JOHN PALMER COMPANY LIMITED

Fredericton, N. B., Canada.

40 GREATEST MODERN INVENTORS THE PRODUCT OF SIX NATIONS

(From the Scientific American.)

The forty greatest inventions of modern times are credited to six nations—America, Great Britain, France, Germany Italy and Norway. Most of them are attributed to one nation in their entirety, but a few are laid to two nations jointly. Great Britain is credited with being responsible for the steam engine the Bessemer process; aniline dyes, the steam turbine, the locomotive, the hot blast for the blast furnaces, the spinning jenny, half of the open-hearth process, the cyanide process, the rotary printing press, and half of the regenerative furnace. Germany gets credit for the other half of the regenerative furnace the gas engine, the Diesel motor, the by-product coke oven, and the X-ray. France is hailed as the home of photography, the Jacquard loom, artificial refrigeration, and parts of the development of the open-hearth process and of aluminium. Italy, of course, is credited with wireless, and Norway with half of the work necessary to develop the fixation of nitrogen. Then comes the American list, starting with the cotton gin, the reaper, telegraphy, vulcanized rubber, the sewing machine, the air-brake, the telephone, the incandescent light, half the work of aluminium, the induction motor, the air-plane, the kinetoscope (foundation of the moving-picture industry), the linotype, the steam boat electric welding, highspeed steel, half the labor in connection with the fixation of nitrogen, the typewriter, the phonograph, the trolley car, and the Cottrell precipitation process.

MYSTERY TOWERS TO SALVAGE SHIPS, A SECRET NOW REVEALED

London, Aug. 8.—For the last 18 months there have been arising on the Southwick side of Shoreham Harbor, near Brighton, England large structures of concrete and iron, concerning which there has been great official secrecy. So much importance was attached by the authorities to the work that building went on by night as well as by day. After sunset the scene of unceasing labor was illuminated by giant flares, visible for miles.

Curiosity increased when the armistice was signed and the work was maintained at unabated pressure. From a forest of spars and girders there have now emerged two gray concrete objects, each a tower and platform on an elliptical base. Each looks as big as a cathedral. They are, it appears, to be used to raise the sunken ships with which the narrow seas now abound.

These structures are really concrete shells. They are to be towed to sea and submerged so as to descend on each side of a sunken vessel. They are then to be firmly attached to the vessel by divers. The water in them will be pumped out, with the result, it is believed, that the two structures and the vessel between them will rise to the surface.

AROUND THE CITY

The falling away of the Province of Quebec from the Prohibition ranks and its enlistment under the standard of "Light Wines and Beers" has caused complications in the "two per cent trade" in Fredericton. It is a long way round but the influence is felt just the same. Light beer made by the Montreal breweries controlled by The National Breweries Limited, has a large sale under The Intoxicating Liquor Act 1916 in New Brunswick. After the knocking out of the "hard stuff" as a result of the referendum in the Province of Quebec the demand for the 5.50 per cent beer in Montreal and other "wet" districts of the neighboring province grew so great that the breweries in Montreal catered to that trade entirely and refused to make the lighter beer for New Brunswick on which the profit was less. The stocks of light beer can be drawn on till they are exhausted and after that no more Montreal beer will be shipped here. There is light ahead however, for the breweries have practically promised that after September 1st the cooler weather will decrease the demand for strong beers in Quebec and they will be in a position to brew for the Maritime trade.

The flurry caused by the decision of the City Council to have enforced

BABY HAD DIARRHOEA WAS GIVEN UP

**DR. FOWLER'S
EXTRACT OF WILD STRAWBERRY
CURED HER**

Mothers should look well after their children during the hot summer months as this is the time of year when the young ones are liable to all kinds of bowel complaints.

If your children have any looseness of the bowels do not experiment with new and untried remedies. Get one having stood the test of time. Dr. Fowler's Extract of Wild Strawberry has been on the market for the past 74 years. Don't accept a substitute and perhaps endanger your child's life. Mrs. Willis Coupland, Sunbridge, Ont., writes: "About four years ago my little girl, then a baby two months old, took diarrhoea. I took her to the doctor but to no avail. After he had given her up, I read of Dr. Fowler's Extract of Wild Strawberry and immediately got a bottle. Within two days she was improving fast. I cannot ever praise it enough. I hope some poor sufferers will see this letter and lead them to a friend indeed." Price 35 cents. Put up only by The T. Milburn Co., Limited, Toronto, Ont.

the bylaw forbidding projecting signs except those illuminated by electricity reminds one of a similar flurry in 1913 when the bylaw was passed. At that time passive resistance was adopted so generally that the bylaw proved abortive and no real attempt at enforcement was undertaken. One of the few who complied with the bylaw was the proprietor of the Sam Wah Chinese laundry, Regent street. Early in the morning after the passing of the bylaw by the City Council he was observed with bucksaw severing the offending sign from the door-casing and for a long time afterward that sign was observable only through the window. The laundryman was taking no chances.

Although the laundry in question is still known as the Sam Wah laundry, Sam Wah, is not there. Sam was the first Celestial to make what might be called permanent settlement in Fredericton. Early in the nineties he and another Hong Kong laundryman rejoicing in the name of Charlie appeared in Regent Street. Since that time the stand has been a Chinese laundry and for that reason has considerable business value now. Sam, however, returned to China a number of years ago, having amassed a competence out of the starched shirts and collars and general washing of the citizens of Fredericton. That however was not the first Chinese laundry established in this city. The wooden building immediately below Long's Hotel was used as one for a short time some years before Sam Wah came and even before that Celestials attempted with poor success to start hand laundries here.

