

There
is
nothing

you can give your children, in a material way, which will do them more lifelong good than a savings account in an institution like the Bank of Montreal. By encouraging them to save, you teach them the habit of thrift and provide a foundation for their future.

A savings account may be opened with \$1.00. Interest is paid at the highest current rates.

THE GIFT OF THRIFT

BANK OF MONTREAL

Established over 100 years.

Total Assets in Excess of \$500,000,000.

Head Office: MONTREAL

Branches in all important centres in Canada—Savings Departments at all Branches.

SERMON TOPIC UPSETS DIGNITY

(New York Sun)

Unless they read this, Capt. Day's daughters will never know why their hostess on a summer evening in a far-away country spot several years ago had so much trouble suppressing her giggles when the clergyman at evening service announced the text of his sermon.

In the summer colony Capt. Day's daughters were widely known for their enthusiastic appetites. They were large girls, and they ate in proportion to their size.

They had been invited by their hostess for Sunday night supper, and planned to attend the evening service afterward at a nearby church, where a noted preacher was to give the sermon. The meal was consumed—all of it. There was not a crumb left when the girls and their hostess rose from the table.

At the church all went well until the clergyman mounted the pulpit. Then it was that the morale of the hostess was upset for the rest of the service, although the Day girls, mystified, sat puzzled while she fought to restrain her laughter. The minister had announced as his text:

"Behold, the days have come, and there is famine in the land."

F. M. Anderson of Campbellton is in the city today.

Donald Fraser of Plaster Rock is at the Queen.

being read by his son, got out a jack-knife and cut a piece of leather which was hanging down from the sole.

The gathering watching the inventor paused and then broke out in a hearty burst of laughter. The inventor joined in the laugh and said: "I went over to New York to buy a pair of shoes and found they were asking \$18 a pair. I did not object to the price, but the toes were all pointed and I wanted a broad toe. I went down to Cortlandt street and in a cellar I noticed a lot of shoes. I saw a pair that struck my fancy and bought them for \$6. I have been wearing that pair of shoes for nearly a year."

SLEEPLESS NIGHTS OVERCOME BY SAFE METHOD

SUGGESTIONS GIVEN WHEREBY INSOMNIA CAN BE SAFELY AND QUICKLY CURED.

Worry, overwork, overstudy and indigestion cause insomnia.

Healthy, natural sleep can't be produced by drugs.

First the blood circulation must be improved:

Congestion of blood in the head must be removed.

Irritation in the brain must be relieved.

It's because Ferrozone equalizes circulation, because it soothes the irritation, because it removes congestion that it does cure insomnia.

For building blood and nerve, for instilling force and life into overworked organs, for establishing strength and vitality, where can you find anything so efficient as Ferrozone?

Remember, sleep is just as important as food.

You must sleep, or break down, but if you'll use Ferrozone and thereby remove the conditions which now keep you from sleep, you'll get well quickly.

Ferrozone is not a narcotic, not a dope; it is a health-giving tonic that any child or delicate woman can use. Absolutely safe is Ferrozone.

Take it for a month, take it for a year—no harm, but immeasurable good will result.

To sleep well, look well, feel well, to be free from depression, nervousness or blues—use Ferrozone. It's a food tonic, a healer to the weak and wretched, a boon to the sleepless—sold in 50c. boxes, six for \$2.50, at all dealers, or direct from The Catarrh-ozone Co., Kingston, Ont.

A REAL TRICK IN PHOTOGRAPHY

(New York Sun)

With much merry-making the youths and maidens in one group on a nearby beach recently were posing for their photographs. With a new camera an amateur photographer—one of "the bunch"—was taking the pictures. He had finished one roll of films and was starting on another when another visitor to the beach, lounging near by, noticed him.

The A. P. was pointing the camera directly into the rays of the sun, while his subjects were grouped with their backs to the sun and their faces hidden in shadows. So all the previous snapshots had been made.

"Good Lord, man," the outsider protested, "you'll get nothing but blanks. The light isn't right. You ought to have the sun over your shoulder when you're making photographs."

The A. P. was unmoved. "Guess I know as much about this as you do," he retorted. "Besides, it's my own camera."

The outsider subsided, but his turn was coming. Yesterday he was behind the counter in the camera department of a sporting goods store when a youth came in and presented a check for some films that had been left to be printed.

The clerk found the right envelope and noted some markings upon it.

"Just 15 cents for the developing," he told the customer, whom he had recognized as the erstwhile A. P. "None of them came out. You didn't have the right light. You ought to have the sun over your—"

But the A. P. now recognized the "butter-in" whose advice he had scorned, and, dropping a dime and nickel on the counter, he fled.

PAPER SOCKS AND ROPE GARTERS

Washington, Aug. 31—Her paper socks are supported by rope garters—that is, on her front legs. She is a white mare and she is setting a new equine pace in hosiery equipment.

