

HYDROPLANES TO BE SHOWN AT ACTUAL WORK

CANADIAN PULP & PAPER
ASSOC. IN CONVENTION

Woodlands section to Have
Interesting Demonstrations
—Chief Forester Prince
to Attend.

Mr. G. H. Prince, Chief Forester of New Brunswick will leave early next week for Montreal having been invited by the Canadian Pulp & Paper Association to attend the summer convention of the Woodlands section of the Association.

The Woodlands section will hold its summer convention at Berthier and Grand Mere, Quebec, on June 25th and 26th.

Quebec Demonstrations

The Quebec Government Nurseries will be inspected by the delegates at both Berthier and Proulx and arrangements have been made to give the delegates a full demonstration of the working and efficiency of the new Forest Service hydroplanes in detecting forest fires. A hydroplane of this type recently passed over New Brunswick on its way from Halifax.

A demonstration of slash-burning will also take place, the fire being controlled by forest service fire-fighting pumps.

Many other matters of interest to pulp men will be demonstrated including tractors and an excellent program is provided.

It is expected the Pulp Companies in New Brunswick will be represented at the meeting. The Premier of Quebec has signified his intention of being present, and of giving official welcome to the hydroplanes.

Removed to Summer Home

His Lordship Bishop Richardson accompanied by his family, left last night for his summer residence at Smith's Cove, N. S. They will occupy the summer home until autumn.

Motored to Jemseg

Mr. and Mrs. C. C. Camp, Mr. and Mrs. George Camp and Mrs. Bruce Springer and child left yesterday on a motoring trip to Mrs. Camp's former home at Upper Jemseg. The party will spend some time motoring in other parts of the province and will probably return home on Monday or Tuesday.

Taking Treatment at Riverglade

Pte. Walter Burden son of Mr. and Mrs. Weldon Burden of this city arrived home yesterday from Riverglade Sanitarium where he has been taking treatment for several weeks. Pte. Burden has had a lengthy experience in German prison camps and he contracted a bad cold which settled on his lungs leading to tuberculosis.

River Going Down

The water in the river has been falling very rapidly of late and will soon be down to the ordinary summer level. Fredericton seems to be falling down as a seaport, not a single schooner having arrived here this season. The city's hard coal supply is being brought in by rail and dealers say that they can get a cheaper rate, than prevails on the water.

Resumes Position in Bank

Mr. Jack Saunders, son of Mr. and Mrs. Charles Saunders of North Devon has accepted a position with the Royal Bank of Canada and began his duties on Wednesday last. Mr. Saunders was employed by the Royal Bank prior to his going overseas. He returned from overseas recently after a very trying experience in German prison camps.

Going to Michigan

Miss Margaret Lynds instructor of elocution in the Normal School will leave this evening on a trip to Ann Arbor, Michigan. Her brother, Sheriff Lynds of Albert County, and her sister Miss Lilly Lynds will join her at Fredericton Junction and accompany her to the west. They are going to Ann Arbor to settle up an estate left by their brother, the late Dr. James Lynds, who was a successful practitioner in that city.

Repairing Bridge-Flooring

Repairs of the flooring of the Fredericton-Devon highway bridge have been begun and good progress is being made. The travelling public has been much inconvenienced by the condition in which the flooring has been for some time, temporary repairs being made from time to time. The renewal of the flooring which should have been done under the previous provincial administration was neglected with the result that an extra burden has been thrown upon the department now headed by Hon. Mr. Veniot.

Good Progress with Garage

Excellent progress has been made in the erection of the new garage of Fredericton Motors Limited at the corner of Court House Square and Campbell street. The roof is now being completed. A large skylight will furnish light for the main floor and will accommodate a large number of cars. Mr. George McKnight has superintended the construction. There will be entrances from both Campbell street and Court House Square. The corner on the Square which is nearest Queen street will have two large plateglass show-windows for the exhibition of cars.

NEW EXHIBITION BUILDING MAY BE OF CONCRETE

COMMITTEE HAS MATTER
UNDER CONSIDERATION

Directors Inspected Site Yesterday—Buildings Committee to Meet Monday and Report Back.

The directors of Agricultural Society No. 34 at a meeting held yesterday afternoon took steps toward the erection of the new Transportation Building which is to take the place of that damaged by fire several years ago while troops of the C. E. F. were quartered at the Exhibition grounds.

