

# Provincial Road Ends Here

THIS IS THE SIGNIFICANT SIGN the traveller reads on entering more than one New Brunswick Municipality. The sign might have read in all truth "The Good Road Built by the Foster Government Ends Here." Good roads open up new vistas of enjoyment and fresh avenues of opportunity to all those living in rural communities. The growth and development of the Province of New Brunswick has in the past been retarded more than anything else by the lack of any aggressive road building policy. Not until the Foster Government came into power and Hon. P. J. Veniot became Minister of Public Works was there any serious effort made to put road building on a scientific basis and to carry out such comprehensive plans in a business-like way.

Gradually, step by step, the work goes on, and in good time all the main and branch roads of the Province will be properly built and cared for. The difference between the work done by the Foster Government and the Remnants of the work done by the Murray-Baxter Government is the difference between **ROADS** and **NO ROADS**.

## NOTE THE FOLLOWING FIGURES

**THESE FIGURES ARE CONVINCING.** To particularize: In Kings County for example, the total expenditure of the Old Government on all roads and ordinary bridges amounted to during 1914-15-16, \$74,517.78. The Foster Government has spent \$256,088.37 on the same services during the last three years, and the people are getting results. **THE MONEY IS GOING INTO THE ROADS AND BRIDGES** instead of into the hands of political favorites.

In St. John County the Murray-Baxter road expenditure during 1914-15-16 as \$38,298 and a good proportion of this was for earth filling on the Marsh Road which was absolutely wasted. The Foster Government expenditure for the last three years on St. John County Roads amounted to \$131,454, this not including the work on the St. John-Rochesay Federally aided highway.

**THE FOSTER GOVERNMENT MEANS BUSINESS WITH THE HIGHWAYS**, as it means business with all other departments. The abandoned farm problem will pass if the settlers in remote districts have any means of transportation to markets and to communication with the outside world. There are 1,344 "ready-made" farms now unoccupied, offered for sale in New Brunswick. The Foster Government policy will populate these farms and keep the young men there.

William Hawker, the veteran druggist, of St. John, speaking recently at the Retail Merchants' Convention at St. Stephen, said: "It is heart-breaking to see the many fine farms which were hewn out of the forest with so much sweat of the brow and honest toil by our forbears, now idle and abandoned, with the houses falling into ruin. There must be something wrong with the Governmental policy which permits such a thing."

## The Foster Government Does Not Intend To Permit "Such a Thing" In Future, Read What Premier Foster in his Manifest Says.

In 1914, 1915 and 1916 the Old Government spent:

On All Roads	\$315,849.31
On Ordinary Bridges	490,548.37

\$1,006,397.68

In 1918, 1919 and 1920 (to date) the Present Government spent:

On Ordinary Roads (from Ordinary Revenue)	\$657,679.77
On Ordinary Roads Auto Fund	700,000.00
On Main Trunk Roads	1,495,636.12
On Ordinary Bridges	799,608.55

\$3,652,923.44

Or \$2,646,525.76 more on all classes of Roads and Ordinary Bridges than during the last three years of the former Government.

To Continue Our Policy for the Improvement of all Roads of the Province, Back Roads As Well As Front, Farmers' Farmers Roads as well as those for use of Automobiles, giving an equal policy of fair play to everybody, no matter where they live.

## VOTE FOR THE FOSTER GOVERNMENT CANDIDATES

DICKSON, WATSON, COBURN, CHRISTIE

### THE OPPOSITION FACING DEFEAT

St. John Globe, Ind.)  
Nomination day finds the government with tickets in every constituency, while the opposition, facing the certainty of a disastrous and overwhelming defeat has sought cover behind various farmer combinations. The value of these alliances is yet to be demonstrated. It is hardly likely that they can achieve even a small measure of success, so plainly manifest is the public indignation at the recollections of past misgovernment, so plainly manifest is the public desire to give the Foster Government opportunity to carry out its progressive hydro development and other constructive programmes.

### SOME POINTS ON PUBLIC HEALTH

#### Some Reports by the United States Health Bureau With Annotations.

400,000 less deaths occurred in 1917 than would have, had 1900 death-rate prevailed (this reduction was not exceptional for 1917, but gradual, year by year from 1900, nor was the 1900 death-rate exceptional as compared with former years). This reduction beyond all doubt, was effected by better Public Health Administration.

The illness of workers still costs the people of the United States 2,000,000,000 yearly. (This cost was more than double this amount twenty years ago).

One man in three called by the army was found to be physically unfit (this proportion was about the same in Canada.)

In 1900 the death rate in the United States was 17.8, per 1000. In 1917 it was 14.2 (In Canadian provinces and cities where effective public health administration has been in force for some time, a similar, and, in many cases a greater reduction has been made.)

