

STOMACH DISORDER

ONLY 6 MONTHS TO LIVE
Read What B. B. Did for Him

Mr. Hans Kehli, Magnolia, Alta., writes:—"Some years ago I became very sick from stomach disorder, which the doctor told me had started from drinking bad water. I tried local doctors, but finding I got worse from day to day I went to a doctor in Edmonton. He told me that I must have an operation, and that if I didn't I couldn't live any longer than six months. I told him I had better die after six months than be cut to pieces. I did not have the operation but returned home. No one was there to meet me at the station, because they did not know I was coming. I felt so bad I couldn't walk farther than 10 yards without resting. It took me 6 hours to walk 2 miles; the distance.

Some weeks later I read an advertisement about your Burdock Blood Bitters. After I had used one bottle I felt much better, and after using three bottles I was completely cured; therefore you see your B. B. has saved my life, and I cannot praise it too highly."

Burdock Blood Bitters puts the stomach into shape by promoting perfect digestion, and restoring health and strength to the system. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

BEN LEONARD SERIOUSLY HURT

New York, June 18—Benny Leonard, lightweight champion of the world, has sprained a tendon while acting for moving pictures on the Pacific Coast and has been forced to cancel all boxing dates previous to his meeting with Charley White at Benton Harbor, Mich., on July 5th.

MOTORISTS AND
PEDESTRIAN

(Toronto Star.)

"The time is not far distant," said an elderly citizen of Toronto the other day, "I may not live to see it, perhaps but some of you will when every pedestrian in the city will be forced by law to wear a red electric bulb in his necktie and carry a red lantern swinging to his coat-tails behind."

As the reader will readily infer, this elderly gentleman was, at the moment, somewhat incensed by the argument of motorists that pedestrians ought to be compelled to keep out of the way of motor cars. Some motorists like to tell about how it is in France "There," they tell you, "if you get hit by a motor-car, they arrest you for having got in its way." It may be so, in given circumstances, but the French plan is not quite as simple as this statement of it would make it appear. Safety of life must be ensured, and life cannot be made safe unless both motorists and pedestrians strive to make it so. A few years ago in Toronto trolley accidents were so frequent as to cause much concern. Pedestrians were being struck by the cars, and fenders of all sorts were being experimented with. But such accidents are now infrequent, partly because the street cars are much better handled by a more competent class of motormen and partly because the people on the streets have learned to be cautious. There is, perhaps, reason to hope that similar processes are at work, and will, in time, reduce the number of motor tragedies.

HOT WEATHER
FOOD AND DRINK

(The Omaha Bee)

Much of the discomfort of hot weather comes from unintelligent eating. We are all prone to carry over into summer our winter tastes at the table. If we can summon up fortitude to discard those foods which develop heat—the rich meats, gravies, pastries and sweet things generally, which build fires in our tummies and raise the temperatures of our bodies—we shall all be saved not only much discomfort, but also many of the perils of hot summer suns. The vegetables and fruits are the things to "play up" on the table now. The vegetables are the great blood purifiers. They rid the body of what it called for in cold weather, those qualities which resist cold; and they leave us in condition to combat excessive heat, while the acid and juicy fruits ably reinforce them. Of all the fruits the lemon yields the most wholesome acid. It is as pure gold to pig iron, when compared with vinegar as an acid when the lemon is available. And if you would be cool while others sputter and bubble with heat, eat lightly! Hot meals, rich puddings, sweets, all heavy foods, have to be burnt up in the body. Therefore, shun them if you would not have a conflagration within while the sun is raging without. And drink pure water in abundance at cellar coolness. All iced drinks react unfavorably on the system. In the days when cool beer—"ice cold beer"—was sought by the heated crowd, those who knew how to take it regarded ice on or in as an abomination. In Europe, which has been drinking intelligently much longer than America,

New Man
