

THE DAILY MISERY OF ILL-HEALTH

Three Years of Suffering Quickly Relieved by "FRUIT-A-TIVES"

MR. GASPARD DUBORD

159 Avenue Pius IX, Montreal.

"For three years, I was a terrible sufferer from Dyspepsia and my general health was very bad. I consulted a physician and took his medicine and faithfully carried out his instructions; but I did not improve and finally the doctor told me I could not be cured."

At this time, a friend advised me to try 'Fruit-a-tives' and I did so. After taking two boxes of 'Fruit-a-tives', I was greatly relieved; and gradually this marvelous fruit medicine made me completely well. My digestion and general health are splendid—all of which I owe to 'Fruit-a-tives'."

GASPARD DUBORD.

Box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

DEER HUNTERS ARE PLENTIFUL

Pittsfield, Mass., Dec. 9—Reports received last night by central and southern Berkshire game wardens showed twelve deer killed today. At least fifty hunters were in the woods for each deer. With a fresh light snowfall conditions were ideal for tracking but a sharp wind kept most of the big game in the thickets.

Charles Scace of Richmond last night reported seeing four deer swim Lake Mahkennak in Lenox, cross the Andrew Carnegie estate and climb Richmond Mountain. He lost them in the forest. Many moose tracks were seen on Washington Mountain.

Dr. H. Addington Bruce says salt is the direct cause of countless human ills. We all know that salt was what ailed Lot's wife.

Higher railroad rates don't worry people who enjoy travelling in their minds.

RICH COAL DEPOSITS FOUND IN ARCTIC CIRCLE

Particular Area Also Said to Contain the World's Biggest Oil Field—Iron and Other Ores Abound—Vast Territory Along the Mackenzie River Reputed to Contain Untold Wealth in Mineral Resources.

Toronto, Dec. 9—In the eleven hundred miles which it traverses from its source in the Great Slave Lake to its mouth in the Arctic Ocean, the Mackenzie River flows through a vast territory of even vaster wealth in mineral and oil deposits, timber and, for a considerable part of the way, in agricultural possibilities. This information was brought back by Mr. R. A. Brooke, a Dominion Government geologist, who has spent the last two summers on survey work in the great northland, and who was in Toronto yesterday. A way up near the Arctic circle and along the course of the Mackenzie is a deposit of coal of a quality equal to that produced in British Columbia and Alberta. By one of Nature's mysterious processes, this coal deposit located on a hillside, was ignited decades ago. It was burning when Sir Alexander Mackenzie, the great Scottish River nearly 150 years ago, and it is still burning today. Nearby are rich deposits of iron and other ores, which some day may be smelted for commercial use by this same coal.

Mr. Brooke is confident that this area contains the biggest oil deposit discovered in the history of the world. A number of widely separated points there were seepages and other indications of the existence of great reservoirs of petroleum somewhere beneath the surface. At one place the geologist found a huge rock so thoroughly saturated with oil that his camp fire actually ignited it. As the nearest find is some 300 miles from the closest railway point, transportation is one of the biggest obstacles to be overcome.

N. H. A. AGAIN IS ORGANIZED

Toronto, Ont., Dec. 10—The National Hockey League Convention was held here and drafted its schedule and appointed a board of referees for the season. Apparently the inclusion of St. Patrick's in the schedule as playing in Toronto gives sufficient evidence that they will have the privilege at the Arena Gardens. The season commences on December 22 and concludes on March 12.

but Mr. Brooke is satisfied that this will be accomplished, and at comparatively reasonable cost.

Among the minerals to be found in large quantities are iron, lead, silver, zinc, copper, gold, mica, salt and gypsum. In some places the formations contain almost free deposits of some of these minerals.

Timber for lumber and pulpwood was discovered in immense tracts all along the valley of the Mackenzie. In the upper reaches of the river, in the neighborhood of the Saskatchewan and Alberta borders, the land has great possibilities from agricultural and ranching standpoints. Summer, with much the same climate, extends unusually from May to October, and all kinds of vegetables, including tomatoes cucumbers and cabbage, are already grown at the Hay River settlement. Contrary to general belief, in this part of Canada the winters are by no means severe.

SOME OLD BACHELORS WHO WON FAME

(New York Sun.)

