 WHOLESALE DRY GOODS AND WOOLLENS
ST. JOHN, N. B.

Our Motto: Promptness, Accuracy, Courtesy, Care.

Women! Here Is A Dandy Thing

Few drops stop corns hurting
then they lift right out
with fingers

Your high heels have put
corns on your toes and cal-
luses on the bottom of your
feet, but why care now?

This tiny bottle holds an
almost magic fluid. A ge-
nius in Cincinnati discov-
ered this ether compound
and named it Freezone.
Small bottles of Freezone
can be had at any drug
store for a few cents. Ap-
ply a few drops on your
tender, aching corn or cal-
lus. Instantly the soreness
disappears and shortly you
will find the corn or callus
so shriveled and loose that
you can lift it off with the
fingers.

Just think! You get rid
of a hard corn, soft corn or
a corn between the toes,
as well as hardened cal-
luses, without suffering
one particle. Millions of
women keep a tiny bottle

on the dresser and never let the corns
ache twice.

URGES TAKING THE TARIFF OUT OF GOV'T CONTROL

This Suggestion Made at a Meeting of the Industrial Commis-
sion in Montreal—Would Have an Expert Commission
Appointed to Deal With Tariff Matters—Other Witnesses
Gave Evidence as to the Cause of Unrest.

Montreal, May 30.—"Take the tariff out of government control," was the
out of government control," was the
grave danger of terrible suffering am-
advice given to the Royal Commission
ong the people. He suggested that the
on industrial relations this morning
government call a convention that
by George Smith, business manager of
would be truly democratic. At this
convention he believed it would be
possible to arrange an armistice be-
the National Brotherhood of Oper-
tween struggling elements whereby all
ative Potters and Secretary of the
might further their burning ambition
Trades and Labor Council of St. Johns,
for a limited and fixed time during
Que. Mr. Smith had taken the stand
which the country will be reconstruct-
to explain primarily to the commis-
ed in the pottery trade at St. Johns,
and was asked for suggestions where-
by the present industrial unrest might
be removed entirely.

Having taken the tariff out of gov-
ernmental control, Mr. Smith urged
that the government appoint an ex-
pert commission upon which the work-
ingman, the capitalist and the con-
sumer would have representation and
this commission would have as its
chief function the handling of all tar-
iff questions.

Lockout in Progress.

Mr. Smith explained that a lockout
which now covered a period of nearly
four years had been maintained in the
pottery industry at St. Johns, Que.,
and that manufacturers there claimed
that a reduction in their wage scale
was necessary because of the tariff
regulations.

"In our case," he said, "had there
been such a tariff commission, we
could have made application to it and
it would have investigated the claim
of the manufacturer that the tariff was
too low. If they made proper inves-
tigation and found that the tariff was
too low, then it could be remedied. If,
on the other hand, it was found that
the tariff was quite sufficient, then the
onus would have been upon the manu-
facturer. That is my idea of it."

Working Under Agreement.

He explained his own case in de-
tail. Since 1905 he said that until
1915 the men had been working un-
der agreements with the manufactur-
ers. In 1915 they demanded a cut of
30 per cent. in their prices owing to
bad trade conditions. The men agreed
to stand for a 15 per cent. cut. The
company refused this, and the men
would not agree to a 30 per cent. cut,
being paid on the piece-work basis,
and the lockout resulted. For the four
years this lockout has continued and
the National Brotherhood had paid
strike wages.

H. Mortimer Lamb, secretary of the
Canadian Mining Institute, said:

"Our institute has gone on record
that it is the belief that the industrial
problem is an educational problem.
The two are interlocked. We must do
something to educate the people with
a view to having them realize their
responsibility of citizenship.

"The whole difficulty here would be
one of money. In order to get the
money we would have to get some-
thing from the Dominion government.

A Brake on the Wheels.

"The greatest brake on the wheels
of production in the industrial world
today was the reluctance and antag-
onism of the workman. This mental
attitude arose from the suspicions
that they were being exploited in the
interests of capitalists, and from the
accumulating ill-will due to an econ-
omic condition that does not properly
guard the rights of humanity, leaves
the worker a constant prey to grind-
ing uncertainty which arises from be-
ing to a great extent a helpless and
voiceless unit in a vast organization
which they either do not understand or
wholly misunderstand.

This is why a practical grounding in
the fundamental facts and principles
of economics and ethics must become
an essential part of any comprehen-
sive scheme looking to a final solution
of this greatest of present serious
problems.

"The groundwork of such education
must be laid in the schools, but the
superstructure will be built by the
intelligence and experience acquired."

real Trades and Labor Council, warn-

ROMANCE IN REAL LIFE.

"Was your first meeting with your
wife romantic?"

"Naw. We used to make faces at
each other over the back fence when
we were kids."

Not till they saw the peace terms
apparently, did the German statesmen
discover that they were licked.