Pedestrians along Park Row and through Printing House Square these humid evenings may have noticed the mare standing at rest near the Franklin statue. On the other side of the statue is the wagon she draws with its stock of milk for the thirsty. The milk vendor is a merciful chap, and evidently figures that wrapping the mare's lower legs in newspapers will keep flies from tickling and the unhitched mare from stamping.

The newspaper socks are bound around with twine. The conformation of the hind legs serves, with the twine binding to keep the paper hosiery in place. The "forrad" hosiery is secured by passing a light rope over the mare's shoulders and fastening the ends to the tops of the socks.

The mare looks odd—but comfortable in this sticky fly infested weather.

WOODSTOCK PROVINCIAL EXHIBITION

WOODSTOCK, N. B.

SEPT. 13-14-15-16-17. 1920

FIVE DAYS

BIG FAIR ATTRACTION AND HORSE RACING

PREMIUM LISTS \$20,000

Open to Dominion of Canada and State of Maine.

WATER POWER DEVELOPMENT

(St. John Times)

The provincial government meeting scheduled for next week, will be opened tonight in Fredericton, so it was announced here this morning. The change in the date is due to the fact that both Labor Day and the St. John exhibition will hold the centre of attraction next week.

It is expected that matters in connection with the water power development in the province will be touched upon. The engineers of the New Brunswick commission have been actively engaged in the preliminary plans for the work, many of which have been looked over and approved by Henry Holgate, the consulting engineer. Mr. Holgate has set his seal of approval on the general scheme of development by which not only the cities and towns of the province will receive the benefit

WHITTLES SHOES DURING SPEECH

(New York Sun.)

Thomas A. Edison created considerable amusement today at an anniversary celebration for one of his inventions when he took off his right shoe in the midst of his speech, which was

of cheaper light and power, but the municipalities will also share in the convenience.

It is planned to supply current from Musquash and Lepreau to all points from the source of supply through St. John to Moncton, where the system the first work in the near future, will be linked up with that from the North Shore. The power from the Shogomoc will be used to supply the St. John River valley, connecting at St. John with the Southern lines. It is understood that the commission will be in a position to ask for tenders for

Nelson and The Kootenay

The name Kootenay has long been familiar to the mining and lumbering worlds. Kootenay has extensive, varied and rich mineral deposits and every valley and mountain side is a store-house of valuable timber. The city of Nelson, on the Kootenay Lake, is the distributing centre for the district, from which the wholesale trade of the interior is carried on. Nelson owns the public utilities, electric light street railway, water works and gas works. Special attention is given to the forestry department in guarding the timber resources of the district. With an unlimited supply of wood in the mountains, there is a great future in the pulp industry. Within a radius of twenty-five miles there are twenty-five saw mills in operation. The Board of Trade of Nelson is now in communication with New York capitalists regarding the establishment of a pulp mill. Tributary to the proposed mill site are 11,200 square miles of territory from which wood supplies can be procured. The slopes, forested with timber, are easily workable. The population of the region embracing about forty thousand people, is fairly well spread over the entire area. There are about 15,000 inhabitants in ten towns and the balance are scattered on homesteads, ranches, lumber and mining camps through the district. Many, in order to obtain working capital, accept contracts for delivery of logs, trees, shingles, cedar poles and other products from their lands and there are a number of forest product operators around the Lake. It is computed that nearly 14 million cords of pulpwood could be secured, enough to last one hundred and fifty years, figuring three hundred cords per day.

The maximum distance of raw material from Nelson is sixty-five miles with an average of thirty-five miles. There are excellent railroad connections to market, and there is abundant cheap electric power. The most important power development in the interior of British Columbia is that of the West Kootenay Power and Light at Bonington Falls. Power and light are furnished to Trail, Rossland, Grand Forks, Phoenix, Greenwood, Boundary Falls, the

smelters and mines forming much the largest consumers. There are openings for the manufacture of wooden ware. A sash and door factory of Nelson are branching out this year into the manufacture of wash-board, screen doors, brooms and various wooden articles and that a large business of this kind can be developed is assured. The Kootenay can make other appeals to the world. Fortunes are still to be made by extracting her precious metals from the earth and hewing the trees from her hillsides, but she has another treasure to offer in the fertile valleys that circle

every Lake and border every stream—these are rich fruit lands. There are exceptional advantages in diversified farming where are combined dairying and the production of hay, grain, poultry, hogs, sheep and a variety of small fruits and vegetables. In the district are many retired military and naval officers who are able to find congenial occupation and for leisure hours there are no waters in Canada that offer greater attractions to the sportsman or lover of the beautiful in Nature, than the Kootenay Lakes and rivers. Keeping is a new industry that is making progress.—C. G.
