The Act in Brief

3

The present Prohibition Act legislates against the sale of intoxicating liquors for beverage purposes, and only allows It for manufacturing, sacramental and medicinal purposes.

The Act also provides for enforce- sympathetic -BUT NOTE THIS-the ment of the law and penalties for vio- Government put off the granting of these improvements to make the Act lation. . . said more effective.

This Act was a war-time measure and the Government now wish to know from the electors whether they want Prohibition or not.

We Know Its Faults

The Act is weak in that it allows too much latitude in the case of doctors, tically the dispensing of liquors with- important influence on the fu- actually want Prohibition- we are in their own hands.

Two Notable Canadians

Two notable Canadians were made members of the Canadian Institute of Civil Engineers at the annual meeting of the Institute recently held in Montreal, Lord Shaughnessy, the Chairman of the Caanadian Pacific Railway, and Sir John Kennedy, the dean of Canada's engineering profession. Although Lord Shaughnessy is not a professional en-gineer, and therefore could not become a regular member of the Institute, he was made an honorary member, in view of his distinguished career as the head of the Canadian Pacific Railway, in which posltion for many years he has been intimately connected with engineering, and probably employed more engineers than any man in Canada

set at a rather violent angle When some debutantes thus announce that they are 'out on the carpet.' it is said that as many as six or eight of the eligible young men of the tribe literally take to the woods.

After this aggressive young ladys has selected her victim and his mother has agreed that he shall be sacrificed, she serves in the house of her future mother-in-law grinding meal, very much after the fashion that Jacob of old served 14 years for Rachel. The poor youth in the meanwhile does not sit idly by, but weaves her wedding

The Dusky Maidens.

"Among the Batus of the Uganda protectorate of Africa, if a girl is not fortunate enough to be asked in marriage in her home town, she goes to another village and offers herself to some man there. Though not honored in her own country, she at last re ceives consideration in that of her neighbor, for a woman is an excellen agricultural laborer, and a man is no likely to refuse such a business asset "The Galla woman of the eastern coast of Africa has the rare privilege among savage and half civilized people of refusing to marry a man who is undesirable to her.

"Little is known of the marriage custom of the ancient Egyptians, but we can easily believe that women had at least the privilege of expressing a preference, if they did not actually go the proposing, for if we trust that historian, Diodorus, a man promised his wife to grant her complete control him and to offer objection to her commands. Some survival of this liberty of Egyptian women must have permeated other portions of Africa, for princess on the west coast of that continent whose children may become future rulers choose their own hus bands. Nor is a princess limited in her choice to unmarried men. She may just as easily decided upon one who has already entered the marriage state, and the poor fellow has to put away his other wives and become her slave. Moreover, she has the power of life and death over him. He some times has only one consolation-he inherits all her property if he is fortunate enough to be spared until her death. "In the Tyrol a girl may express her preference for a man by presenting him with a bottle of spirits. If she is afraid that her procedure has not the endorsement of her parents, she may contrive to lower the precious fluid at night from her chamber window.

Lucky is the girl who marries a man who never fails to put up the screen doors in time for the fly season. MANY PEUPLE LET THE Thot old-fashioned combination of

distinguished gath pings of engineers seen in Montreal in a long tim. The presentation was made by Mr. Walter J. Francis, the retiring president of the Institute, and as the two veteran Canadians received their badges they were greeted with prolonged applause

A singular honor was bestowed upon them, with the presentation of solid gold badges of the Institute, which were exact replicas of that presented to the Prince of Wales. When the Prince was in Montreal last year he consented to become an honorary mem-ber of the Engineering Institute, and in honor of the event a special badge was struck, engraved with the grest of the Institute and the Prince's name on badge. Since then ten more of these gold badges have been struck from the same die, and ten bon-orary members elected and presented with these golden replicas of the Prince's badge. In this Lord Shaughneray and Sir John Kennedy will find themselves in d'stinguished company such as their own alfa'nmonts warrant

The ten present wearers of the golden badge of The ten present wearers of the golden badge of honorray membership in the Engineering Institute of Canada are H R. H. the Prince of Wales, His Excellency the Duke of Devonshire, the present Goy ernor-General, H R. H. the Duke of Connaught, who proceed the Duke of Devonshire as Governor-Gen-eral. Brig -General Sir Percy Girouard, who made the fame on railway work with Klitchener in the Souden Sir George Augustus Hartley, K.C.M.G. London England, the Earl of Aberdeen, another ex-Governor-General, Dr. Frank D. Adams, of McGill University, and Dr. W. Hodgson EHis, of Toronto

Verily a galaxy of distinguished men University. with whom even such citizens as Lord Shaughnessy and Sir John Kennedy may well feel honored to be associated.

Prolonged applause greeted the two new honor-ary members as President Walter J. Francis pinned the golden badges on their lapels, a note of pathos, being added by the fact that Sir John Kennedy will never see his, his eyesight having completely failed him during the past number of years.

will never see his, his eyesight having completely failed him during the past number of years. The applause was renewed when Lord Shaugh-nessy rose to reply. The Chairman of the Canadian Facific said that although he could not claim the honor of being an engineer his many years as President of the C. P. R. had brought him into very intimate relations with that profession. "I have probably employed more engineers of various kinds than any man in Canada" said His Lordship, "and I have always had the highest respect for the members of the profession, and never found them break their trust. In engineer-ing matters I always relied entirely upon their expert advice, and the Canadian Pacific was never the loser for it. Of course there were mistakes made during the years, but both were jointly responsible, and the C. P. R. did not pass the blame on to the engineers, but went to work to profit by any mistakes made—and there were not many." In conclusion Lord Shaughnessy made brief re-ference to the encoachment of years, which had

In conclusion Lord Shalighnessy made brief ference to the encroacchment of years, which had brought a new President to the Canadian Pacific, Mr. E. W. Beatty. He said that in all probability he would not have many years to wear the golden badge of his honorary membership of the Engineering Institute, but that he should always treasure it with pride and a warm gratitude for the honor conferred upon him.

It with pride and a worm gratting for the holor conferred upon him. Sir John Kennedy, who sat with his old friend, Lord Shaughnessy, also made a brief response. He spoke of the importance of the engineering pro-fession, especially in the upbuilding of a young and developing country such as the Dominion. In fact he considered that the progress of Canada and the advancement of the conjuncting profession were on he considered that the progress of Canada and the advancement of the engineering profession were on parallel lines. As Dean of the profession he re-called the visit of the Prince of Wales (the late King Edward) to Hamilton in 1867, when the Prince had started the first turbine pump in Canada, and he, as a young engineer, on the same occasion had the honor of starting the second. The ceremony closed with hearty cheers for Lord Shauchnesay and Sir John Kennedy.

"In North Transylvania a young peasant woman may give a particular swain a tip that he is the 'apple of her eye' by going with him in his cart at the time of the harvesting of the oats to help him carry in his crop. It is said that at this season one sometimes sees a procession of gayly decorated carts going afield, a willing maid seated in each.

"One of the obligations of a father in Roumania and Bosnia is to provide so well for his marriageable daughter that when she is presented with a list
