THE UNIVERSITY.

The University of New Brunswick today concluded another year of usefulness, graduating a class of thirty-one members and conferring three masters' degrees in addition to granting higher degrees honoris causa. As an institution of learning the University has been in existence for one hundred and twenty-years in one form and another. As a degree-granting institution its history is close to the century mark. In its long history it has had its "ups and downs" but at the present time is difficult to believe that at various times attempts were made to have it abolished, the most recent being not more than twenty-five years ago. Any person proposing such a thing today would be considered insane but in the "nineties" such proposal actually go as far as the House of Assembly and caused such a rally of graduates and other friends of the old college that the attempt was abandoned quickly. During the chancellorship of Dr. C. C. Jones the University probably has attained a higher position in the public estimation than at any other time in its history. He succeeded the late Dr. Thomas Harrison in 1906 and since that time the attendance has increased steadily and the number of chairs and departments has been augmented not to the extent which the alumni and other friends of the institution would like to see, but nevertheless to a degree which easily is appreciable. In the same period the endowment of the college from the Provincial Treasury has increased from \$9,000 per year to \$25,000. The latter amount is hardly sufficient to meet the needs of the institution and application for a further increase to \$30,000 has been made. The claims of the Provincial University are everywhere recognized. During its history it has been peculiarly situated and is today, in the matter of appealing to the public for financial aid.

As a state institution at a time when there was an Established Church in New Brunswick it was not in a position to appeal to those of any but one denomination and that fact had much to do with the establishment of denominational colleges elsewhere in the Maritime Provinces. As a state institution since that time the University has found itself not as well situated as those denominational institutions which its earlier church connection assisted in establishing, in the matter of appealing for financial support, for there still exists in the minds of many a feeling that monetary assistance to a denominational college will go far toward balancing whatever discrepancy may exist in the matter of moral obligations.

The university situated in this city has been progressive and has supplied the needs of the public as they have arisen as far as equipment and endowment permitted. The original Arts course was supplemented in the last decade of the nineteenth century with a course in Civil Engineering which soon became a department in itself. The electrical and mechanical branches of engineering received attention as soon as the necessity arose and more recently there was established a school of Forestry which already has furnished trained foresters for New Brunswick and many other provinces of Canada. There are other departments which might well be established. If they existed at the U. N. B. there would not be the neces-

FEET AREN'T ACHING OR TIRED NOW—TIZ

Use "Tiz" for tender, puffed-up, burning, calloused feet and corns.

People who are forced to stand on their feet all day know what sore, tender, sweaty, burning feet mean. They use "Tiz" and "Tiz" cures their feet right up. It keeps feet in perfect condition. "Tiz" is the only remedy in the world that draws out all the poisonous exudations which puff up the feet and cause tender, sore, tired, aching feet. It instantly stops the pain in corns, callouses and bunions. It's simply glorious. Ah! how comfortable your feet feel after using "Tiz." You'll never limp or draw up your face in pain. Your shoes won't tighten and hurt your feet.

Get a box of "Tiz" now from any druggist. Just think—a whole year's foot comfort for only a few cents.

sity for young men and women of this province to go elsewhere for the technical and other training which they require. A Law School should have been established at the Provincial University long ago. A beginning has been made in the abbreviated course of lectures now given but a golden opportunity was allowed to pass when the law school now located in St. John was not made a part of the university. The remedy still can be applied however. Pharmacy is another branch of science which could be taught at the local college. The expected hydro-electric development in New Brunswick will place added importance upon Electrical Engineering to the extent that a full course should be attempted. There also is the possibility of mineral development making a School of Mines very desirable. All these would take money and it should be forth-coming.

REPRESENTING NEW BRUNSWICK

Despatches tell us that George B. Jones, M. P. P., of Apohaqui, represented the Conservative party at the gathering held in Toronto this week preparatory to the Ottawa convention at which the attempt will be made to launch once again the Tory bark upon the troubled waters of Federal politics. There can be not other feeling but that New Brunswick Conservatives made a most unfortunate choice in their representatives or rather that they allowed a most unfortunate choice to be made for them. Had one of the "insurgents" gone to Toronto there might have been a little weight attached to the protestations that decks are to be swept and a new start made, but with the hero of Royal Commission investigation representing the party there can be no opinion other than that the "old gang" which triumphed at the St. John convention has the reins securely in hand. The fact that Hon. Bob. Rogers was the chief force behind the Toronto gathering might prompt someone to make an unkind reference to the old saying about "birds of a feather."

THROUGH OUR SIEVE

Conscience is something those who need it haven't got.

Occasionally a thin woman just art of not showing it.

The mosquito sings sweetest just before he presents his bill.

If you want your wife to do a thing just tell her you won't permit it.

It is as difficult to get some men to talk as it is to get some women to quit.

A pretty girl is eagerly listened to although she may say nothing when she talks.

A man isn't as anxious to have his wife forgive his sins as he is to have her forget them.

Every time a modest girl sees a man look in her direction she imagines he is trying to flirt with her.

Nothing makes a woman so indignant as to have you agree with her when she tearfully confides to you her real opinion of her husband.

EX-WARDEN SCOTT ENTERS ON 90TH YEAR

(Continued from Page Eight)

representative of The Mail Mr. Scott made the rather surprising statement that as a young man he did not know what it was to have good health. He suffered from chronic hip disease when nine years of age and he was twenty-four years old before he had recovered from it. During all that long period he was never once under the care of a physician, and on one occasion his condition was so serious that relatives while on a visit to Fredericton actually purchased and took home a burial equipment for him. "It was eventually used by another" said the veteran with a merry twinkle in his eye, "but I always looked upon it as a rather narrow escape."