Who is the most famous bachelor in history? While, as is natural to expect a large majority of the notables of the past have been married men, there have been a few who have attained prominence in the world of arts, of science, of statesmanship and in war without the aid of a "better half."

One who had as much claim as any other to the distinction of most eminent bachelor is Michelangelo, one of the greatest figures of the past. Voltaire, scientist and statesman, is another to the distinction of most eminent bachelor. In the realm of warfare few of the really great have remained bachelors. Perhaps the most eminent is Lord Kitchener who was so largely responsible for England's military strength in the late world war.

Eliminating these few the list presents a more complicated problem to one who would pick the greatest. There are several others of about equal prominence. Among the painters Raphael stands out as one of the greatest to die unmarried. Chopin and Beethoven achieved fame in the realm of music without the inspiration of a helpmate.

Several modern writers poets and essayists achieved prominence by themselves. Charles Lamb, Alexander Pope, Walt Whitman, Phillips Brooks, Henry James, Whittier and Swinburne head the list.

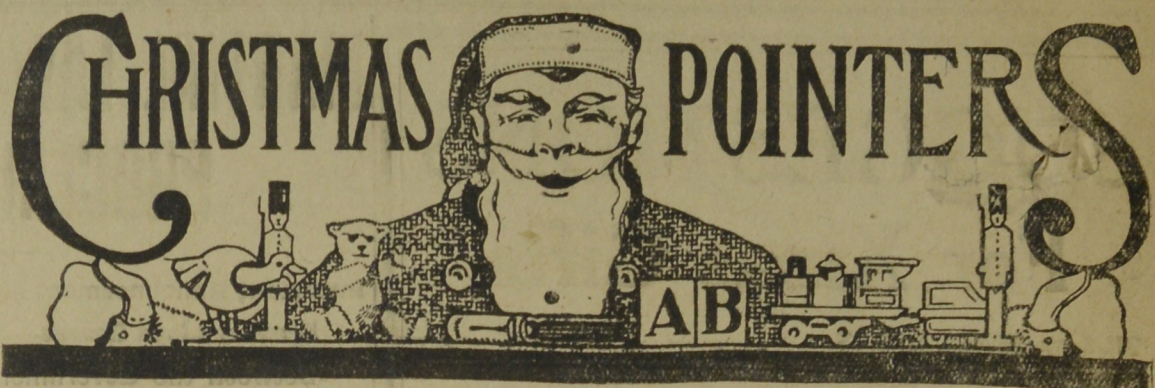

Petrarch was an unmarried historian and Cecil Rhodes, also single, attained great prominence. Few men have become famous as statesmen with marrying before the end of their career. President Buchanan was a notable exception.

NEW PORTRAIT OF SHAKESPEARE UNEARTHED

Special to Daily Mail. Copyright 1920 by Cross-Atlantic News Service.

London, Dec. 9—A hitherto unknown portrait of Shakespeare engraved in the earlier part of the seventeenth century, has been discovered, among the books from Baroness Zouche's library at Parham, Sussex. Unfortunately, it can hardly be regarded as more than a very interesting curiosity, for it seems probable that this engraving was merely done from that by Will Marshall, which in turn, was copied from the Droeshout engraving in the first folio.

The new portrait is inserted in a copy of the 1640 quarto "Poems written by Will Shakespeare, Gent.," and replaced the normal frontispiece—the Marshall portrait referred to above. Marshall made Shakespeare face to his left, added a cloak to his shoulder and showed him holding a sprig of bay in a gauntleted hand. In the new portrait the poet is turned once more, as in the Droeshout print, towards the right, retains the cloak, but shows no hand, and no bay leaf. Under the picture are written the lines: For ever live thy fame, the world to tell Thy like no age shall ever parallel.

Christmas,

THE GIFT SEASON IS HERE AGAIN bringing with it pleasant memories of friends and a reawakened activity in shopping. People everywhere are hustling to and fro, thinking and planning, what would be most suitable to give, whilst the merchants are laying plans for attracting customers to their store.

THE LADIES' AND CHILDREN'S GIFT STORE is glistening with bright and useful Christmas Merchandise at popular prices. Much of the high priced merchandise has been lowered to meet the demands of the people.
