THE CENTAUR COMPANY, NEW YORK CITY.

OF INTEREST TO WOMEN

WASHING WOOLENS.

Definite rules may be formed which, if followed, will make silk and wool washing more successful. Here are a good set:

Use water about the temperature of the hand—98 to 100 degrees Fahrenheit.

Use a fine, white soap, by making it into suds with the wash water.

Use no alkalies other than a few drops of ammonia or a little borax dissolved.

Wash by not rubbing, but by pressing and squeezing in the soap suds.

Do not boil.

Dry in the same temperature in which it was washed, and preferably out of the direct rays of the sun.

Having made these rules, the next step is how to follow them. Prepare a suds by using one cake of some white soap that would be used for washing the hands. Heat gently in two quarts of water. This soap solution had better not be boiled, as boiling it would cause it to darken, making it more or less unfit for white wools and silks.

This suds may be added to water which is just a trifle warmer than the hand, and enough soap should be used to make the lather hold. The wash water should be changed until the last suds is quite clean, but remember that the point in washing these fabrics, especially the woolens, is that there be no change of temperature.

Always prepare the tub of water before putting in the garment. Very soiled spots may be specially cleaned by applying some of the soap solution with the palm of the hand.

Woolens should be dried with the thought of drying to shape.

HOUSEHOLD CHAT.

Cement made of plaster of Paris and white of an egg will mend porcelain.

To clean black silk and cashmere from dust and shine, take a soft jannel (silk) in black coffee and rub the soiled parts.

Brush and air every article that is to be put away for the summer, then wrap every article up in newspaper, scatter a few whole cloves among the things, wrap up well, or better still, paste the edges securely.

Mice detest the odor of camphor and when the mice get too wise for the traps just put a piece or two of gum camphor about the places they come and by renewing once in five or six weeks your troubles will be over.

After cleaning brass thoroughly, slightly moisten a cloth with sweet oil and rub the brass well. It's especially good in damp weather.

Sawdust and chamois leather used as polish after cut glass has been washed in soap and suds, will make it glisten and sparkle.

Keep a piece of fine sandpaper in the kitchen, and if your bread or cake burns the scorched part may be easily rubbed off and have a smooth surface.

Buttons will be the chief trimming for linen dresses.

Pin tucks form a dainty and satisfactory trimming.

Cured of Dyspepsia

BY USING

Burdock Blood Bitters.

The symptoms of dyspepsia are so numerous and diversified in different individuals that probably no description could exactly represent them as they occur in any given case, but a few of the most prominent are a rising and souring of food, pain, flatulence and distention of the abdomen, a sensation of discomfort after every meal, which is sometimes followed by sickness and vomiting.

To get rid of dyspepsia a careful arrangement of the diet is necessary and due time must be given for the digestion of the meal.

You will find that Burdock Blood Bitters will help with this digestion. It does this by toning up the stomach in such a way that dyspepsia soon disappears.

Mr. Robt. Baldwin, Winnifred, Alta., writes:—"I cannot speak too highly of Burdock Blood Bitters for curing dyspepsia, of which I have been a sufferer for years. I have tried a good many doctors and proprietary medicines, so one day I thought I would try something different. I got a bottle of B. B. B. from our local store as it was about the only remedy he kept, and I can certainly say that I was more than pleased with the results as I got better right away. I will always recommend it to other sufferers."

Burdock Blood Bitters is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Only Cot Cases

Hitherto all troops from the hospital ships have had to proceed through Fredericton, not being allowed to go direct to their homes. This has been changed and henceforth only the cot cases will have to go through to Fredericton. The hospital ship Araguaya will be met at Portland by the Medical officer of the military hospital at Fredericton, and the secretary of the Returned Soldiers' Commission.

BRIEF BUT USEFUL RECIPES.

Restore Gilt Frames.—Rub with a sponge moistened with turpentine.

Drive Away Ants.—A little quick lime placed in the infested places.

Remove Tar from Cloth.—Rub it well with turpentine till every trace is removed.

Make Leather Waterproof.—Saturate it with castor oil; to stop shoes squaking, drive a peg into the middle of the sole.

Clean the Hair.—Wash well with a mixture of soft water, 1 pint; sal soda 1 ounce; cream tartar ¼ ounce.

Egg Stains on Spoons.—Rub with common salt.

Clean Gloves.—Pour a little benzine into a basin and wash the gloves in it, rubbing and squeezing them until clean. If much soiled, they must be washed again through clean benzine and rinsed in a fresh supply. Hang in the air to dry.

Clean Hair Brushes.—Dissolve a little soda in warm water and pour in a small amount of ammonia. Hold the brushes with the bristles downward and avoid wetting the back as far as possible; shake until the grease is removed; then rinse in cold water and put in the air to dry.

Remove Mildew from Cloth.—Put a teaspoonful of chloride of lime into a quart of water, strain it twice, then dip the mildewed places in this weak solution and lay in the sun. If not effective the first time repeat.

How to Remove a Rusty Screw.—Apply a red hot iron to the head for a short time, the screw-driver being applied immediately while the screw is hot.

Cure Mosquito Bites.—Put ten drops of refined carbolic acid into an ounce of rose water; shake well and apply. (If you hold your breath while a mosquito has its bill in you it cannot withdraw it until you breathe again).

THE PRINCE OF WALES SPEAKS AT BANQUET

London, May 27.—Speaking at a luncheon given to General Currie, officer commanding the Canadian Expeditionary Force, by the Canada club, the Prince of Wales, responding to the toast of the Royal Family, said:

"In the name of the younger generation of England, I wish Sir Arthur Currie and other ranks in the Canadian forces the very best of luck—I was almost going to say 'good-bye' But good-bye would have been a most inappropriate term because I am very glad to tell you that I am coming to Canada very soon—I hope in less than three months time. Naturally the prospect of this visit to the great Do-

minion would have delighted me in any circumstances, but now I shall enjoy it all the more because I shall look forward to the pleasure of meeting old friends again, and, I hope, of making a lot of new friends as well."

The dinner was attended by Prince Arthur of Connaught, General Birdwood, General Byng, Sir Edward Carson, General Farmer, General Horne, Lord Norris, General Rawlinson and Generals Turner, Watson, MacDonald and Burstall.

Wood's Phospholine.

The Great English Remedy. Tones and invigorates the whole nervous system, makes new blood in old veins, cures nervous debility, mental and brain worry, loss of energy, loss of memory, palpitation of the heart, falling memory.
