

A Quick Relief for Headache

A headache is frequently caused by badly digested food; the gases and acids resulting therefrom are absorbed by the blood which in turn irritates the nerves and causes painful symptoms called headache, neuralgia, rheumatism, etc. 15 to 30 drops of Mother Selgel's Syrup will correct faulty digestion and afford relief.

Lots of men might save money if rent day didn't come around so often.

HON. ROBT. ROGERS VIEWS.

(St. John Times.)

Hon. Robert Rogers wants to save Canada from a "crop of professional uplifters." The history of Manitoba politics when Mr. Rogers was active there furnishes some excellent illustrations of what the professional uplifter can do. We have also had illustrations in New Brunswick politics. Mr. Rogers, however, does not get down to cases, doubtless assuming that the public are able to make the application. In this assumption he is quite right. Mr. Rogers incidentally champions a high tariff. The farmers of the west however remain obstinately unconvinced.

SOOTHES IRRITABLE THROAT, QUICKLY CURES BRONCHITIS

No Drugs to Take, No Sickening Stomach Medicine to Use.

Just Breathe "Catarrhose"

Count ten—a bad cold is relieved by Catarrhose—wait one minute and you will feel its soothing influence on a sore irritated throat. No failure with "Catarrhose"—it cures because you can breathe a healing vapor to the very spot that needs help.

The big thing to remember about Catarrhose is this—you just breathe a healing piney vapor that is full of the purest balsams, that is rich in the greatest healing agents known to science.

This wonderful vapor dispels all soreness, kills all germs, gives nature a chance to complete a real cure. Colds and throat troubles can't last if the pure healing vapor of Catarrhose is breathed. Catarrh will disappear, bronchial attacks will cease, coughs and winter ills will become a thing of the past. Complete outfit lasts two months, price \$1.00; smaller size 50c; sample size 25c, all dealers, or The Catarrhose Co., Kingston, Ont., Canada.

AROUND THE TOWN

The Census Department at Ottawa according to press despatches this week made a logarithmic estimate of the population of the Dominion and the various provinces, preparatory to the census which will be taken in June next. The population of the Dominion was placed at about nine million which is what is generally expected but that of New Brunswick was placed at 368,760. The "expert" who prepared that figure had better get his logarithms revamped for the census of 1919 gave this province a population of 351,889. The Census thus gives New Brunswick an increase of less than seventeen thousand in the decade. The three cities of St. John, Moncton and Fredericton can show an increase greater than that without taking into consideration rapidly growing towns like Edmundston, Campbellton and Bathurst. This increase is even lower than that which was recorded between 1901 and 1911. There is little doubt that it is incorrect for there is every indication that this province has held its natural increase in population and attracted more people than at any time in the past fifty years. Someone in the Census Department should have his head examined.

The same expert gives Nova Scotia a "logarithmic" population of 718,761. The population of the sister province in 1911 was stated as in the neighborhood of 550,000. The increase therefore estimated for Nova Scotia is upwards of 160,000. On what this rapid growth is based is not stated. There is nothing to indicate that New Brunswick has not added to her population proportionately as fast as has Nova Scotia. A like estimate for this province would give an increase of about 100,000. Persons who have a good acquaintance with conditions in all parts of New Brunswick expect the census returns to show the province with a population in the vicinity of 425,000.

The curler is nothing if not enthusiastic. Six members of the Marysville club walked to Fredericton to see the right play in the McLellan Cup match here this week. This means that the enthusiastic sextette had a six-mile walk on a night with the thermometer below zero. With a rink such as that expected to be built there, Marysville should have one of the best young curling clubs in the province.

Mr. Murray Jewett the well known and popular brakeman on the C. N. Railway had quite an exciting experience a few nights ago at his home at Devon, about four o'clock in the morning. Mr. Jewett was aroused from sweet slumbers by the unearthly racket made by a big rat who was playing around the bedroom. The rodent jumped through a hole which it had gnawed to the floor, a distance of nine feet. The rat then ran to the kitchen with Mr. Jewett in hot pursuit. Being rather timid, the householder called his son Walter and the two although thinly clad got quite warm chasing the "Kaiser" around the kitchen. After a few hours hard work they managed to kill the visitor with the aid of a long iron poker.

