

SOME GOOD SPEECHES IN THE BUDGET DEBATE

Mr. Peck has Discovered That the Minister of Lands is Interested in Speep Raising ---Makes a Reference to Federal Politics and Complains Because Partizan Officials Were Dismissed--Dr. McGrath's Reply--Mr. Tilley Also Heard From.

Following is the synoptic report of the speeches delivered on the budget in the Legislature by Mr. J. L. Peck of Albert, and Dr. McGrath of Northumberland:

SPRING IMPURITIES CLOG THE BLOOD

Dr. Williams' Pink Pills for Pale People are an all-year-round tonic, blood-builder and nerve restorer. But they are especially valuable in the spring when the system is loaded with impurities as a result of the indoor life of the winter months. There is no other season of the year when the blood is so much in need of purifying and enriching, and every dose of these pills helps to make new, red blood. In the spring one feels weak and tired—Dr. Williams' Pink Pills give new strength. In the spring the appetite is often poor—Dr. Williams' Pink Pills develop the appetite, tone the stomach and aid weak digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and boils—Dr. Williams' Pink Pills speedily clear the skin because they go to the root of the trouble in the blood. In the spring anaemia, rheumatism, neuralgia, erysipelas and many other troubles are most persistent because of poor, weak blood, and it is at this time, when all nature takes on new life, that the blood most seriously needs attention. Dr. Williams' Pink Pills actually renew and enrich the blood, and this

He observed one vacancy, however, that was in one of the seats for Carleton, and he must say that the government had not dealt justly with Carleton.

The hon. member from Moncton had shown that he had been devoting some attention to the Scriptures. He needed to, when he would return to the municipalities after having placed additional taxation on them to the amount of \$118,000. Dealing with the Crown Land department the speaker asked why discrimination had been shown against the St. John valley and southern parts of the province in the matter of imposing a rate of stumpage of four dollars per thousand com-

pared with three dollars for the North Shore. He had two criticisms to make with regard to the minister of lands and mines. One was that he had sent surveyors out to count stumps fifteen years old, and the other was that although connected with the lumber industry through his department, he was investing in sheep. He would take the other departments one by one. With regard to the department of agriculture the word had gone out through the province that this was the most wonderful organization that ever had existed. It must be with 200 delinquent grain buyers. As far as the provincial secretary was concerned, he could say that he sympathized with that minister for having to read the auditor general's report the day before and also because the duties of his office had been usurped by the premier. He could congratulate the hon. provincial secretary, however, upon the stand he had taken in the recent Federal election. The premier had come into office on a flood-tide. He had the advantages of a long business career and of being a good looking man. Early in the session he had turned to his back-benchers and said he was proud of them. The speaker had wondered why at the

If you need a medicine this spring try Dr. Williams' Pink Pills—they will not disappoint you. These pills are sold by all medicine dealers, or you can get them by mail at 50c a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

TROUBLED FOR YEARS WITH BRONCHITIS

Dr. Wood's Norway Pine Syrup Gave Instant Relief.

Bronchitis is a disease which is very prevalent during the late winter and early spring, when there are sudden atmospheric changes. It is a condition of inflammation of the bronchial tubes which produces mucous or phlegm. This irritates the throat and causes you to cough in order to get rid of it. The cough may be tight or loose, according as to whether this mucous is sticky and hard to remove, or soft and easily expelled.

Bronchitis is not really dangerous, but the complications which are liable to follow makes it necessary to get rid of it on the first sign. This you can do by using Dr. Wood's Norway Pine Syrup. A remedy that has been on the market for over 25 years.

John D. McFarlane, Jr., S. W. Margaree, N.S., writes: "I was troubled for years with bronchitis, and could not find any relief. I was especially bad on a damp day. I went to a drug-gist, and asked him for something to stop the constant tickling in my throat. He gave me a bottle of Dr. Wood's Norway Pine Syrup, which I found gave me instant relief. It is the best remedy for bronchitis I know of, and I now take care that I always have a bottle of it on hand."

See that you get "Dr. Wood's." Put up in a yellow wrapper; three pine trees the trade mark; price 25c, and 50c; manufactured by The T. Milburn Co., Limited, Toronto, Ont.

time and had come to the conclusion it was because they had followed his example to a great extent in the Dominion election. New Brunswick's premier had been the only one in Canada who had not made a decision one way or the other in that contest. One of the recent acts of the premier as leader of a businessman's government had been to float a loan of one million dollars at a loss to the province of \$30,000. Another act had been the holding of the St. John & Quebec Railway investigation. One was to discredit members on the opposition side of the House in which he had failed; and the other had been to put money into the pockets of a defeated candidate named W. P. Jones. Word had gone out through the country that Mr. Jones was to get \$7,000 for his services in connection with that investigation. Before Commissioner Stevens, Mr. Jones had delivered a stump speech which made the people think there was an election at hand and he had been well paid for it. One of the members for Carleton had made a query concerning payments to W. P. Jones and the reply of the premier had been tricky and beneath the dignity of the leader of a government. The present minister of public works had come into office and found a Highway Act on the books, and of that Act had made a complete failure. One of his first acts had been to make a clean sweep of officials opposed to him politically and in their places he had appointed inexperienced men, with failure in the work of the department as a result. In the parish of Hillsboro there was an instance of inefficiency. At the roadside at the top of a hill stood a road machine with snow drifted over it to within six inches of the top.

