## MORE SOCIABILITY WANTED.

The veteran editor of the New Glasgow Chronicle, in an article in his paper giving his impressions of the National Liberal Convention which he attended, has this to say:

"In our opinion, what was needed to crown the convention was another day and a big picnic on the race grounds near Howick Hall, where Ontario and Quebec, Nova Scotian and British Columbian, New Brunswick and Saskatchewan, Prince Edward Island and Manitoban, could mingle together with the Albertan to pass the buns.

"What is wanted in sociability in the Dominion is to bring the people together. And why they could not like one another is beyond our ken. Did anyone ever talk to a more delightful conversationalist than one of those double-tongued men from Quebec? Regarding the Lower Province men, they seem to be born mixers. A day together in the open would have done them all good."

The "double-tongued" politicians of Quebec are certainly in a class by themselves. They are pretty good fellows and as entertainers have few equals and no superiors in Canada. If anybody has any doubts on this subject they have only to consult the New Brunswickers who attended the good roads congress in the old French city of Quebec in May last. The number included Hon. P. J. Veniot, Minister of Public Works, and Hon. J. E. Hetherington, Speaker of the Legislature. These gentlemen, during their stay in the ancient capital had the time of their lives and returned home with a greatly enhanced opinion of the French Canadian people.

## CARELESS MARKETING.

Booksellers state that one of the first essentials in introducing a new novel is an attractive cover. This same consideration holds good no matter in what line of commerce it may be applied. Two market gardeners stand side by side, one has vegetables washed, neatly trimmed, if necessary tied up in bunches, and in every way presentable. The other has economized in time at home, with the result that his supplies are anything but appetizing. In competition with his careful and cleanly market neighbor, he always loses. His rival will secure better prices and will be sold out much earlier.

Canada produces more than sufficient for the wants of Canadians. One thing is often lacking, however, and that is attractive marketing of the product. In many cases, imported fruits and vegetables are being sold, to the detriment of local products, due entirely to the lack of appreciation of the selling value of appearance.

The green vegetable season is now at its height. If this produce is presented in attractive condition it will greatly increase the sales, thus reducing to a large extent the large amount which annually goes to waste. The results would be worth the effort.

## TRAFFIC BY-LAWS.

The rapidly increasing number of motor cars and trucks in use on city streets is demanding the more effective enforcement of traffic by-laws. Most of our larger cities have parking restrictions for motor cars, but, as these rules are not closely observed, cars stand for long periods on the streets. This is an extremely dangerous practice, especially in building construction in progress confines the thoroughfare to a narrow limit. In one eastern city a situation of this nature existed; as it was the main artery for the fire department to reach a portion of the business section, and some accidents resulted.

When municipalities make by-laws they are responsible for seeing that they are carried out. The best time to secure their enforcement is before an accident.

The Government has fixed October 27th as the date for by-elections to the House of Commons to fill vacancies now existing. Hon. Mackenzie King,

in an interview, declares that the delay in issuing the writs is inexcusable and can only be explained by the Government's complete indifference to the right of the people to control parliament.

"The Prince of Wales," says the Toronto Globe, "replied in French to an address in French. Not many Canadian public men twice or thrice his age, whose mother tongue is English, could have done it."

It is reported that the Italian government intends to compel wealthy people to make loans to the state at low rates of interest. More than one country would watch an experiment of that kind closely.

The "God-bless-you" policy did not defeat Germany," says the Buffalo Commercial, "and it won't defeat the Bolsheviks. Perhaps the Bolsheviks' own devilish policy will eventually compass their defeat."

## THROUGH OUR SIEVE

Kindness breaks no bones.

Never judge a man by the opinion his wife has of him.

Instead of using profane language a woman gives a cursory glance.

Women who talk most usually mean what they don't say.

Two women like to start a fuss and then leave their husbands to fight it out.

According to the small boy's version, a thin piece of cake is better than no bread.

There are still some people who appear to think that loud talk makes a sound argument.

Some people never believe in putting off till tomorrow the trouble they can make today.

A girl may be both ignorant and pretty, but she is never ignorant of the fact that she is pretty.

There is something radically wrong with the small boy who likes to have his hair cut.

In these eight-hour days and even less, what has become of the antiquarian who used to say man works from sun to sun, but woman's work is never done?

There is a time in every girl's life when her favorite poem says that "into each life some rain must fall." It is her favorite when mother makes her wash the dishes.