Lumbered Many Years

Before removing to Fredericton fifteen years ago Mr. Scott resided for fifty years at The Barony where he owned and occupied one of the finest farms in that district. The winter months he spent in the lumber woods and carried on successful operations for F. H. Todd & Sons, James Murchie & Sons, Charles Macpherson and others. Year after year he cut logs and delivered them at a lake near McAdam for \$4 per thousand, which sum looks rather small in comparison with present day lumber prices. He also cut logs, rafted and delivered them at Springhill for as low as \$4.50 per thousand and was able to make a profit on all operations. Asked how he did the trick he explained that the highest wages paid at that time was \$13 per month, a double team could be hired for \$26 a month, supplies were cheap "and" he added with emphasis "four men would do as much work as eight

END YOUR CATARRH TODAY

Catarrh sufferers, meaning those with colds, sore throat, bronchial trouble, etc., can all be cured right at home by inhaling "Catarrhazone."

In using Catarrhazone you don't take medicine into the stomach—you just breathe a healing piney vapor direct to the lungs and air passages.

The purest balsams and the greatest antiseptics are thus sent to every spot where catarrhal trouble exists—germs are killed, foul secretions are destroyed, nature is given a chance and cure comes quickly.

Colds and throat troubles can't last zone is breathed—sneezing and coughing cease at once, because irritation is if the pure healing vapor of Catarrhazone removed.

TWO-YEAR-OLD BOY MISSING

Chatham, N. B., May 13.—Little Jimmie Anderson, two-year-old son of Mr. and Mrs. James Anderson, has been lost since yesterday morning. All yesterday afternoon and last night neighbors and friends searched everywhere for him, but found no trace. He was last seen playing in the yard of his home, and although they live near the river, his parents are clinging to the hope that he has wandered off and are momentarily expecting news that he has been found.

will do today. I never even dreamt," he said "that I would live to see spruce logs selling at from \$25 to \$30 per thousand. Yet that is the prevailing price today."

During the long period of forty four years in which he was engaged in lumbering Mr. Scott's business dealings were characterized by the strictest honesty and integrity. He was never called upon to sign a note or due bill and his word was considered just as good as the bank. Success attended his efforts from the start, and although he contributed generously to all worthy objects and saw to it that the members of his family had a good start in life he also provided for the future and today he does not have occasion to worry over financial matters.

In Municipal Politics

For twenty five years Mr. Scott was a prominent figure in the Municipal politics of York and on two occasions was honored with the office of warden of the county. He represented the Parish of Dumfries in the county council for twenty five years without a break and in that long period was only called upon to run five elections. His colleagues in the representation of the parish included the late David P. Gillman of Pokok and the late George Ebbett of the Barony. Ex Coun. Thom as Simmons of Allandale is the only Parish colleague of Mr. Scott's who is still in the land of the living. Others who sat at the board with Mr. Scott include J. K. Pinder M. P. P. of Pinder, Recorder Colter and J. E. Horncastle of this city, Israel Smith of New Maryland, David Essensa and Robert Thompson of Harvey, Spencer Inch of Vancouver, John McKeen of Bright, George F. Burden of Pokok, Luke Lawson of McAdam, George F. Knox of Queensbury and M. B. McNally of Fredericton.

A Good Councillor

As a county councillor Mr. Scott always took an active part in the deliberations of the board and his practical knowledge of matters pertaining to lumbering and agriculture stood him in good stead and undoubtedly proved of great benefit to the county. Naturally he wielded a potent influence at the board and the younger members were glad to avail themselves of his ripe experience and leadership.

Mr. Scott was twice married, first to Miss Mitchell, a native of Scotland and sister in law of Rev. Gordon Glass a well known Presbyterian clergyman who founded the village of Glassville. By this union there was a family of six sons and four daughters, six of whom are living. They are James M. William J., Capt. John S. and Charles E. Scott of this city, and Mrs. John Campbell and Mrs. W. A. Anderson of Vancouver, B. C. Capt. Scott who is now acting as city treasurer, saw three years of active service in France with the Canadian Construction Corps. Two grandsons of the ex-warden, J. Stanley Scott and Kenneth Scott of this city, also served overseas during the late war. Mr. Scott's second wife was a Miss Arbuckle who passed away five years ago.

The friends of the veteran ex-warden, who are legion will join heartily with The Mail in extending congratulations to him on having turned the eighty-ninth milestone and will cherish the hope that he has still many years of life before him.

CITY OF FREDERICTON.

Notice to Bidders for Combined Concrete Curb and Gutter.

SEALED BIDS will be received at the City Clerk's Office, City Hall, Fredericton, N. B., until 12 o'clock noon, Wednesday, 19th of May instant, for the construction of a combined curb and gutter on Brunswick Street and Charlotte Street, in the City of Fredericton, from Church to Smythe on Brunswick, York to Smythe on Charlotte Street. Our store opens at 8 o'clock a.m., closes at 6 p.m. daily, except Saturday. Open Sat. ev'g until 9 o'clock

DISINFECTANTS

PREVENT SICKNESS WHEN YOU CAN

One of the best preventives is a good disinfectant. You cannot afford to take chances with disease breeding spots at this season.

We have all kinds of disinfectants here and the cost of any of them is very small compared with the good they will do.

STAPLES' PHARMACY

ALONZO STAPLES, Prop.

Taken from River

The engine of the ill fated freight which plunged into the Nashwaak River early Monday morning was hoisted out of the river this morning. A heavy type wrecking-crane brought from Moncton for the purpose was used and things are being put into shape. It is expected that the line will be clear this afternoon. The tender was taken out Wednesday.

Chief Game Warden L. A. Gagnon, arrived here last evening from Woodstock and St. Stephen and left again this morning for St. John and Moncton on official business.

AT THE GAIETY TODAY and THURSDAY

A BIG PLEASING PROGRAM
