Hospital Needs Coal

The Victoria Public Hospital is much in need of Anthracite coal at the present time. All the coal on hand is just sufficient for cooking purposes and the Hospital requires ninety tons of coal to keep it going. It is now up to some private citizens who already have their coal supply to offer the hospital enough coal to carry it through for a time. Mr. R. H. Simonds fuel controller of this city wrote to Dr. James H. Frink, in St. John who is in touch with the fuel administration of the United States about the condition of affairs at the hospital. The penalties for breaking the regulations as set down by the Canada Fuel Control are very strict. Anyone breaking the regulations is liable to a fine of \$1000 or six months in jail or both.