The visit of H. R. H. the Prince of Wales to New Brunswick next week recalls the fact that his grandfather, the late King Edward, when Prince of Wales, spent several days in Fredericton. Christchurch Cathedral at that time possessed, as it does now, the frontal cloth which was used in Westminster Abbey on the sole occasion of the coronation of William IV and Queen Adelaide. The Prince of Wales upon being informed of that was curious and asked how it had come into the possession of Christchurch Cathedral, Fredericton. The late Bishop Medley who was accompanying the Prince, avoided giving any direct reply to His Royal Highness but finally when pressed by him answered shortly, "I came by it honestly." The Prince

pressed his inquiries no farther. As a matter of fact the frontal cloth which is a magnificent specimen of needlework according to custom became the property of the Dean of Westminster, after being used at the coronation. That clergyman was a personal and close friend of Bishop Medley and presented the cloth to the new cathedral of Christchurch in Fredericton. His Lordship, however, did not wish the Prince to know that it had come to Fredericton in that manner.

Prohibition has made numerous changes in the lives and customs of many. Recently a returned soldier applied at the New Brunswick Military Hospital for a course at the Vocational School conducted in connection with that institution. On being questioned he admitted that he could not claim a course on the ground of being a minor when enlisted or because of being disabled, but still persisted that he should be given a course. When asked why, he said because he could not work again at his former occupation. "What was that?" was the question. "Bartender," was the brief reply and the soldier got the course.

Many stories are told concerning the late Bishop Medley. One of the best concerned His Lordship and a coachman of Fredericton who was of Hibernian extraction. The Bishop once entered the vehicle driven by this man, saying, "Take me to Christchurch." His Lordship meant the Cathedral but the coachman who was a devout Catholic drew up at St. Dunstan's Church. Bishop Medley got out and looking at the church said, "This isn't Christchurch." "Well if it isn't, there is none in this town" was the reply of the Jehu.

"English as she is writ"—the window of a well known shoe store in Queen street contains the following handpainted sign—"Infants sandals Regular \$1.35. Now 99 cents."

AN UNSEEN DANGER.

Guest—I would have been here sooner, but I had the misfortune to puncture a tire on a broken bottle.

Host—But couldn't you see the bottle?

Guest—Hardly; you see it was in the pocket of the fellow I ran over.

BUNIONS NO JOKE

Not to the man who has to move about, but a slight application of "Putnam's" softens the thickest tissue and cures the bunion quickly. Just as good for warts, lumps, and callouses is Putnam's Painless Corn Extractor. Use no other, 25c. at all dealers.

THE CAUSE OF SICKNESS

Almost Always Due to Weak, Impoverished Blood

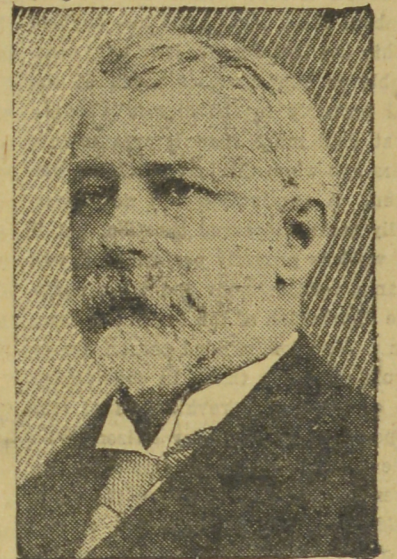

Apart from accident or illness due to infection, almost all ill-health arises from one or two reasons. The great mistake that people make is in not realizing that both of these have the same cause at the root of them, namely poor and improper blood. Either bloodlessness or some trouble of the nerves will be found to be the reason for almost every ailment. If you are pale, suffer from headaches, or breathlessness, with palpitation of the heart, poor appetite and weak digestion, the cause is almost always bloodlessness. If you have nervous headaches, neuralgia, sciatica and other nerve pains, the cause is run down, exhausted nerves. But run down nerves are also a result of poor blood, so that the two chief causes of illness are one and the same.

This accounts for the great number of people, once in indifferent health, pale, nervous and dyspeptic, who have been made well and hearty by Dr. Williams' Pink Pills; for no other medicine ever discovered is so valuable for increasing the supply of rich red blood and giving strength to worn out nerves. Men and women alike greatly benefit from a course of the splendid blood builder and nerve tonic. If your dealer does not keep these pills you can get them by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

NO LUXURY FOR GENIUS.

She (dreamily)—Genius must ever walk alone.

He (practical)—Looks like it; nearly everybody else can afford a car.

HON. W. S. FIELDING, M. P.

EMPLOYERS THE EMPLOYMENT SERVICE OF CANADA

The PROFESSIONAL and BUSINESS SECTION has been established to assist professional, business and technical men and women.

Many officers, soldiers, sailors and war workers, who sacrificed their positions during the war, now desire to secure employment in the occupations for which they have been specially trained.

Employers should not wait until increasing business forces them to employ anybody they can obtain, but should look ahead and avail themselves of this unusual opportunity to enlist the services of highly trained workers, ordinarily secured only with difficulty. On application there can be referred to you, for example:—

ENGINEERS	LAW CLERKS
ARCHITECTS	COMMERCIAL ARTISTS
BUSINESS EXECUTIVES	SALES MANAGERS
ACCOUNTANTS	TRAVELLING SALESMEN
SECRETARIES	CHEMISTS
TEACHERS	YOUNG COLLEGE GRADUATES

These workers are returning to civil occupations with increased initiative, a broader view of life, and a greater capacity for work.

EMPLOYERS
