

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over thirty years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

CARING FOR CUT GLASS.

Extremes of Temperature Will Crack
Deeply Cut Pieces.

Cut glass requires great care. Extremes of temperature will set deeply cut pieces to cracking and cause a real break sometimes. It is always well to wash cut glass in warm water and rinse in water nearly the same temperature. Soap suds brings out the sparkle and colors in the glass. Be sure that the articles to be washed are reasonably near the temperature of the water. To plunge a cold water glass into even moderately hot water will prove disastrous. Pieces not in constant use are better if wiped from the sudsy water without rinsing, as the lustre of the glass is somewhat dulled by clear water. A soft brush is excellent for washing, as it gets down into the deeply cut pattern as a cloth cannot.

THREE GOOD OLD RECIPES.

Old Reliable Jelly Roll.

Beat one cup of granulated sugar with the yolks of three eggs until light, sift one cup of flour with one saltspoon of salt, one teaspoon of baking powder, three times. Flavor with a teaspoonful of vanilla; one teaspoonful of lemon juice. Sift in the flour, then the stiff whites at the same time using a perforated spoon. When well mixed stir in quickly, the last thing, one-quarter cup of hot water. Bake in a moderately hot oven 12 minutes in a pan that measures about 12x16, and cover bottom of pan with a strip of paper. To roll, have a cloth ready sprinkled with confectioners sugar, turn cake out and with a sharp pointed knife cut off the four edges, spread with any kind of filling, roll up light, then roll up in the cloth.

Sally Lunn.

Rub up one-half cup lard with one-half cup white sugar; into this stir two eggs, then add alternate one pint of flour with two tablespoonfuls baking powder sifted in it, and one-half cup of milk; bake in a moderate oven about 35 minutes.

Graham Cake.

Two cups sugar, one cup molasses, two cups sweet milk, one teaspoon each nutmeg, cloves and cinnamon, three cups graham flour, two cups of white flour, two teaspoons soda, little salt, one pound raisins, one half pound currants, citron as liked. Two loaves. Better if kept awhile before cutting.

RANDOM REMINDERS.

Creamed celery is delicious with
veal loaf.
Articles to be fried should be dry
and warm.

Lemon meringue pies can be made
with tapioca.

Apples are more tasty if baked
with the cores.

In repotting a plant put a layer of
cinders in the bottom for drainage.

A little water wagon on which to
set the scrubbing pail can be made by
attaching four castors to a square
board.

EXACTLY.

If Leap Year was the thing they say,
You'd find the men all hid away.

HURRY DAN, CORA HAS WEAK-
ENED.

If Dan Horton will communicate
with Cora Sillinger he will learn
something to his advantage.—Des
Moines Register.

KNOCK ON WOOD.

There is just the barest possibility
that the Barkvale band will want to
play for the meeting.—Mercyville, Ia.
Banner.

A FORMER LADY.

Mrs. W. O. Powell will leave for
Milestone, Canada, where she has been
called by an accident to her sister-in-
law Mrs. Horace Woodward. Mrs.
Woodward is a former lady and re-
cently had the misfortune to fall and
break one of her limbs.—Monmouth,
Ill., Atlas.

Money saved is money earned; but

money spent is money yearned.
Life will seem dreary and tasteless
to many men in smaller towns if it
ever happens that there are no wicked
cities for them to visit occasionally.

PRICE, WATERHOUSE & CO., CHARTERED ACCOUNTANTS.

145 St. James Street, Dominion Express Building,

MONTREAL, January 17, 1920.

To the Honourable the Premier of the Province of New Brunswick,
Fredericton, N. B.

Sir,—In accordance with your instructions we have examined the Books and Accounts recording the Financial transactions of the Government of the Province of New Brunswick for the fiscal year ending October 31, 1919, and certify that, in our opinion, the Balance Sheets at that date attached hereto exhibit a true and correct view of the financial position of the Province as at October 31, 1919, according to the best of our information and the explanations given to us, and as shown by the Books of the Province.

During the year ending October 31, 1919, an amount of \$244,807.45, representing Interest Charges on the Bonds and other indebtedness of the St. John & Quebec Railway, less the Province's proportion of the Railway Earnings, has been capitalized. The additions to the Capital Accounts of Roads and Bridges represent Expenditures classified as Permanent by the Provincial Engineers.

We have the honour to be, Sir,

Your obedient servants, (Signed) PRICE, WATERHOUSE & CO.

ENCOURAGE
EXPLORATION

When addressing you last year, said the president of the Canadian Bank of Commerce at the annual meeting of the shareholders of that institution, I ventured to express the opinion that the Government could afford to grant a small bounty on the production of

the gold mines in Canada, with a view to increasing the available supply of the precious metal. The Dominion has met with disapproval in some quarters, but I still think that the Government should do something in the matter. By way of offering a bounty on the gold itself as a means of exploration and development of what are supposed to be gold-bearing areas. Were the same course to be followed in the case of silver, it is possible that the discovery of new fields and

the opening of new mines might exercise a very beneficial steadying effect on the price of that metal. The extension of the output of the present mines is of course encouraged by the material enhancement in price which has taken place. According to figures made public some time ago, the price per ounce rose during last year from an average of \$101.1, during the first four months to \$127.92 in November.
