

Give Candy Cascarets to a Bilious, Constipated Child

"Mother gives me a candy Cascaret when I am cross, sick and won't play."

TO MOTHERS! Each ten cent box of Cascarets, candy cathartic, contains full directions for dose for children aged one year old and upwards. Nothing else "works" the nasty bile, sour fermentations and constipation poison from the tender little bowels so gently, yet so thoroughly. Even cross, feverish, bilious children gladly take Cascarets without being coaxed. Cascarets taste just like candy. Cascarets never gripe the little bowels, never sicken, never injure, but above all, they never disappoint the worried mother.

BRITISH BOMBING PLANES BEAT GERMANS OUT OF THEIR TRIUMPH

Added Accuracy of Aim to Weight of Bomb and Outplayed the Huns in Every Change of Tactics—British Clung Strictly to Military Line of Warfare, While Teutons Bombed Open British Towns and Cities With Zeppelins.

Edward Price Bell, in cable correspondence to the Chicago News makes note as follows:

Great was the shock to the Entente's hopes when the Germans' huge howitzers demolished the forts in Belgium and the north of France in the early days of the war. Many fancied that civilization would fall before these unprecedented guns, for clearly no built up fortifications could stand against them. Immediately, however, the defence, instead of raising walls, lowered itself into the earth. Then Germany's howitzers became only exceptionally heavy pieces of French artillery, and intrenched lines stood between them and the objectives their commanders and crews yearned to destroy. Even such open warfare as occurred swayed back and forth too quickly for the slow moving heavies and they could not be brought within range of the new fortresses.

French invention flanked the situation, so to speak. In other words the heavy bombing airplane entered, proving itself to be neither more nor less than an intensely mobile howitzer. Germany's big gun makers had been robbed of their expected triumph. The Germans used Zeppelins and bombed open English and Scottish towns.

Finally the British airplane or hawk mastered the German Zeppelin or buzzard and then the Gothas took up the work of bombing open British towns. England made heavier bombs than Germany and kept sharply to the line of military attack. Handley Page Machines dropped bombs weighing 550 pounds, guided by the last word in scientific bomb signs, equalling the Hun howitzers in weight of fire and beating them in accuracy of aim. Wise nations will take due note.

CANADA'S FISHERIES MAY BE THE LARGEST IN THE WORLD

Figures Issued by Bureau of Statistics Show Only Those of Norway or United Kingdom Can Claim Equal Supremacy—Fisheries of Bay of Fundy and Gulf of St. Lawrence Very Important—Halibut and Salmon the Chief Product of the Areas on the Pacific Coast.

The Fisheries Statistics, Part Three, of the Census of Industry, 1917, prepared by the Dominion Bureau of Statistics in collaboration with the Dominion and Provincial Departments contains the following note on Canadian fisheries:

Canada possesses perhaps the most extensive fisheries in the world, those of Norway and of the United Kingdom alone disputing the supremacy, whether for the excellence or the abundance and variety of their product. The fertility of Canadian waters is indicated by the fact that the entire catch of salmon, lobsters, herring, mackerel and sardines, nearly all the haddock and many of the cod, hake and pollock landed are taken within ten or twelve miles from shore.

Some Huge Areas.

The coast line of the Atlantic provinces from Grand Manan to Labrador, not including the lesser bays and indentations, measures over 5,000 miles, while the sea areas to which this forms the natural basin embrace the Bay of Fundy, 8,000 square miles in extent, the Gulf of St. Lawrence, fully ten times that size, and other ocean waters aggregating not less than 200,000 square miles, or over four-fifths of the fishing grounds of the North Atlantic. In addition there are 15,000 square miles of inshore waters, entirely controlled by the Dominion. Large as are these areas, they represent only a part of the fishing grounds of Canada.

Hudson Bay, with a shore 6,000 miles in length, is greater than the Mediterranean; the Pacific coast of the Dominion measures over 7,000 miles long, and is exceptionally well sheltered for fishermen; while throughout the interior of Canada is a series of lakes which altogether cover 220,000 square miles, or more than half the fresh water of the globe, Canada's share of the great lakes of the St. Lawrence Basin alone amounting to 72,700 square miles.

Deep Sea and Inshore Fisheries.

Of even greater importance is the abundance and general excellence of the product. The cod and the salmon have long disputed the primacy among these, though in recent years the heavy pack and the high price of lobsters has sometimes sent cod to third place.

