DISCUSSES RELATIONS BETWEEN U.S. AND BRITAIN

A Britisher Explains the Cause of the Anti-British Feeling Now Noticeable in the United States—Also Tells Why There is an Anti-American Wave Sweeping Over England—Too Much Disillusionment.

(By Major Evelyn Wrench, C. M. G. (Hon. Secretary, English-Speaking Union, who has just returned from a visit to the United States. Copyright 1920, by Cross-Atlantic Newspaper Service, Inc.)

London, August, 17—"What is the cause of the anti-American wave which is sweeping through Great Britain at the present time?" I was asked by my American friends during a recent tour through many of the chief centres in Eastern and Middle-Western America. On my return to England I find my British friends asking me to explain to them the anti-British feelings of the American people. They ask, "Is it really true that the comradeship of the English-speaking peoples during the war has been forgotten and that we are hated in America?"

I will endeavor to explain American feelings towards us at the present time as they appeared to a Britisher who has visited the other side of the Atlantic fairly frequently.

America, just as Great Britain, is suffering from an attack of disillusionment and disgruntlement. America is disgruntled at the moment—of that there is no doubt. She expected once the war was over that everything and everybody were going to settle down in the best of all possible worlds. With the coming of peace the people of America expected that most of their problems would be settled and all would be well. Exactly the contrary is the case.

The cost of living has risen alarmingly—although just before my sailing from New York some of the big department stores announced a twenty per cent. reduction in prices—and the whole tendency is upward. Rents are three and four times their pre-war figure.

Domestic help of any kind is almost impossible to obtain, and difficult though the lot of the British housekeeper may be, she is fortunate indeed in comparison with her American sister. In many parts of the United States it is not a case of being satisfied with one or two servants, but "help" of any kind is impossible to get. Then Labor matters are much to the fore, and to a British visitor the possibility of a complete stoppage of trains, and similar problems, seemed very familiar. American business men are in apprehensive mood about business conditions in the future, and owing to the restricted immigration the large employer does not know where he is going to find the unskilled labor he requires.

U. S. Exchange Rate. Another matter which is also receiving considerable attention in the press is the fact that many thousands of able-bodied men and women are returning to Europe with their pockets lined with good American dollars, which at present rates of exchange in many countries turn their fortunate owners into veritable millionaires. The Rumanian, Czechoslovak, Pole, Ruthenian, who returns to Europe with \$10,000 has a fortune in the currency of his native land.

I have purposely mentioned all these

WEAK, SICKLY FOLKS
REGAIN HEALTH QUICKLY
BY NEW REMEDY

A BLOOD-FOOD NOW MANUFACTURED THAT ACCOMPLISHES MARVELS.

Lots of people that were thin and miserable for years have recently been restored by this simple treatment. All you have to do is to take two little chocolate-coated tablets with a sip of water at the close of each meal. The tablets which, by the way, are called "Ferrozone", are in reality a perfect food for the blood. They contain exactly those elements your blood lacks when it becomes thin, weak, and unhealthy.

This is just the time to use Ferrozone; it excites splendid appetite, gives digestion splendid aid, supplies nourishment for all weak organs. At once you feel buoyant and strong. Nutritious blood courses through your veins, supplies strength, makes you tingle with animation and ambition. No more headaches.

None of that tired languor.

You feel like doing things because Ferrozone completely renews and strengthens your whole system.

No medicine on earth gives such quick, lasting benefits as Ferrozone. It has raised thousands from downright weakness, brings robust health simply because it contains the fortifying elements that run-down systems require.

matters before dealing with Anglo-American relations because I wished to emphasize that the American is at the moment passing through a phase of disillusionment. He is worried with his domestic problems, he is extremely dissatisfied with his own Government, and not even in England have I heard politicians more roundly trounced than in America.

The pendulum is undoubtedly swinging in the wrong direction at the moment as regards Anglo-American friendship. But personally I believe this is merely a healthy reaction after the exceptional conditions which existed during the closing months of the war. The League of Nations and all European entanglements are at present unpopular, and America would like to forget the existence of the Balkans, Eastern Europe, America, and elsewhere if she were allowed to do so. She desires nothing better than to think America, first, last and all the time. Her feeling are not so much anti-British, therefore, as essentially pro-American.

