

# STOPS BRONCHITIS QUICKLY WITHOUT ANY MEDICINE

This Problem Solved When  
Catarrhzone Was  
Discovered.

## Thousands Have Been Cured

You are nothing but a plain simple boob to suffer a day longer from Bronchitis. It's real easy to cure—this has been proved time and again.

Relief comes at once when you breathe in the soothing vapor of Catarrhzone. Once it shealing, piney essences strike the bronchial tubes, you realize that a powerful treatment is at work.

Irritation can't live in the throat of a person inhaling Catarrhzone. It is so soothing, so warming, so full of concentrated healing power that you get results at once.

Catarrhzone strengthens the weak throat, makes even the chronic sufferer realize that at last he has discovered a real cure. For coughs, colds, catarrh, and winter ills, nothing in the family could be better than the complete dollar outfit. Small size 50c; trial size .5c, all dealers or The Catarrhzone Co., Kingston, Ont.

# NEWSPRINT PRICES FIXED FOR ANOTHER QUARTER

The Price to Remain at One Hundred and Thirty Dollars Per Ton—Higher Wood, With Labor Unchanged—Pulpwood Prices Fall Off and Demand is Not Very Brisk—An Important Commodity.

Montreal, Dec. 20.—A certain relief is felt here in financial circles over the decision of the selling agents for Spanish River Pulp & Paper Company and the Abitibi Mills to fix a price of 6½ cents per lb. for the first quarter of 1921, instead of the price formerly announced of 7 cents for the first half of next year. On the other hand, it has been agreed by the publishers served by the two mills to have the price for the month of December raised from 5 to 6 cents of \$120 a ton. This change was made as a result of representations made by the publishers that it would be unfair to them to be in competition with other publishers who were paying only \$130 a ton for their newsprint, as will be the case with customers of Laurentide, Price Bros., Brompton, St. Maurice and other Canadian mills. The lowering of the price as first announced finds favor with those investors who

# IF STRENGTH DECLINES AS AGE ADVANCES, FOLLOW THIS SUGGESTION

So many women grow old before their time, perhaps your wife or sister. A little while ago, buoyant, full of vigor and activity—she enjoyed life and imparted pleasure to the whole family; but now in a few short years she has faded and lost color and strength. She is just ready to develop some disease that will further weaken and debilitate. You remember how it began, failure of appetite, tired in the morning, found housework burdensome, always nervous and a little irritable. It's a shame to let her go down hill further when you can build her up so quickly with Ferrozone. The change this nourishing tonic makes in a weak woman is surprising. It gives great zest for food, increases appetite and digestion enormously. The blood gets richer and stronger and adds new life to every organ in the body. A rebuilding process works through the entire system. The first week will show an improvement and a month or two will fatten up the thinnest, most run-down woman you can think of. Take Ferrozone for lost color, for nervousness, for weakness,—use it when run-down and feeling poorly—it will do you more lasting good, keep you in better health, than anything else. Just as good for men and children, too, because Ferrozone is harmless and safe, 50c. per box or six for \$2.50, at all dealers, or direct by mail from the Catarrhzone Co., Kingston, Ont.

felt that the \$140 rate might appear a little too high, especially in the presence of a lower rate governing a larger output by the other group.

## Wood at Highest Cost.

Once more it may be in order to explain for the benefit of those who look on the business of making newsprint as exactly parallel in regard to costs with the majority of other commodities that the question of cost of manufacture is on a distinctly different basis. To quote the words of one of the leading manufacturers in Canada:

"We have two years' supply of wood made at the highest cost; sufficient coal in the yard to run the mills until next summer, which was purchased at spot market prices, and labor would not consider any reduction at this time fair." Under these conditions he believed that "the total costs for next year will be as high or higher than they were last."

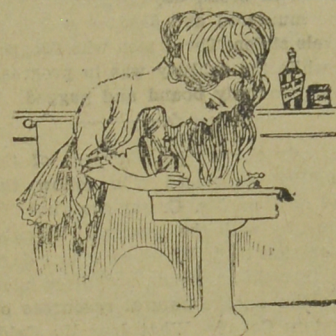

It should never be forgotten in connection with the newsprint industry in both Canada and the United States that for a considerable period, close to two years, the mills were restricted in their selling price by Government control. This worked disastrously in the case of the sugar refineries in Canada, but fortunately was thrown off by legal means by the newsprint mills before very serious damage had been done. At the present time the paper mills are following out in the prices they are asking a basis of as high or higher costs of production on the one hand, and the unusual condition in any industry today of an assured demand. These two elements, cost of production and the condition of supply and demand, are governing prices generally, and in most industries are forcing heavy reductions of prices in order to liquidate stocks. The paper mills have no surplus stocks, and fortunately are able to assure themselves of prices that result in large profits. This will be the case for a time, even now some of the mills are forced to a lessened production through low water that makes it almost impossible to manufacture groundwood pulp, which forms close to 80 per cent. of newsprint material. If advertising drops seriously next year as it may easily do after the liquidation sales of January and February and perhaps March are over, the demand for newsprint will drop also and the mills will be facing some of the unfavorable conditions confronting industry in general. By that time, however, working now on an ordinary business basis, they will be in such a strong financial position that they can bear with equanimity any lower profits that may be enforced.

## Pulp Conditions.

While newsprint prices remain firm under contract, the demand for pulp has fallen off decidedly. This condition may continue for some months to come. A New York trade report, after referring to the fact that groundwood is selling around \$100 a ton, says that: "We are not likely to see groundwood for instance selling as high as \$150 a ton very soon." It adds: "Business is slow now, but it cannot but pick up as soon as buyers become convinced of the real situation and come into the market again, and this they are bound to do by spring at the very latest, and probably within a month or two." Book paper is reported as stronger, with fine paper prices holding up, but demand continuing slow, while low prices on the open market failed to revive business. Tissue and board are still inactive.

## EXECUTIONER FROM BOSTON FOR NEBRASKA

Lincoln, Neb., Dec. 21—Gov. McKelvie has announced that an executioner has been summoned from Boston and that Alson B. Cole and Allen Vincent Grammer will die in the electric chair Monday unless the State Supreme Court grants a writ of error sought by Cole. The men were to have been put to death, but no executioner could be found in the State.

It has been more than three years since Cole and Grammer were first sentenced to be electrocuted for the murder of Grammer's mother-in-law. They have obtained more than a dozen reprieves by court action.

Before it adjourns the League of Nations should do its best to get Gabriele D'Annunzio to join. As a world power he is too formidable to run at large.