HON. MR. VENIOT—"We looked for that machine for a year and found it where the opposition had buried it." MR. PECK continuing said the people of Albert took that road machine as a sample of the work of the Foster government. In this connection there was one bouquet which he wished to present to the minister. Upon that road machine, covered to within six inches of the top with snow, he had

placed a fire insurance policy. The by-roads of the province had been neglected and everything spent on the so-called trunk roads to the disadvantage of the farmers. The people must think that it was by mistake or accident that the present government had got into office. In war times it was necessary to have the strongest men at the head of public affairs, and it was high time the people looked into this matter and rectified their mistake.

Dr. McGrath's Reply.

MR. McGRATH congratulated his hon. colleague from Northumberland on the manner in which he had delivered his address on the preceding

TELL YOUR WIFE CORN'S LIFT OFF

Doesn't hurt a bit to lift corns or calluses off with fingers

Not a twinge of pain or soreness before applying, or afterwards. This may sound like a dream to corn-plagued men and women who have been cutting, filing and wearing torturous plasters. Yes! Corns lift off and calluses peel off as if by magic, says this Cincinnati authority.

A quarter ounce of freezone costs but a few cents at any drug store. Apply a few drops directly upon your tender corn or callus, and instantly the soreness disappears; then shortly the corn or callus will be so loose that it lifts off.

Freezone dries instantly. It doesn't eat out the corn or callus, but just shrivels it up so it lifts away without even irritating the surrounding skin. Women should keep it on the dresser and never let a corn or callus ache twice.

placed a fire insurance policy. The by-roads of the province had been neglected and everything spent on the so-called trunk roads to the disadvantage of the farmers. The people must think that it was by mistake or accident that the present government had got into office. In war times it was necessary to have the strongest men at the head of public affairs, and it was high time the people looked into this matter and rectified their mistake.

Dr. McGrath's Reply.
MR. McGRATH congratulated his hon. colleague from Northumberland on the manner in which he had delivered his address on the preceding

day. Personally he had intended to say nothing on this question but had changed his mind on account of the strange and peculiar remarks on the other side of the House. Strange privileges had been extended by the former attorney general. These might have been of value which the hon. member held office but were worth little with him in his present position. The attention of the speaker had been drawn recently to a strange parcel from nowhere which had been left at the office of the ex-attorney general to that gentleman's great agitation. He did not know whether there was a connection between that parcel and the privileges extended by the former attorney general. The latter had be-wailed almost to the point of tears the necessity of having election funds. He could tell the hon. member that in his part of the country (Northumberland) no election fund was needed. All that was necessary was the sympathy and support of the upright electors. The ex-attorney general had suggested that the necessity for election funds might be avoided by putting the oath to each elector, even women. His own opinion was that when the women of New Brunswick were given the right to go to the polls they would have to have no oath put to them. The existing election act might solve the question of election fund if its provisions were applied to the candidate and no so much to the elector. The hon. gentleman also had had his fling at the Valley Railway, expressing regret that a former Federal Government had not seen fit to route the Transcontinental Railway (Continued on page 3)

Farm Help Available.

25,000 OLDER CANADIAN BOYS HAVE VOLUNTEERED TO HELP THE FARMERS.

Last year 7,000 Older Boys demonstrated to the farmers of Canada that they could help take the place of the regular farm help that has gone overseas. They proved their willingness and ability to adapt themselves to farm work.

This year many farmers are asking for boys. Already 25,000 boys between 15 and 19 years of age in Ontario and Western Canada have offered their services as SOLDIERS OF THE SOIL. The enrolment week for New Brunswick takes place April 28th to May 4th. The plan is to have the boys fill in enrolment forms which will be turned over to the Department of Agriculture. The farmers are asked to write to the Minister of Agriculture setting what help they require and for what period. Arrangements as to wages will be agreed upon by the farmer and the boy.

Fredericton, N. B.

J. F. TWEEDDALE,

Minister for Agriculture.

Basic Facts About Belting

AND PARTICULARLY

Dunlop "Gibraltar RedSpecial" Frictioned-Surface Transmission Belting

A Worthy Product

Years of careful study of the high-power belt problem have enabled Dunlop Laboratory experts to create "Gibraltar RedSpecial" Belting, the original Red Face Rubber Belting of Canada—a product worthy of the Dunlop factories and of the quarter-century record of success back of them.

