Chicopee Falls, Mass., U. S. A.

MAIL CONTRACT

SEALED TENDERS addressed to the Postmaster General will be received at Ottawa until noon on **FRIDAY, the 5th September, 1919**, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, 3 times per week, on the Chipman Rural Route No. 1, commencing at the pleasure of the Postmaster General.

Printed notices containing further information as to conditions of proposed Contract, and blank forms of Tender may be obtained at the post offices of Chipman, Linton and Dogherby and at the office of the Post Office Inspector, H. W. WOODS, Post Office Inspector, St. John, N. B., July 21st, 1919.

NAVIGABLE WATERS PROTECTION ACT.
R. S. C. Chapter 115.

The Nashwaak Pulp & Paper Company, Limited, hereby gives notice that it has, under section 7 of the said Act, deposited with the Minister of Public Works at Ottawa, and in the office of the Registrar of Deeds in and for the County of York, in the Province of New Brunswick, a description of the site and the plans of a dam proposed to be built in the Nashwaak river at Marysville, in the County of York, nearly opposite Station 2623 plus 34 on the Newcastle-Fredericton Branch of the Canadian National Railways.

And take notice that after the expiration of one month from the date of the first publication of this notice, the said Nashwaak Pulp & Paper Company, Limited, will, under section 7 of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa for approval of the said site and plans and for leave to construct the said dam.

Dated at the Parish of Lancaster, in the County of Saint John, this twelfth day of August, A.D. 1919.

NASHWAAK PULP & PAPER COMPANY, LIMITED.
Per N. M. JONES, Manager.

NOTICE

PRESENT SESSION OF PARLIAMENT
EXPECTED TO LAST THIRTY DAYS

Little in the Programme to Suggest a Longer Session—The Matter of Ratification of the Peace Treaty will be Brought On as Soon as Possible.

Ottawa, Sept. 3.—Members of Parliament gathered around the lobbies and caucus rooms and discussing the outlook, vary in their views of the session and its length. All agree that it will last thirty days. Some Liberals say prorogation will occur on the thirtieth day and others profess to believe that they will be here till the snow flies.

In the programme there is little to suggest a long session. The Peace Treaty will be brought on as soon as possible and Sir Robert is preparing a lengthy speech for the occasion.

When the measure is discussed the famous Article X may be subjected to criticism on the ground that by its provisions Canada will be involved automatically in future wars without the consultation of parliament. Then the question of Canada's part in the indemnities to be paid by Germany will cut a considerable figure.

The opposition, as indicated, will bring up the charges at their convention relating to the alleged improper application of soldiers' votes.

Very few of the war measures orders-in-council will be presented for ratification and there is uncertainty whether prohibition will again be presented for enactment.

Caucus Next Week.

A ministerial caucus will be held next week and a primary matter for consideration will be the future of the Unionist party. The great majority of government supporters are favorable to continuing the union, but they are insisting upon a more definite policy and platform than now exists.

The movement back toward straight party lines is not overlooked, and a contributory factor towards it is the fact that the Liberal Premiers who supported the Union Government in 1917 were all at the recent Liberal convention, a development not without its embarrassing features.

The Unionist party has either to go ahead or break up. If the former course—the more likely one—is to be followed, it will involve consolidation of ground, and organization. If there is to be a revision to party lines, an election would be inevitable.

From all that can be gathered here, the Union government plans both for the continuance of its supporting party

The Liberal advisory committee met yesterday with a new member in attendance in the person of Hon. W. S. Fielding. There was a general discussion on the sessional work and the attitude of the party on the various matters to come up.

The drought question in the southern portions of Alberta and Saskatchewan was the occasion of a caucus of members from that part of the country this morning. Crops in many parts are an entire failure and means to prevent a recurrence are under discussion.

There is some suggestion of having the farmers move further north and utilize the land for ranching purposes but this would depopulate settled districts. The plan more generally favored is a government system of irrigation. Wherever this has been followed drought has been counteracted and splendid crops have resulted.

HOW IT WAS DONE.

"Was Maybelle a success at Palm Beach?"

"Oh, yes, she got along swimmingly. In fact she managed to outstrip all the other girls."

BUSINESS CHANGE

After a service of 16 years as local manager for the Imperial Oil Company in this city, we have this day resigned our agency for that company, which is putting on its own teams and salaried agent.

