

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nineteen years and now made in Canada. Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost but a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer". Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mono-acetic acid ester of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

TO TEST THE SAFETY PLANE

Special to Daily Mail. Copyright 1920 by Cross Atlantic News Service Paris, Oct. 29 (by Mail)—Messrs. Morane and Saulnier, Airplane manufacturers, announce their intention of experimenting at Villacoublay, near Paris, with an airplane, which will start, fly, and land with locked controls.

"An airplane," M. Morane says "is made to fly, and should always fly

level and come down normally without any use of the control which should be for directing the machine's course only."

"The object of the experiments will be to show that in case of accident to the pilot in the air the machine can always land safely if it is over an aerodrome or level ground, and if the pilot has time to cut off the engine."

Nothing looks so unhappy as a man waiting for his change in a dry goods store.

Still, eggs will have to fall a long way in price before the poor man notices the difference.

PROVINCE OF NEW BRUNSWICK AT THE PARTING OF THE WAYS

The Foster Government Has Shown Faith in the Future of the Province, Says Montreal Financial Paper—The Policy of Hydro Development—Premier Foster Prepared to Stand or Fall by His Programme.

The following article which appeared in the Financial Times of Montreal is of special interest at this time when the province of New Brunswick is called upon to make decision which must have a marked effect upon its future.

"The announcement of Premier Foster that the Government will proceed with its hydro-electric programme has caused a good deal of interest. The Government's existence depends on the farmers, and during the election many of the farmers' candidates roundly condemned the Government's hydro-electric policy. This puts the since it must borrow money to carry on hydro-electric development, and there is no telling what the attitude of the farmers' representatives may be when the Government faces the Legislature.

"Mr. Foster is evidently prepared to stand or fall by the programme he put before the electors, but whether he has yet received assurances of sufficient farmer support to carry on the Government is not a matter of general knowledge.

"The farmers went into the elections without a developed policy on many matters of first importance for the welfare of the province and contented themselves with negative criticism.

"Some of them professed to see in the Government's hydro-electric programme a scheme to help the big interests exploit the sapling forests of the province. But with the knowledge that they hold the face of the Government in their hands they may develop a better feeling towards the program and to policies for the advancement of the general interests of the province.

"New Brunswick appears to be at the parting of the ways. For a few years a business man's government has been running its affairs and a new spirit of progress has spread over many communities. The Government has shown faith in the future of the province and embarked on projects designed to lay the foundations of a considerable industrial development. It recognized that under present conditions private enterprise was not keen to embark upon hydro-electric development so it determined to go ahead of its own account or offer encouragement to private companies willing to proceed with well defined plans. Some such programme is evidently necessary to assure the industrial development of the province of the days of cheap coal are over in the Maritime Provinces as elsewhere. And when the farmers give the matter due consideration it is unlikely that they will hold up the Government's plan for assisting the development of the province. If they do it is reasonably certain that Premier Foster will make another appeal to the people.

"During the elections neither the farmers nor the leaders of the Opposition exhibited a clear understanding of the difficult situation which now faces the lumber industry of the province. The Government was condemned for not raising the stumpage dues on timber cut on the Crown Lands to \$10 per thousand superficial feet. The Government increased the stumpage from \$3.50 to \$5.00 effective from August 1920, but when the Government made this decision the lumber industry on the surface was still enjoying good times. Now the market for lumber has fallen flat, and the indications are that the lumber operators this winter will not cut more than one-half their output last year.

"In Great Britain the lumber dealers are carrying heavy stocks, and the uses of lumber appear to be waiting for a drop in prices and lower ocean freights. In any case the market is not now favorable, though it is felt that the world must find some way of making up the shortage in houses, and that sooner or later there will be fair demand for lumber. But the New Brunswick operators are carrying on operations as usual this winter. In the United States the Presidential elections are having their usual effect and until the people have settled down to work and taken up the housing question seriously the demand for lumber is not likely to be felt in this province.

"Operators who are in a position to do so are turning their attention to getting out pulpwood but the prohibition of the export of pulp wood cut on Crown Land limits the possible enterprise in this direction at the moment. This consideration lends interest to the talk of big pulp and paper developments in the province, and the development of the Grand Falls in connection with big pulp and paper plants projects which are in some ways the outcome of the Government's hydro-electric policy.

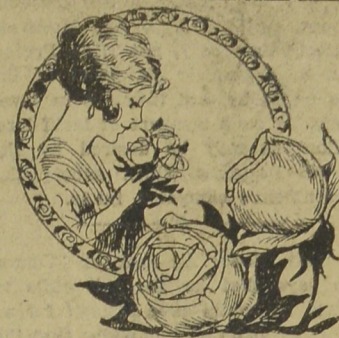

A NEW CURE FOR CANCER

Berlin, Nov. 5—Doctor Rollin reports his partial success with a new treatment for cancer, by the transfusion of blood from the patients own children. Two cases so treated have recovered sufficiently to return to work.

C. H. Holland of Clinton, Ont., is at the Barker House.

The Cause of Heart Trouble

Faulty digestion causes the generation of gases in the stomach which inflate and press down on the heart and interfere with its regular action, causing faintness and pain. 15 to 30 drops of Mother Seigel's Curative Syrup after meals sets digestion right, which allows the heart to beat full and regular.

OCTOBER

is the month between the good old summer time and the cold, disagreeable winter.
