

Thought It Was a Boil Doctor Said Abscess

Mr. Gleason R. Young, Kingscroft, N.B., under date of February 9th, 1918 writes us as follows: "About five months ago, a lump came on my jaw-bone. I thought it was a boil, and after it had been there quite a while it began to get larger. I went to a doctor and he said it was an abscess, and lanced it. He gave me a wash for it, so I went by his directions until it healed up, but it commenced coming again, and in about three weeks it broke itself. I thought it would get better, but it didn't. A neighbor advised me to get a bottle of Burdock Blood Bitters, so I sent and got a bottle, and by the time it was all gone, the abscess had disappeared, and now it is all better."

Burdock Blood Bitters will heal and dry up sores, ulcers, and abscesses, no matter how large or of how long standing. If you have never applied it to a cut, wound, sore or ulcer, just try it and see what soothing, healing, cleansing power it possesses. It takes out itching, stinging and burning, and promotes the growth of healthy flesh. So, too, when taken internally, by its power of eliminating all impurities from the blood and making that vital fluid rich, red and pure, it cuts off the origin and source of the foul matter that goes to make boils, pimples, sores, ulcers, abscesses and the like, and at the same time the purified and enriched blood creates healthy tissue where there was formerly, perhaps a sore full of pus.

Burdock Blood Bitters has been on the market for 40 years. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

LONDON COSTUME SHOPS IN BLOOM

London—Bond st., the fashionable shopping district, is blooming again after four years of war-enforced economy.

Luxurious gowns and jewelry are again being displayed to eager shoppers. Florists' shops are bright with expensive violets and orchids. The prescribed plain shoe for women has given place to the satin slipper and the high boot.

Dinner gowns and dinner rings are advertised.

One shop has evolved the "flying gown," not a sombre thing of leather for a fighter but a suit for women, a creation of blue and red wool. The "gown" was planned against the time when milady will want to skim over to the continent in her private plane.

Scores of men are hard put to supply the demand for civilian suits, ties, shoes and collars. Their greatest difficulty, outfitters explain is obtaining what the managers describe as "colorful ware." This means, for one thing neckties bright enough to make up for the recently enforced khaki shades. Pink shirts of Japanese crepe are in great demand.

CANADA ENTERING UPON A PERIOD OF EXPANSION

Deferred Construction Programs Involving the Expenditure of Millions of Dollars will Now be Proceeded With—Plants Waiting for Labor in Order to Inaugurate Big Schemes for Expansion—Price Levels to be Maintained.

Investigations carried on through Canada by agents of the Dominion government disclose the fact that the task of replacing Canada on a peace footing so far as manufactures are concerned, can be accomplished with little confusion, and that a period of exceptional prosperity and activity lies before both Canada and the United States.

Canada, according to the Department of Labor, is entering upon a period of expansion greater than at any time in her history. There is no anxiety concerning the attitude of the manufacturers of the country, who realize that they must take full advantage of their opportunities and minimize the difficulties of transition from war to peace conditions. Immeasurable opportunities, embracing every department of industry, confront the Canadian manufacturers and with the passing of the need for conservation, the demand for goods of all kinds will increase.

Deferred construction programmes, involving the expenditure of scores of millions of dollars, will be proceeded with in the spring, and industrial plants in all parts of Canada are now awaiting only for labor to inaugurate large schemes for expansion. Stocks are low and the call for manufactured goods will come from every quarter. The demand from abroad will be enormous. Europe must be reconstituted and rebuilt, and with the release of shipping for commercial purposes, our trade with other parts of the globe will be stimulated.

Price levels, it has been ascertained, will be generally maintained. Any possibility of a precipitate fall is precluded by the world-wide demand. No sudden readjustment of wages is anticipated. General stability, with slow and steady realignments to meet new conditions, is the evident tendency all

through the country.

In order that all manufacturers may better be able to take advantage of these opportunities, the Dominion government is giving them every assistance. It has re-endorsed the principle of using goods made in Canada, and has undertaken to stimulate public interest in the movement.

By establishing Industrial Research bureaus, it affords valuable aid to existing industries and will foster the creation of new ones. By its programme for the construction of useful public works, it will absorb the products of many factories. It has stimulated the building industry by instituting a credit of twenty-five million dollars to be drawn on for housing development, and it has inaugurated an important shipbuilding programme. It is providing employment for thousands of men on the Government railways. It is establishing employment offices through the country to aid both the employer and employee.

