 Post Office Inspector.
 Post Office Inspector's Office,
 St. John, N. B., Feb. 11th, 1919.

CASTORIA For Infants and Children In Use For Over 30 Years

Always bears the Signature of *Charles H. J. H. H.*

Nearly Every Girl Can Make Herself Pretty and Attractive

SOME WHOLESOME TRUTHS EVERY GIRL SHOULD THINK ABOUT.

Probably you know just such a girl. Perhaps she is sixteen—good to look at, and pretty—quite interesting because she reflects the graces and charm that gives promise of happiness to herself and others. But she is not strong. The color in her cheeks, once so rosy, has faded away—her eyes are listless—the buoyancy of spirit and vigor she once possessed are sadly lacking. Parents, friends, this girl needs Ferrozone—needs it that her blood may be renewed—needs it to restore the nerve force that growth, study and the development of her fresh youth have exhausted. This girl will become queen with Ferrozone—which will restore her color—bring back her oldtime energy—give brightness to her eyes and vivacity to her spirits. In Ferrozone every girl finds strength—then she can do things. In Ferrozone there is endurance—that drives away morning tiredness and languor. For the girl or woman that wants to be happy, healthy, winning—who values rosy cheeks, laughing eyes and abundant good spirits, nothing can compare with Ferrozone. 50c. per box, or six for \$2.50. Get it today from any dealer in medicine, or by mail from The Catarrhzone Co., Kingston, Ont.

SOME POINTERS FOR THOSE WHO RAISE PULTRY

The following are pointers taken from the report of the egg laying contest at Mountain Grove Missouri:

The early bird turns the worm into profit.

High egg production is half breeding and half feeding.

The ideal hen scores high, lays many eggs and live a long time.

Hens know as well as men what and how much to eat.

Success depends half on the poultry and half on the poultryman.

Dodging rocks and sticks is not good exercise for hens.

Poultry do their part oftener than the attendant knows the hens.

Hens know the attendant as well as the attendant knows the hens.

Early moults often prove to be lazy loafers.

Nature stimulates in the spring. Man should help in the fall.

Ninety eggs pay cost. The 150-egg hen is worth six 100-egg hens.

Males in pen reduce the total egg yield for the year.

Too much sunshine is just as bad as not enough.

The trappess makes accurate pedigree records possible.

A sweet soil is just as necessary for poultry as for corn.

Medium weight hens of any variety are usually most profitable.

Early maturing pullets usually make good egg producers.

Reduction of yellow in shanks indicates egg production.

Color has little or no influence on egg production.

Incubation depends on the egg, incubator, building and operator.

The baby chicks is supplied with 36 hours food when hatched.

Water is worth just as much as feed in egg production.

The price of feed does not tell its value in making eggs.

A large red comb indicates health and egg production.

Birds neither eat nor drink at night.

Feed in daylight.

Feed, water and shade will keep hens in a yard.

Never sell poultry or eggs you would not use at home.

The broody hen works 24 hours per day. So do the others.

High producing hens are often wedge shape with point in front.

A hen's temperature is 106½; man's 98.5. Don't house them alike.

Hens go broody oftener in dark secluded nests filled with eggs.

The biggest part of the poultry business is in the egg.

Never give hens medicine unless they need it.

Guessing the disease and guessing the remedy bring uncertain results.

The loss from lice and mites is more than their weight in gold.

Half blue ointment and half lard or tallow makes a good louse killer.

If you will let the oranges heat in the oven a few minutes before peeling them you will have no difficulty in removing the indigestible white skin.

TO ELIMINATE WASTEFUL BY-PRODUCT OF CIVILIZATION

The Refining Process is Being Applied to Individuals as Well as to Materials—Instructive Address by Major Robert Yerkes, Chief of the Division of Psychology at Washington—The War Has Taught Mankind the Lesson of Conservation, if Nothing Else.

(New York World.)

"What's it all about?" asked the Ordinary Human at a meeting of the American Institute of Mining Engineers, 29 West 39th Street, yesterday. And after listening to Major Robert M. Yerkes, Chief of the Division of Psychology at Washington, D. C., who spoke at length of "mental tests" and "superior intelligence," the O. H. again paraded his ignorance by inquiring:

"What's it all about?"