"Gibraltar RedSpecial" Virtues Are Real

Dunlop "Gibraltar RedSpecial" Belting is to-day widely used in a multitude of ways in the many varied industries in this country. It owes its success, not to any illogical deductions or fantastic analyses, but to the simplest causes—causes so

simple that they are now, always have been, and always will be, in our opinion, the bedrock of success in belt-making—Power, Speed, Service—in actual use as well as in the test-room.

Permanent Elasticity Means "Life" in Belting

In producing this new, this original, this master, red belt, our object has been to have the friction coat of rubber between the plies such as will retain its life indefinitely, and to have a quality of rubber

with long "fingers," and not a quality of rubber the elasticity of which has been sacrificed to obtain the so-called high-pulling test.

That "Friction Pull"

When you are informed that such-and-such a belt has a "friction-pull" of abnormal poundage, do not imagine that you are getting a quality friction. What you have to secure in a belt is a friction full

of elasticity. There must be between the plies of duck only a certain class of rubber to give uniform strength and pliability.

Resilient Quality Must Not Be Sacrificed To Excess of Friction Strength

To obtain high figures, such as referred to above, in belt frictions you have to take away from the elasticity of the friction; hence, there is a happy medium, and this medium we have obtained through our laboratory experts. It ensures for

you a belt, the friction of which will hold the plies together and will be sufficiently elastic in its properties to allow for the give and take necessary in rounding the pulleys.

Duck Finest Obtainable, Made to Highest Specifications

A highly important feature of "Gibraltar RedSpecial" is the duck which enters into its construction. Only the finest quality of specially-selected duck, having the proper tensile strength in the right direction, is used. And this, in combination with a superior rubber friction between the plies, ensures absolute uniformity of service.

Fills The Bill

"Gibraltar RedSpecial" Belting is to be found in practically every industry in Canada, and if it is Power, Speed and Service that you want, then it is "Gibraltar RedSpecial" Frictioned-Surface Belting that you require for your work.

Universal Recognition of "Gibraltar RedSpecial"

To cite the names of users of this famous, red frictioned-surface belt would necessitate the use of much space. We have on file recommendations from almost every type of industry requiring "Gibraltar RedSpecial" Belting in widths varying from 1 1/2" to 48". These testimonials are available for your perusal at any time.

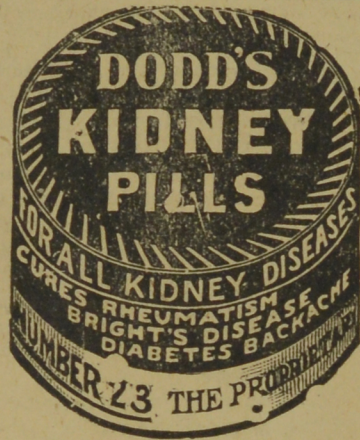

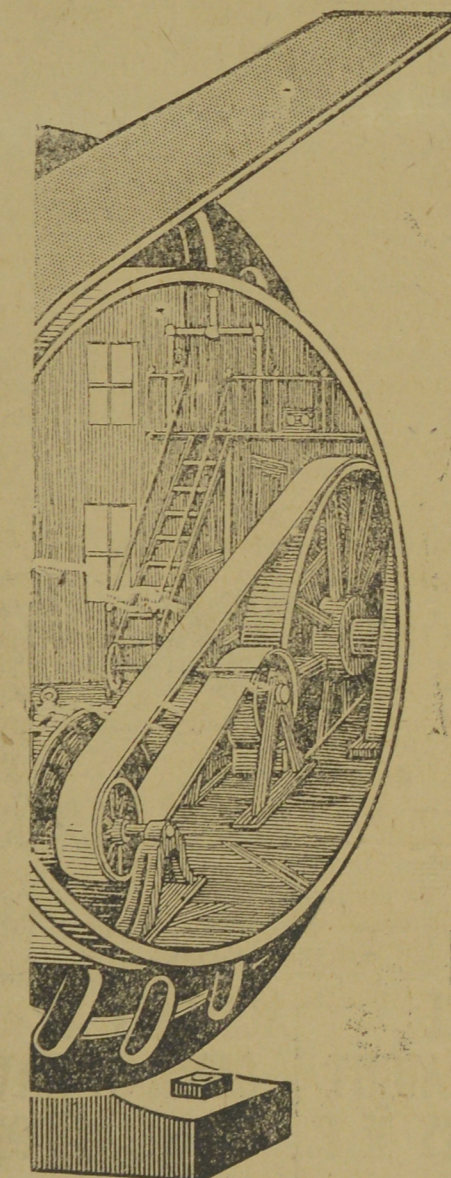

The Original "Red"

"Gibraltar RedSpecial," as noted previously, is the Original Red Rubber Belt—and like most things that are original, its success is of the kind that endures.