The opportunities abroad have not been forgotten. The government proposes to establish credits for work undertaken by manufacturers and producers in connection with the rehabilitation of the devastated regions of Europe, which will enable manufacturers to finance contracts on a cash payment basis, and which should lead to a larger share of the business coming to Canada.

A system has been begun for the compilation of accurate details of imports with the object of indicating the directions in which trade may be developed. A trade mission to London and a Canadian Trade Commission with headquarters in Canada have been established for the fostering of commerce and industry. Important machinery is being built up by which the government will co-operate with the manufacturer in every possible direction.

HEAD AND NOSTRILS STUFFED FROM COLD

Don't stay stuffed-up! Quit blowing and snuffing! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken will end gripe misery and break up a severe cold either in the head, chest, body or limbs.

It promptly opens clogged-up nostrils and air passages; stops nasty discharge or nose running; relieves sick headache, dullness, feverishness, sore throat, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores.

PRINCE OF WALES DANCED WITH YANKEE GIRLS

Coblenz, Jan. 15—The Prince of Wales, who has been visiting the American area of occupation as the guest of Major General Dickman, returned to the British sector this afternoon. He said goodbye to General Dickman at a luncheon at which he was the guest of Major General Hines in the castle of the Prince of Wied at Neuwied.

Since his arrival in the American zone the Prince had been treated as an ordinary captain, which was the uniform he wore, rather than as the heir to the British throne.

At the dance the Prince attended last night it was intended that he should be exempted from "cutting in" which meant that one officer could claim the partner of another officer, there not being enough girls from the American and British armies to go around. One officer accidentally "cut in" on the Prince. He passed the incident aside, and for the remainder of the evening "cut in" and submitted to the loss of his partner with the same grace as the others.

The first girl that the Prince danced with was Miss Agnes Kann, a nurse of Baltimore. When the music began the Prince was standing near Miss Kann and at once offered her his arm. Afterward he danced virtually every number, treating the American and British nurses impartially.

The Prince was not a good dancer. American officers, it developed later had spent a good part of the preceding afternoon teaching him the steps of the American dances.

According to information reaching the Third army, the German Fifth army staff at Bad-Nauheim ceased functioning today, surrendering the command to the Eighteenth corps, which also has its head-quarters at Bad-Nauheim. This action is in accordance with the announced plan of the Germans to turn over the command of the areas immediately east of the occupied districts of Germany to the corps which were normally located within the corresponding part of the occupied zone. The Eighteenth corps now has command of the area opposite the American bridgehead.

Two German river steamboats to be used for excursions up and down the Rhine by officers and men of the Third army arrived at Coblenz today. The trips are to be part of the recreation programme for the army of occupation. Four additional steamboats have been requisitioned for the same purpose and will arrive within a few days.

The excursions will include trips beyond Cologne down the river, and beyond Mayence up the stream. Under the present arrangements the excursions will be one day affairs and the excursionists will not be allowed to land during the trips.

NO GOING THAT WAY.

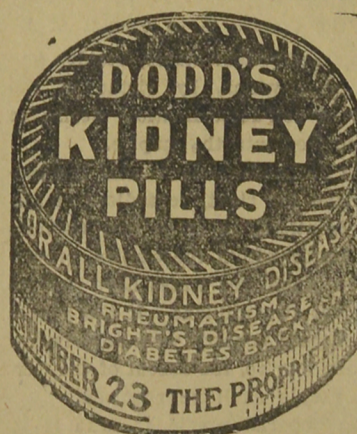

The orderly officer was on his usual round. "Any complaints?" His voice sounded above the din of knives and forks.

"Yes, sir," said a healthy looking Tommy Atkins. "This here blinking joint's raw!"

"Look here, my man," said the officer, after due examination, which proved the complaint justified, "Do you know that Capt. Webb trained on raw beef in order to swim the Channel?"

"Oh," said Tommy, "I thought as 'ow we was goin' across in boats!"

The biographer of a successful man begins, "When a boy he worked on his uncle's farm." No affidavit is needed with that statement. If he was on his uncle's farm he worked all right.