The fisheries of the Atlantic coast may be divided into two distinct classes: the deep-sea and the inshore or coastal fisheries. Deep-sea fishing is pursued in vessels of from 40 to 100 tons, carrying crews of from twelve to twenty men. The method is that of trawling by hook and line. The bait used is chiefly herring, squid and capelin, and the fish taken are principally cod, haddock, hake, pollock, and halibut. The coastal fishery is carried on in small boats, usually motor-driven, with crews of from two to three men, and in a class of small vessels with crews of from four to seven men.

Trawling, Traps and Nets.

The means of capture employed by boat fishermen are gill nets and hooks and lines, both hand lines and trawls, while from the shore are operated trap nets, haul seines, and weirs. The commercial food fishes taken inshore are the cod, hake, haddock, pollock, halibut, herring, mackerel, alewife, shad, smelt, flounder and sardine. The most extensive lobster fishery in the world is carried on along the whole of the eastern shore of Canada, while excellent oyster beds exist in many

SPECIAL SALE

Starting Saturday, February 15 and Ending Saturday, February 22.

MACKINAWs, both lined and unlined; all sizes different styles.

MEN'S FUR COATS in Raccoon, Wombat, Dog and China Beaver.

MEN'S FUR LINED COATS.

LADIES' FUR COATS in Muskrat, Marmot, Muscova Pony, Dog, etc.

LADIES' NECK FURS in Red Fox, Natural and Black Wolf, etc.

Special price on all above goods.

J. Clark & Son Ltd.

Specials Just Landed

Ladies' Low Heel Rubbers
83 cts a pair.

The Shoe House of Bargains - Regent St.

Shepherd & Haining

Shoe Repairing of all kinds

YOU NEED GOOD BREAD

But You Do Not Have to Knead It With Your Hands If You Use a

Universal Bread Maker

It reduces the drudgery of bread-making to three minutes' work. No skill or experience is necessary. Anyone can make good bread by the Universal method with any kind of flour. 4 and 8 Loaf sizes.

LAWLOR & CAIN

During January and February this Store will not be open on Saturday Evenings.

MIXED HEN FEED

Comprising Whole Corn, Whole Barley, Whole

Buckwheat, and Oats.

One of the best Scratch Feeds on the Market.

Only \$3.65 a Bag.

G. W. HODGE

parts of the St. Lawrence, notably off Prince Edward Island.

The salmon fishery is the predominant one on the Pacific coast, but a very extensive halibut industry is carried on in the northern waters of British Columbia in large well equipped steamers and other vessels. The method of capture is by trawling, dories being used for setting and hauling the lines, as in the Atlantic deep sea fishery.

"THE WAR IS OVER."

Mr. Dooley—"Th' part that ye see in th' pitcher papers is over, but th' tax collector will continuyoo his part in th' war with relenlis fury. Cav'ly charges is not the on'y wans in a rale war.

IMMORTAL PHRASE.

Creditors and brides and grooms Share together in the thrill Caused by these immortal words: "I will."

Whatever became of the old-fashioned woman who conceded a latch-key as part of her husband's dowry. Bless her!

NOT DISCOURAGED.

You can't keep down the humor of the Yankee soldier, says Stars and Stripes. "After all," said one buck private, who had left his leg in the Argonne fosret, "there's a big advantage in a wooden leg. I can hold my sock up with a tack."

When father wants to occupy his "den," he thinks he would enjoy it better if he could throw seven or eight soft pillows into the hall. To the detached philosophical mind, the problem of putting the returned soldier back in his job without displacing a woman offers no difficulties. The solution is to have the returned soldier marry the lady.

War-Savings Stamps

A Nation of Bond-holders

Before the War, Canada looked outside her borders for Capital. During the last three and a half years, Canada has become a nation of Capitalists,—for the man who buys a \$50 Victory Bond, or a \$5 War-Savings Stamp, is a Capitalist of the best type.

By the discovery of ten times the number of Capitalists, or Bond-holders, that she previously had, Canada has made a great stride forward. Interest charges, necessarily high at this time, do not withdraw money from the country. Home industry is fostered, and the problem of the War Burden is solved.

EVERY CANADIAN SHOULD BE A CAPITALIST. The opportunity is provided by the offer of War-Savings Stamps at \$4.01 this month, and redeemed for \$5.00 on the first day of 1924.

Buy War-Savings Stamps, as many as you can, as often as you can, at Money-Order Post Offices, Banks and other places displaying the Beaver—Triangle sign.

Increase Your Holding of Bonds All the Time.

\$5.00 for \$4.01

and each dollar worth more.