The late Justice Haliburton the first American humorist better known as Sam Slick once paid a visit to Fredericton. In his famous book "The Clock Maker" he says of his trip:

"He'll feel as streaked as I did once a-riding down the St. John River. It was the fore part of March. I'd been up to Fredericton a-speculatin' in a small matter of lumber, and was returnin' to the city, a-gallopin' along on one of old Buntin's horses on the ice, and all at once I missed my horse he went right slap in, and slid under the ice out of sight as quick as wink, and there I was a-standing all alone. 'Well! says I, 'What the dog has become of my horse and portmanteau? They have given me a proper dodge; that's a fact. That is a narrier speak; it fairly bangs all."

"The Clockmaker" was written in the early thirties of the last century and was first published in the Nova Scotia, a Halifax newspaper edited by Hon. Joseph Howe.

Another tragedy of Prohibition is reported from Devon. A thoughtful wife invested in a "per" for her spouse who was threatened with illness of a serious nature. The "per" when cashed produced a certain quantity of liquor for "medicinal purposes only." The drawback was that the thoughtful wife insisted upon regarding the bottle as really for medicinal purposes. What hubby received was in prescribed doses and those only. He did not like that state of affairs and when his better half left the house for an afternoon he instituted a search of the premises just like a sub-inspector. Also just like a sub-inspector he made a seizure, finding the liquor hidden in the pantry behind a convenient flour-barrel. When he and

HOW TO TREAT STOMACH TROUBLE

A Tonic Medicine is Needed to Build Up the Digestive Organs.

The old-fashioned methods of treating stomach diseases are being discarded. The trouble with the old-fashioned methods was that when the treatment was stopped the trouble returned in an aggravated form.

The modern method of treating indigestion and other forms of stomach trouble is to tone up the stomach and glands to their normal work. Every step toward recovery is a step gained not to be lost again. The recovery of the appetite, the disappearance of pain after eating, the absence of gas, are steps on the road to health that those who have tried the tonic treatment remember distinctly. Dr. Williams' Pink Pills are a tonic every constituent of which is helpful in building up the digestive organs, and therefore the very best remedy for simple or chronic cases of stomach trouble. The success of the treatment is best shown by hundreds of cases like the following. Mrs. Chas. Comer, Picton, Ont., says: "For upwards of two years I was a great sufferer from indigestion. Food would ferment in my stomach, and it would belch gas with a burning sensation. Often I would be troubled with nausea, sick headache, and dizziness. Notwithstanding that I was under medical treatment the trouble grew so bad, that I would only eat when absolutely forced to, and I was in constant misery. I was finally advised to try Dr. Williams' Pink Pills and had only been using them a few weeks when I found they were helping me. I very gladly continued their use and the result is they have made me a well woman, every vestige of the trouble having disappeared. I am so grateful for what Dr. Williams' Pink Pills have done for me that I strongly advise any who may be suffering from stomach trouble to give them a fair trial, and I believe that like myself they will find a sure cure."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail, post paid, at 50 cents a box, or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The bottle separated the contents were not visible. Later the wife prepared to give another dose of "medicine" but to her amazement found the bottle empty. She called hubby's attention to the phenomenon and he asked her if she had driven the corkscrew completely through the cork when drawing it. She answered that she had whereupon hubby gravely explained that the liquor all had evaporated through the hole in the cork. He got away with the yarn too.

This said that no one can understand a woman. For example, why do they dress their ears and let their ankles go bare?

The Only Question for the Skeptic

IS

Yes, I know that all the authorities pronounce the Antimony Ore at Lake George, York County, New Brunswick, the Purest in Quality in the world, but

How About the Quantity?

About three years of closest examination, plus an expenditure of many thousand dollars, was spent in settling this all-important point.

Exhaustive investigation (by private employment of the most expert skill available in the United States) resulted in the satisfying assurances, from the most competent engineers, that these deposits are practically inexhaustible.

There are known to be at least 15 veins ALL ORE BEARING.

Veins range from 800 feet in length to one mile.

There are series of cross veins of various lengths.

All veins are permanent beyond practical mining depths.

Two veins have been proven, one for a mile in length, and from 300 to 325 feet in depth; drifts have been driven at various levels in the shafts, and ALL PROVEN TO BE IN ORE.

Five immediate shafts are sunk, from 80 to 220 feet, ALL IN ORE.

The report of one of the most eminent experts states: "I estimate from the ore 'showing on the surface, on two sides of each shaft, and for a vertical depth of 300 feet, that there is sufficient probable ore deposit to KEEP A SMELTER OF ONE HUNDRED TONS DAILY CAPACITY IN OPERATION AT LEAST 20 YEARS."

Since this was written, the Company has taken over in all about 25 square miles of Antimony bearing lands, and it is known by those in a position to know, that this report reflects but a small fraction of these vast deposits.