In 1900, Typhoid Fever caused the death rate of 33.8 for 100,000 people. In 1917 this had been reduced to 13.4 (In many parts of Canada, where good Public Health conditions prevailed, and in St. John and Moncton, in New Brunswick a similar or better reduction has been made within fifteen years or so.)

Tuberculosis declined from a rate of 190.5 deaths per 100,000 in 1900 to 146.4 in 1917 in the United States (without doubt, a likely reduction is possible in New Brunswick.)

Diphtheria was reduced in the United States from 25.4 for 100,000 in 1900 to 16.5 in 1917. (Under careful management a greater reduction than this has been made in St. John since 1900. These reductions are in no way due to Diphtheria Antitoxin, as it was in almost universal use a good while prior to 1900.)

Present (1920) death-rate from all causes in New Brunswick estimated on present year's returns (so far) about 17.0 per 1,000. It is quite possible, under present health regulations to reduce this in a few years to 14.0 per 1,000, thus saving 1,200 lives per year. Estimated value of life in dollars 3,000. Total saving in dollars, 3,600,000. Infantile Mortality (under 1 year) estimated for Province 120 per 1,000 births, per year. This by improved public health conditions has been reduced from 150 in St. John some years ago, to 93 and 76 respectively, for St. John and Moncton in 1919, under improved Public Health management. No doubt that a good reduction may be made throughout the Province, by like management.

### SEED TREATED BY ELECTRICITY

By London Daily Mail and S. A. N. S.  
London, October 3—An experiment in methods of electrifying seeds for the purpose of stimulating growth and making them proof against many plant disorders has been tried during this harvest by Captain Dashwood at Manor Farm, Dunstow Oxfordshire. Captain Dashwood has sown with electrified and ordinary seeds. Corn grown from seed which had been electrified is much longer, with thicker stem and apparently much stronger.

"In the majority of cases," said Captain Dashwood, "the heads of treated seeds are much longer. In the early days, seed after being steeped in a tank and subjected to an electrical current, was dried over an open fire. Undoubtedly many poor results in those the seeds. It has now been found unnecessary to dry the seed over a fire and results have been much better. The process greatly increase the yield and provides better seed for future planting. It reduces risk of wireworm and fungoid diseases—all at a cost of a few shillings an acre."

## What Would You Do?

Ten-to-one, you too would use Zam-Buk! Everyday mishaps by the score, and most forms of skin and scalp disease are "doctored" quickly and efficiently at home by this highly concentrated herbal balm. Zam-Buk's rapid antiseptic healing and wonderful soothing and pain-killing power has been a world revelation. Here's evidence from Canadian homes.

**SCALDED FOOT.** Mrs. Smart, 279, Harrison Avenue, Elmwood, Winnipeg, writes:— "A pan of boiling water upset over my foot. The flesh was scalded, dried raw and badly blistered, when my husband applied Zam-Buk. It soothed the inflamed surface splendidly and more Zam-Buk brought perfect healing."

**GASHED HAND.** Mr. Anson, 145, Bayview, Oak. Sask. writes:— "I gashed my hand severely on the saw. The wound was painfully sore and festered until I treated it with Zam-Buk. This grand herbal healer worked a complete cure. I knew nothing to compare with Zam-Buk."

**CHILDREN'S ECZEMA.** Mr. W. D. Love, 33, Road Street, Cent. Falls, U.S.A., writes:— "My children had a bad eczema on the face and scalp. We paid out dollars to the doctors before we used Zam-Buk. The first application soothed away the itching irritation. Continued treatment banished every trace of disease."

**TOIN FINCH.** Mrs. J. Randall, of Silver Stream, Sask. writes:— "My daughter tore the top of her finger in the washing machine. As we are eight miles from the doctor, I applied a dressing of Zam-Buk. The wound never caused the least trouble afterwards, and healed perfectly."

**FESTERED FOOT.** Mr. D. J. Shaw, Belfast, P.O. P.E.I., writes:— "I had a nasty festered sore through a boot-nail piercing my foot. I tried different liniments, but the foot remained badly swollen and inflamed until I used Zam-Buk. This wonderful balm effected a speedy and complete cure."

All dealers, 50c. One cent stamp (for return postage) brings FREE TRIAL SAMPLE from Zam-Buk Co., Toronto.

# Zam-Buk

## A WEEKLY AIR SERVICE

Warsaw, Oct. 4—A weekly air service, for passengers and freight has been opened between Warsaw and Paris. The first machine left Warsaw and reached Prague in 3 hours. Strassbourg in six hours and Paris in nine hours.