There is, of course a certain amount of anti-British feeling which will probably increase rather than diminish, till after the Presidential election in November.

In business circles there is a certain amount of suspicion of British trade policy in foreign markets; whether fomented by those desiring to promote ill-feeling between us matters not, for it is there. In England before I left I heard British business men talking about "American astuteness and American efforts to capture the world's trade." In America they are saying just the same things about Great Britain.

Not once but fifty times I was told British manufacturers understood the export business much better than Americans, and that we were trying to establish a monopoly in the world's oil supplies outside American territory.

In conclusion, let me record two recent happenings to illustrate the friendly feelings towards us entertained by many of the American people. When the British University team established a world record for a two-mile race in the presence of 30,000 odd spectators at Philadelphia, the British athletes received an ovation. There was, I believe, no discordant note. During my last few days in New York before sailing, Fifth avenue, the greatest shopping street in the world, was a mass of Union Jacks. The shopkeepers of Fifth avenue were paying a tribute to a visiting delegation of British dappers. If twenty-one American haberdashers came to London I wonder whether Regent Street, Oxford Street and Bond Street would be a mass of "Stars and Stripes."

IMMIGRANT GIRL HAD HAZY LOVE STORY

New York, Aug. 16—A romantic imagination, according to Albert B. Unger, Assistant District Attorney, is the chief trouble with Charlotte Schuetze, the German immigrant girl who arrived here on July 23 and disappeared a week later in search for a man who she said, had made love to her on the voyage.

The man named by the girl appeared yesterday at Mr. Unger's office and denied that he had shown more than a friendly interest in her. His wife corroborated his assertion that he had told her about the girl. He admitted that he arranged to take the girl for an automobile ride, but declared that when he went to meet her he was accompanied by his wife and two other friends.

The girl and her mother, Mrs. Frieda Trinkle of Ridgewood, Queens, also appeared at Mr. Unger's office. The girl said the man had represented himself as a widower. Mr. Unger said after conferences with all parties concerned that he was satisfied of the man's innocence, that the girl had told conflicting stories and that he would carry the inquiry no further.

Mosquitoes ought to appreciate this summer's gauze silk stockings.

"Too has become one of the necessities of life in hot weather," remarked the Man on the Car, "yet I can't remember anything more comfortably cool than an old-fashioned milkhouse with harnessed spring water running through it."

Department of Health, N. B.

VACCINATION OF EMPLOYEES

THE FOLLOWING IS PUBLISHED FOR THE INFORMATION OF THE PUBLIC, GENERALLY, AND ESPECIALLY OF THOSE DIRECTLY CONCERNED

"1. Section 30 of The Public Health Act, 1918," being 8 George V. Chapter 36, is hereby amended by adding after the last paragraph thereof the following paragraph:

No person shall be employed in any camp, ship, factory or other place wherein the employees come at frequent intervals into close and prolonged contact one with another, unless and until such person produces to the employer or the employer's representative a certificate signed by a regularly qualified medical practitioner, of successful vaccination, or a like signed certificate that he is immune to vaccination as proven by three consecutive non-successful vaccinations, or that he is immune to small-pox by reason of having had the disease, and no employer shall employ any person in employment as set forth above, without such certificate being produced. When any person contracts small-pox, who is at the time of the inception of his sickness employed as set out in this section, or who was so employed within fourteen days prior to the inception of his sickness and who has not complied or been required to comply by said employer of employer's representative with the foregoing provisions prior to his employment, then in such case the employer shall be primarily liable to pay all such costs, charges and expenses as the sub-district Board of Health concerned may have incurred in necessarily protecting the public health; provided such charges, costs and expenses were incurred in or about the necessary precautions relative to, or immediately appertaining to, any such case of small-pox, and such costs, charges and expense may be sued for and recovered with costs, in the name of the Chairman of the sub-district Board incurring the same, in any court of competent jurisdiction, within six months of the recovery or death of any such person. Such liability shall be in addition and without prejudice to any liability for any penalty provided for any violation of the provisions of this Act.

The terms and conditions of this section shall not become operative until the first day of July A. D. 1920."
