PRESIDENT CAMPBELL'S ADDRESS TO FREDERICTON BOARD OF TRADE AT ANNUAL MEETING WEDNESDAY

**Recommends That Legislation be Secured to Reduce Area of
City in Order That Area of Suburban Roads be Lessened—
Strongly Supports Street Paving Proposition—Exhibition
for 1919 Urged—Board Membership Greatly Reduced.**

The annual address of President H. S. Campbell of the Fredericton Board of Trade at the annual meeting of that body last night was as follows:

To the Members of the Fredericton Board of Trade:

Gentlemen:—
In submitting my report of the work of this Board for the year which has just closed, I do so with much greater pleasure from the fact that after four and one half years of bitter struggle, a glorious victory has been vouchsafed to Great Britain and her Allies; hostilities have ceased and we can look forward with hope and satisfaction to the early consummation of a just and lasting peace.

Reduced Membership

Many institutions have suffered during the period of the war, and our Board has not escaped, our membership having shrunk from 203 in 1914 to barely 60 at the present time.

This may not be wholly the result of the war, but a city such as Fredericton should have a much larger Board of Trade membership; and as reconstruction and reorganization are now the watchwords, I trust that some effort may be made to increase both membership and interest.

Business Conditions

Business conditions during the past year have been generally good, and the citizens have been prosperous, as indicated by the phenomenal success of the 1918 Victory Loan.

Manufacturers have in some instances been handicapped by a lack of help, the volume of business among retailers is generally reported as the greatest on record.

Early in the year the Board took up with the Canadian Government Railways, the desirability of protecting the public at the railway crossings on George and Charlotte Streets. After an interview with the General Manager, the matter was attended to, and warning signals have been installed and are now in operation.

In conjunction with the city council the Board opposed before the Public Utilities Commission, the application of the New Brunswick Telephone Company for permission to change the

hour of their night rates from six to eleven o'clock.

The Board of Utilities has recently fixed the hour at 8.30.

Paving Question

A committee of this Board acting with a committee of the City Council interviewed the Hon. Mr. Veniot asking that the province make a grant toward the upkeep of the city streets. While the Minister would not admit the principle, he expressed himself as favorable to aiding in the construction of good streets and sidewalks, fronting on government property. I would suggest that this matter be followed up.

To Reduce City Area

I would like to point out that when the city was incorporated its boundaries were not changed from those of the parish of Fredericton and thus we have several miles of roads leading into the city, passing through territory from which the city receives little or no revenue, but for which roads, the city is responsible as to construction and upkeep. I trust that this Board will approach the City Council asking that legislation be secured, whereby the area of the city may be reduced to proportions more in keeping with its probable growth.

As no Exhibition has been held in Fredericton for several years, I trust that 1919 will not pass without the holding of a show, as the exhibition always brings large business to the city, as well as many visitors.

Railway Matters

The matter of making Fredericton a divisional point on the Saint John Valley Railway, the building of a new railway bridge and the diverting of traffic from The Transcontinental to St. John via Fredericton, as well as the building of a new Union Station were fully laid before the Canadian National Railway Board when they were in this city last month.

This is now being put into concrete form and will be forwarded to the Railway Board in the form of a joint letter from the City and Board of Trade.

The development of the water powers along the Saint John River is most important to this city, and should be strongly advocated by this board.

Maritime Branch C. M. A.

I had the pleasure of attending a meeting of the Maritime Branch of the Canadian Manufacturers Association in Amherst on December 11th at which a number of very instructive addresses were delivered. Particular mention should be made of the address of Sir John Willison on National Reconstruction. A number of resolutions were passed at that meeting which will no doubt be submitted to you in due course.

With the termination of the work of the Patriotic Committee it will be necessary to make other arrangements with the secretary, who, on account of the work done in connection with administration of the Patriotic Fund, has been in receipt of merely a nominal salary from this board.

In conclusion, I wish to thank the board for the kindness and consideration shown to me during the past year, and although perhaps a little late, to extend to them my best wishes for a prosperous 1919.