The new structure will be either of concrete or wood. The Buildings Committee will meet Monday morning to receive information concerning the costs of buildings of the types mentioned and will report back to the whole executive. The directors inspected the site yesterday.

Near Aberdeen Street Entrance

The proposed new building will be located on a line with Aberdeen street and will be near the Aberdeen street entrance of the grounds. The intention is that it is to be of two stories. The lower story will be devoted to motor and other vehicles and the Poultry Department which has become one of the most important of the local fair, will occupy the second.

Other Changes Contemplated

The erection of the new building will make it possible to use the present Poultry Building for general purposes. Sheep pens which occupy a portion of the site intended for the new building will be removed to another part of the grounds.

Building New Mill

Mr. Joseph Hawkins has begun the erection of a new saw mill near the mouth of the Nashwaakiss stream. It is his intention to install in it the machinery from the mill near the highway road on the same stream which he has been operating for several years. The old mill is not conveniently situated for obtaining logs and will be converted into a woodworking factory. The new mill will be operated by steam power.

Gardens Look Well

The fine weather of the past few weeks has favored the amateur gardeners of the city and the crops have made splendid progress. It is doubtful if there is another town of the same population which possesses so many enthusiastic gardeners and as many fine gardens as Fredericton can boast of. The soil here is particularly favorable for gardening and yields readily to cultivation. Already many local gardeners have lettuce and radish and they will have green peas early next month.

Mr. J. Taylor of Montreal is in the city today.

EMPLOYMENT OFFICE DOING GOOD WORK

DEMAND FOR SKILLED
LABOR EXCEEDS SUPPLY

Upwards of Sixty-six per cent of the Applicants so Far Have Been Placed by Local Office.

The offices of the Employment Service of Canada formerly the Dominion Provincial Employment Service, in this city are doing splendid work in finding positions for both returned soldiers and civilians and for women as well as men. Up-to-date about sixty-six per cent of those making applications for positions have been placed. The percentage of New Brunswick compares very favorably with the other provinces in this respect.

The work of placing the applicants in positions is in the hands of Superintendent A. E. Ashford and Mr. William Richards, Representative of the Department of Soldiers Civil Re-establishment. The work is conducted under the Department of Labor for the purpose of securing positions for the unemployed and throughout Canada there is a chain of Employment Bureaus reaching from coast to coast.

Skilled Artizans Wanted

Men are placed in positions of all classes, general laborers and skilled workmen being greatly in demand at the present time. Workmen for tanneries, shoe factories, electrical shops etc., are also in great demand. Because skilled labor is greatly in demand and laborers of this class cannot be obtained the work of the local Employment Bureau has somewhat slackened lately. The Fredericton office transfers men to positions in Western Canada as well as other Provinces of the Dominion. The wages offered run from \$2.50 to \$5.00 per day and more.

Work is Extensive

Letters from persons seeking employment have been received from England and from all parts of Canada, showing that the work of the local office is very widespread.

On a weekly average about fifty per cent of those applying have been placed in good positions. In connection with other duties, land settlement applications are received from returned soldiers and complaints are registered with Mr. William Richards concerning any irregularities in pensions gratuities, assigned pay, etc.

Seriously Ill

Mr. John Tennant an aged citizen is quite ill at the home of his sister in law, and his condition is causing his friends some anxiety. Mr. Tennant will be 87 years old on Monday. He belongs to St. John and was for many years engaged in shipbuilding.

FACTORY QUOTED PRICES

The price of all Waltham and Elgin Watches are now made by the Factory. A Baby could buy either a Waltham or an Elgin Watch with confidence, as there is no chance of overcharging by the dealer. The Public is protected from any chance of overcharging by this new system of selling at the Factory Quoted Prices.

We want to be your headquarters when you consider the purchase of a Waltham or an Elgin Watch.

CALPOISO

Calpoiso is an insecticide which is used in connection with Lime Sulphur or Bordeaux Mixture for Spraying purposes. It is Arsenate of Lime and is a very valuable spray.

It does not dissolve or throw down a precipitate with Lime Sulphur and is in dry powdered form and for this reason and also for its splendid covering and adhesive qualities it is a very economical spray.