For the benefit of those plain, everyday mortals whose chief aim in life is to "bring home the bacon" irrespective of the scientific difficulties involved it may be said that the lessons of the big scrap abroad are about to be applied right here at home. War Department General Order No. 74 requires that mental tests be made upon all recruits. And the Ordinary Human just kind o' wonders where he's going to fit in, for there are ratings all the way from "very superior" to "very inferior."

As for lesson No. 2—the use of cripples in industry—here's what James P. Munroe, Vice Chairman of the Federal Board of Vocational Education, has to say:

"Appalling as has been the loss of life in the last fifty-one months, there is one slight compensation. No longer will there be in the world a cripple, in the old meaning of the term. Men handicapped by wounds or disease there will be, unfortunately, and in numbers beyond what the world has known since the wars of Napoleon, but neither they nor the industries from which they were called off to war will be crippled in the sense in which both would have been had mankind not learned the lesson of conservation and come to understand that the most important field for conservation is not in the forests and mines but in men and women."

Dr. A. J. Lanza of the United States Public Health Service at Washington spoke at length about the prevention

of illness among mine workers.

"Safety first" has become highly specialized and efficient," he said, "but health first, if I may use this term, has not been developed in the same proportion. While many of the larger mining companies maintain first class hospitals, the prevention of sickness among the miners has not kept pace with the prevention of injury. It is just as feasible to distribute posters and other educational matter dealing with the proper care of common colds as it is to impress on the miners the necessity of having the smallest injury promptly attended to by the company doctor. There is need for a closer co-operation between the doctors and the miners in handling the minor ailments when they first appear."

The pressing need of vocational schools in American mining communities was set forth by J. C. Wright, special agent of the Federal Board for Vocational Education. "One-seventh of the eight million people employed in various industries in the United States are illiterate," was the startling statement made by Mr. Wright. "What we want to do is to eliminate this wasteful by-product of civilization. Twenty-five years ago gasoline was a waste product, but today we are refining oil to get gasoline. Even in the manufacture of coke we have learned something; the coal tar by-products of this industry, formerly ignored, have been found to be worth for more than the coke itself. Somewhat tardily, perhaps, the human element is coming into its own. Practically all the States have set up educational and technical standards for the foreman and miner, an every applicant must have a 'certificate of competency'. Thus the refining processes are being applied to individuals as well as to materials."

Ever notice that there is nothing too good for the small boy who has a pretty grown-up sister?

UPSET STOMACH?

From the days of Job to the present Pape's Diapepsin at once ends Dyspepsia, acidity, gas, indigestion.

Your meals hit back! Your stomach is sour, acid, gassy and you feel bloated after eating or you have heavy lumps of indigestion pain or headache but never mind. Here is instant relief.

Don't stay upset! Eat a tablet of Pape's Diapepsin and immediately the indigestion, gases, acidity and all stomach distress ends. Pape's Diapepsin tablets are the surest, quickest stomach relievers in the world. They cost very little at drug stores.

MARYSVILLE HAPPENINGS

Marysville, March. 3.—The rite of baptism was administered to seven candidates at the Olivet Baptist Church last evening by the pastor Rev. E. J. Barrass. The candidates were all residents of Nashwaak.

Mr. J. W. Everett who is employed at Glennie spent the week-end with his family here.

Marysville welcomed home today one of her fighting sons in the person of Pte. James T. Flanagan who went overseas about two years ago. He has seen considerable service in France and was with the army of occupation in Germany. He is a son of Mr. Thomas Flanagan, engineer at the cotton mill.

Messrs N. Godbout, Edward Wade and Chesley Pickard will engage in a rolloff this evening at the Dawson Club Bowling Alleys for the box of cigars donated by Mr. Robert MacPherson to the bowler rolling the highest score during the past two weeks.

The regular monthly meeting of the Town Council will take place tomorrow evening. This will be the last regular meeting of the board before the annual election. As yet little or no interest is being evinced in civic politics, but in all probability some new material will be necessary as certain members of the present council have expressed their intention of not offering for another term.

Getting Back to Normal from disturbing physical conditions is helped wonderfully by including in the dietary a hearty daily ration of Grape:Nuts — a delicious food, rich in energy values including those vital mineral elements so essential to health and vigor.