We are now prepared to fill all orders in the trucking business.
JOHN TONER & SONS.

LIFT OFF CORNS!

Doesn't hurt a bit and costs only a few cents

Magic! Just drop a little Freezone on that touchy corn, instantly it stops aching, then you lift the corn off with the fingers. Truly! No humbug!

Try Freezone! Your druggist sells a tiny bottle for a few cents, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without one particle of pain, soreness or irritation. Freezone is the discovery of a noted Cincinnati genius.

INVITED THEM
TO COME EAST

Convincingly impressed with their "wishes" of western Canada, and filled with an increased feeling of regard and respect for its people and the country, the two hundred odd American editors and their friends left Winnipeg for home Thursday night after a farewell dinner at the Royal Alexandra Hotel.

There was little speaking at the dinner. At its conclusion Mr. J. T. Hawke, editor and proprietor of the Moncton Transcript, who represented the New Brunswick government, tendered an invitation to the editors to come east next year, and assured them a cordial greeting, not only from the Maritime Provinces, but Ontario and Quebec as well.

Rusty steel ornaments, fireirons and the like may be cleaned by being rubbed well with sweet oil, enough of the oil being allowed to remain on the article to soak in for some time.

The cooler eggs are, the sooner they will beat up to stiffness, so always beat in the coolest possible place, and throw in a pinch of salt, which will facilitate matters

Transforming The Prairies,

SELDOM does a settler in a new country find things exactly as he would like to find them. Take trees, as an illustration. It is true there are large stretches of country in different parts of the world where trees seem to be ideally interspersed. Large areas in the central parts of the Prairie Provinces of Canada are like this. Open spaces of forty to a hundred acres or more are almost surrounded by trees, affording excellent shelter for stock, and making a varied landscape. But such conditions are exceptional, though they serve to emphasize the rule. Mostly the new settler finds too many trees or practically none at all. In the former case considerable labor is required in clearing before the settler can hope for any crop. In the latter case, the settler has the advantage of being able to break his land immediately and, if he proceeds in the right manner, soon has it in a condition for producing a remunerative crop. But if he has come from a home which was surrounded by trees, he certainly misses them for a time.

A large part of the Canadian prairies comes under the second category. Nearly all of the southern to the central parts of these provinces are open prairie, ready for the plow. Except near the rivers and creeks one could motor miles and miles without seeing a tree. But a wonderful transformation is slowly taking place. If nature has left these fertile prairies practically treeless, she has not left them devoid of the elements necessary to tree growth. Trees will grow there if properly planted and cared for, just as wheat and other grains, just as alfalfa and other fodders, just as potatoes and all manner of roots and vegetables, grow—wonderfully well. And they are being grown more and more extensively every year, beautifying many a farm home, and transforming the prairie landscape.

In this beautifying process, farmers are greatly encouraged by the Canadian Government and the Canadian Pacific Railway. Both are taking a keen interest in the planting of trees on the prairie farms, and encourage farmers to improve their home surroundings by distributing trees free of cost to farmers. Each maintains large nurseries where trees are grown for this purpose under prairie conditions, the government at Indian Head, Saskatchewan, and the Canadian Pacific Railway at Wolsley, Saskatchewan. Up to a few years ago both nurseries were typically open prairie. Now trees are being raised from seed on the Government's farm at Indian Head, Saskatchewan, which comprises 430 acres, in sufficient quantities as to permit a distribution of between seven and eight million young plants annually. The Canadian Pacific Railway

(1) Headquarters C. P. R. Irrigation Works, Strathmore, Alberta. All trees planted since erection of buildings.

(2) The kind of home many of the older settlers in Western Canada are building. Note young trees in background.

way restricts its distribution of trees until they get thoroughly established. Success in growing trees is being realized by farmers throughout the Canadian Prairie Provinces; and this success is very encouraging to the settler who at first misses the trees that were conspicuous near his old home. But he has many advantages over the pioneer who has to set to work to clear his land before he can begin to farm. He can begin to farm from the moment of his occupation. Farmers must make their plan of the land, and when he is ready to plant trees, he can plant them wherever he desires, with the assurance that, if given a little intelligent care and attention during the first year or two, they will grow to maturity, and be as strong as trees of the forest.
