

AND WHERE IS THAT?

Mr. Creager did not escape entirely. He was hit on the contrary—Colorado Springs paper.

Lima Beane says the chances are 10 to 1 that your reflection in a store window flatters you.

ONLY LOVE WANTED.

For rent—Elegantly furnished high class apartment, six charming rooms, grand piano, luxurious porch and exclusive outlook.—Adv. in Chicago Tribune.

MAY OPPOSE
HON. MR. DRURY
IN BY-ELECTION

Toronto, Jan. 24.—Whether or not Premier Drury will be opposed in the by-election in Halton county is uncertain. The action of the member-elect, John F. Ford, in resigning to make way for the Prime Minister as not met with the unanimous approval of the electorate, it is said, and the Liberal Association of the riding has called a meeting for this afternoon to decide whether or not to nominate a standard bearer to contest the riding with the Premier.

THE VALLEY RAILWAY AND
FARM DEVELOPMENTS

How the Services Offered by the New Railway Might be Realized by the Tillers of the Soil—An Interesting Paper Prepared by Mr. O. C. Hicks of the Provincial Department of Agriculture.

(By O. C. Hicks)

How can the Valley Railway serve the citizens and the farmer by contributing to the daily food supply? How can a daily express service offered on this railway be used by the farmer along the line? From Centreville to Westfield lies a thriving district of orchard, small fruit, and general farms. Now is the time for those farmers to adjust their farm management to meet a new marketing condition.

Mr. L. H. Bailey, once president of Cornell University said that the requirements of a good farmer were at least four:

The ability to make a full and comfortable living from the land; to rear a family carefully and well; to be of good service to the community; to leave the farm more productive than it was when he took it.

Some Requirements

The subject for discussion concerns the first and fourth requirements, viz. Making a good living and at the same time increasing the capacity of the farm for growing food supplies.

The attainment of these two problems mark the successful farm. To succeed in these two features the farmer must do things. He must be a live-wire in the farming business.

There is a difference between the successful farm and the successful farmer, for a financially successful farm may be operated by a man who fails to educate his family and who may even waste his income. There are examples of men in every community who makes a success of their farm management, due not to exceptional opportunity but to personal energy and initiative.

Meet New Conditions

The successful farmer makes changes in his farm management to meet new conditions of markets, or labor, or adopts newly invented machines and newly devised methods of doing work. The District of Greenwich has a new marketing system offered by the Valley Railroad. To what extent will it create changes in farming practices? Old habits are hard to overcome, and too frequently when new conditions arise for the marketing of produce there system of crop growing to meet new marketing conditions.

Every person should not grow the same specialty even in a region of small farms. There must be a diversity. By each person there are such things to be considered as: prices of the product; the condition of roads and distance from station; freight rates, and also the amount of capital available.

Market and Profits

The profits to be made in an enterprise may be judged from the profits made by local growers and again the probability of your sharing equally may be gathered from a consideration of the following matters: (1) If many or few persons are producing the crop how will the extent of production influence the market?

INFLAMMATORY
RHEUMATISM
CURED BY B. B. B.

Rheumatism is a constitutional disease, caused by the uric acid in the blood. It manifests itself by pain and lameness attacking the muscles and joints of the body, which often swell and become hot and inflamed.

Anyone who has suffered month after month, and perhaps year after year, with rheumatism, and who has tried remedy after remedy in the hope of relief, and with success, should not give up hope.

Burdock Blood Bitters, by invigorating the digestive organs and eliminating the uric acid from the system will give prompt and permanent relief.

Mrs. D. Barry, Purlbrook, Ont., writes: "I feel it my duty to let you know of the great benefit my husband derived from using your Burdock Blood Bitters. He had been suffering for the past two years with inflammatory rheumatism. He tried many medicines but got no better. A friend advised him to take B. B. B. He did so. After taking five bottles he felt like a new man, and was able to go to work the same as ever."

Burdock Blood Bitters has been on the market for over 40 years. Manufactured only by The J. Milburn Co., Limited, Toronto, Ont.

(2) Location: produce must be marketed in fresh condition.

(3) Combines or dealers—are local farmers in any way organized?

(4) Cost of Equipment.

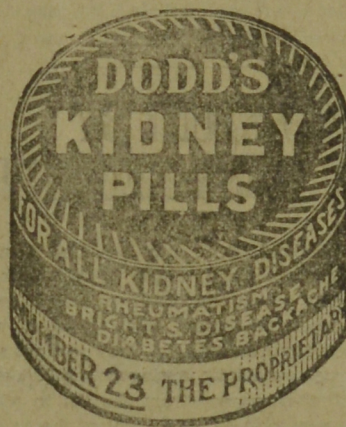

(5) The effect of your enterprise on the fertility of your farm.

Orchards, small fruit and vegetable farms require heavy fertilization, and, as the income is proportionate to the extent of the acreage under crop large amounts of fertilizers are required. Many farmers keep stock that do not return market prices of feeds because of the effects of the manure upon the future crop yield. Farm practice then to accomplish the requirements of our test means more land under cultivation and bigger crops. Bring as much of the farm under rotation as possible. Waste parts of the farm should be cleaned up, stone-piles removed, ditches dug to remove standing water or
