of course necessary, considering the few girls here among so many thousands of men. I have had a good time and certainly never had so many beaux in my life. I saw Mrs. J. H. McDonald before leaving New York. It was lovely to see her, and I hear from her quite often. When I go across I hope to see Dr. MacDonald, and possibly Eric too. No wonder Mrs. MacDonald is proud of them both. "It is now early morning and all my boys are sleeping peacefully, and I might add musically. If you want to hear a funny noise, listen to a roomful of forty husky men, all snoring in different keys; it is not exactly soothing."

SAYS RUSSIA STARTED WAR

Amsterdam, June 25.—The chief blame for instigating the war was laid at Russia's door by Dr. Von Kuehlmann, the German foreign secretary, in an address to the Reichstag yesterday, in which he also dealt with Germany's war aims. France and England were named as the next powers in order of culpability.

Referring to Germany's war aims, Dr. Von Kuehlmann said: "We wish for the German people and our allies a free, strong, independent existence within the boundaries drawn for us by history, the freedom of the seas, carrying our trade to all parts of the world."

In a London bird school parrots are taught to talk with phonographs.

Ball bearings lessen the labor of using large shears that have been invented.

them at their word and it was decided that no anthracite coal would be shipped west of the Great Lakes.

The authorities at Ottawa were helpless, as we are at the mercy of Washington, Manitoba was immediately up in arms claiming that Alberta coal was of little value and that the Alberta mines were unable to supply their needs. Despite the appeals of the fuel controller and the railways, they have refused to place orders on any extensive scale and have demanded that they be given anthracite. This is the reason for the Manitoba delegation, who are here today.

The fuel controller is anxious to meet their wishes as far as possible, and Washington shows a generous spirit. However, in view of the fact that the Western States are having their allotment reduced at least fifty per cent, it is impossible to meet the request. In addition, even if the allotment was granted it is only a gamble whether the coal can be delivered. Between the United States and Alberta, Manitoba is in a fair way to being without any coal this winter.

The situation was thoroughly explained to the western men today and an effort will be made to reach some agreement that will be satisfactory all round. An announcement may be made in a day or so.

PIMPLES AND RUNNING SORES

Would Hold Head Down Face Was Such a Sight.

Pimples are caused by the blood being out of order. These festering and running sores appear on the chin and other parts of the body, and although they are not a dangerous trouble they are very unsightly to both you and your friends.

There is only one way to get rid of this obnoxious skin trouble, and this is by giving the blood a thorough cleansing by the use of Burdock Blood Bitters.

This sterling remedy has been on the market for over 40 years, during which time we have received thousands of testimonials as to its curative powers over all skin diseases.

Mrs. Victor G. Fry, North Battleford, Sask., writes: "I used Burdock Blood Bitters when I was about eighteen. I was so bad with pimples and running sores, that when I went down town, I would hold my head down when I would see anyone coming, my face was such a sight. I got two bottles, and my face began to clear, so I kept on until I had a beautiful complexion. I have recommended it to everyone who is in a run down condition, as it builds up the blood, and when the blood is all the face is clear."