H. S. CAMPBELL,
President of Fredericton Board of
Trade, Jan. 22, 1919.

Women who have beauty don't need sense in order to get husbands—that is, certain kinds of husbands.

To a widower, getting married is a matter of precedent—to a bachelor, a matter of accident.

A girl is always proud of her hat until she meets another girl with one that is more freakish.

It is surprising how near a young widow can come to proposing to a man without actually doing so.

TALKED BY TELEPHONE WITH FLYING AIRSHIP

Demonstration of War Invention in New York on Anniversary of Franklin's Birth.

New York, Jan. 22.—New York saw for the first time, this week, one of the most ingenious of the war's inventions, when an exhibition of the wireless telephone was given on top of the Equitable building.

The performance, which was under the supervision of the navy, was given in behalf of the War Savings Stamps campaign. The day chosen for the exhibition was the 213th anniversary of the birth of Benjamin Franklin, who was not only the first man to harness the lightning, but was the author of epigrams on saving which resulted in his picture being placed on all the savings stamps.

The naval dirigible A 242, under the command of Ensign John Bentridge, and several airplanes, circled over the lower city for an hour, communicating without difficulty with the throng on the Equitable building.

James S. Alexander, president of the National Bank of Commerce, was the first to speak. When Ensign M. B. Sulzberger, in charge of the radio instruments, had strung his double wire and arranged his boxes, Mr. Alexander readily got into communication with Ensign Bark, on the dirigible.

"Hello, hello."

"Where are you now?" asked Mr. Alexander.

Out of the mist that clouded the sky, the answer came: "We are trying to locate you on the roof of the Equitable."

When the airship came into view, Mr. Alexander told the aviator to circle the Woolworth tower, which was done while the watchers cheered. He then unclamped the receiver from his head and changed places with Maj. General David Shanks.

Other interested persons and officials were present to observe the test of talking with a flying airship.

NEGLECTED COLDS Lead to Consumption.

Unless a complete cure is effected the inflammation passes rapidly to the throat bronchial tubes, and then to the lungs.

You can't make new lungs any more than you can make new fingers or a new nose—hence consumption is practically incurable.

But Catarrh can be cured, except in its final and always fatal stage.

CATARRHOZONE

Guaranteed to Cure.

The purest balsams and the greatest antiseptics are sent to every spot where catarrhal trouble exists—germs are killed, foul secretions are destroyed, nature is given a chance and cure comes quickly.

Colds and throat troubles can't last if the pure healing vapor of Catarrhozone is breathed—sneezing and coughing cease at once, because irritation is removed.

Use Catarrhozone to prevent—use it to cure your winter ills—it's pleasant, safe, and guaranteed in every case.

Two months' treatment, large size, guaranteed to cure, price \$1; small size, 50c; sample size, 25c; sold everywhere.

THE SALVATION ARMY IS
mHERE.

(Guy F. Lee in Chicago Tribune.)

We used to look on with a tolerant air
As they marched up the street with
their band;

The tambourine, drum, and the shaky
cornet

Brought smiles more than pennies
to hand;

But they fed the poor bum and the
child from the slum,

And took light to the darkest vice
lair,

And wherever discouraged ones needed
a lift

The Salvation Army was there.

Over there where hell's playing its
dirge they have built,

Huts close to the trenches and fire
And they're passing out cheer, for a
dime or a grin,

To men clothed in misery and mire
Handing coffee and pie and renewed
hope and vim

To Liberty's sons as they dare
Their lives for our cause—most un-
selfishly brave—

The Salvation Army is there.

These soldiers whose weapons are
Java and cakes,

And whose foes are discomfort and
blight,

Have won the undying affection of all
Their kahki-clad brothers in Right.

They never consider themselves, and
they live

The spirit of care, share and spare.
So I'm proud to remark that in peace
or in war

The Salvation Army is there!

WANTED

BOY WANTED—Smart boy wanted to learn the Printing business and make himself generally useful, apply at this office.

WANTED—Books and magazines for distribution to returned soldiers en route home, in the Military Hospitals or going overseas. Telephone Mr. A. Murray, care of A. Murray & Co. Tel. No. 159, or leave at store for Military Y. M. C. A.
