EAST SWEEP BY TERRIFIC STORM; TELEGRAPH LINES DOWN AND TREES UPROOTED; SNOW AND SEVERE COLD

Montreal, Oct. 11—The Eastern Provinces of the Dominion were storm swept on Saturday, blizzards raging over the northern sections of New Brunswick and in the valley of the Gulf of St. Lawrence. Snow, the earliest fall recorded in very many years, fell in Montreal and the path of the storm extended eastward apparently attaining its peak along the borders of Quebec and New Brunswick. Quebec City experienced only a light fall but south and east of the city particularly in the counties of Beauce and Dorchester, the fall amounted to several inches.

While there have been no reports of much material damage, havoc was wrought with communications. The two Canadian telegraph companies were deprived of the means of conducting business between Montreal and Eastern points for several hours, poles having been blown down and lines broken. Between Gaspe and the New Brunswick line severe blizzards were experienced, 16 inches of snow having fallen between Newcastle and Bathurst.

The storm appears to have been the extension of the gales that swept the New England coast over the week-end resulting in severe losses to shipping.

Gales Lash Saint John

Fierce gales which attained a velocity of 47 miles an hour swept over the city district on Saturday and Sunday lashed the waters of the bay to fury and levelled to the ground trees and fences in many parts of the city and environs. Heavy rain accompanied the storm on Saturday, but by Sunday the rain had turned to sleet and on Sunday morning there was a covering of hoar frost over grass and sidewalks and the windward side of the buildings and street poles was ornamented with a white coating throughout the day.

Cold Penetrating

While the minimum temperature on Sunday was no lower than 34 degrees the cold was sharply penetrating and the general impression among the citizens was that winter had come in full force. Telephone and telegraphic communication was interrupted, trains and mails were delayed and much shipping was tied up.

The steamer Governor Dingley, Captain Ingalls arrived in port Saturday afternoon from Boston via Eastport and Lubec, Me., with a fair freight and 66 passengers. The steamer experienced very rough weather on the trip from Boston to Eastport, arriving at the latter port on Saturday morning about 4 o'clock. Owing to the heavy weather Captain Ingalls remained in Eastport until 1.30 o'clock in the afternoon before sailing for Saint John. After taking on freight and about 200 passengers Saturday evening the captain decided that the weather was too bad to leave port and the ship remained at her dock until 1.30 this morning when she sailed direct to Boston.

Continued Cold

The unexpected cold snap and heavy gales took the farmers unawares and it was feared that crops might have suffered. D. L. Hutchinson, director of the Meteorological Observatory in Douglas' avenue, said last night that the probabilities for today were decreasing winds with fair weather and continued cold.

The observatory records showed that the rainfall which began on Friday night at 7.30 continued throughout Saturday and until 5 a. m. Sunday brought a total precipitation of 1.17 inches. The snow which fell, Mr. Hutchinson said, was not measurable. The wind on Saturday at 8 o'clock in the morning was blowing at the rate of 25 miles an hour, but within an hour it had increased to 43 miles and by 10 o'clock had attained its maximum velocity of 46 miles. It was still making 41 miles an hour at noon, but gradually diminished during the afternoon and night. On Saturday the wind veered from east, the point of the compass which it most favored, to northeast, southwest and northwest. It was round to the northwest quarter on Sunday and at 6 o'clock in the morning was going its fastest clip of 47 miles an hour. It was quieted to 37 miles an hour at noon but was brisked up to 40 miles again in the afternoon. By 9 o'clock at night the worst was over and the gale had become a wind of 28 miles blowing from the northwest.

Range of Temperatures

The temperatures, Mr. Hutchinson said, had varied from 48 to 42 degrees on Saturday and on Sunday the range had been from 44 degrees to 34 degrees.

He pointed out that the cold was by no means phenomenal since in 1922 on Oct. 19 the city had experienced a temperature of 24.5 degrees and that on Oct. 18 of 1922 there had been snow on the ground.

Mr. Hutchinson was in Halifax on Saturday morning and left for Saint John on the morning train. It was raining in Halifax at the time, but there were no gales there, although the water was rough outside of Halifax harbor. All along the way to Saint John the rain was heavy and in the low lands the land was badly flooded, Mr. Hutchinson said.

Fence Levelled

As it played havoc with everything movable about the city the wind laid prostrate the tall fence of the yard of the court house, which is about 12 feet in height. The fence has been in a precarious condition since the solid rock behind it was excavated a few years ago. It has been propped up many times but its ominous creaking in other storms has made pedestrians passing the spot more than a little uneasy.

The 25-foot cathedral glass window in the Pythian Castle in Union street was smashed in the storm. The window is in the southeast corner of the building which was formerly the historic Congregational church, and was a beautiful example of the glazier's art.

Trees Crash

Two large trees, the property of T. H. Estabrooks, at his residence, Mount Pleasant avenue, were blown down on Saturday by the high wind, one crashing through the roof of a barn on the adjoining property owned by J. King Kelley, while the other was suspended from the ground by the hydro wires. Police Constable Bettie notified the hydro office and linemen were sent to remove the tree from the wires.

A large tree owned by J. King Kelley on his property, 86 Burpee avenue was blown down by the high wind on Saturday and blocked the street. It was cut into pieces by linemen of the New Brunswick Telephone Company and placed on the side of the road.

So strong was the gale of wind on Saturday that trees were destroyed in King Square, Pitt street, Queen street and other parts of the city. The trunks and branches were carted away to the dump by city trucks.

A large billboard in Prince Edward street was knocked down, while a chimney in the building occupied by the Chinese laundryman Ham Lee in Waterloo street was demolished. A number of wires owned by the New Brunswick Telephone Company were blown down in Union street and later repaired by linemen.

SPECIAL ATTRACTION AT THE CAPITOL THEATRE

"The Way of a Girl" is the photo play at the Capitol for the first half of the week with Eleanor Boardman and Matt Moore in the leading roles. "The Way of a Girl" is a peach of a picture, good-humored, vivacious and unique.

We are taken behind the scenes to watch a scenario author at work. The poor devil has but a few days to complete his story, and he settles himself at his typewriter, with several cartons of cigarettes. For his heroine he selects Eleanor Boardman, that young lady walking right out of a photograph to take up her role.

There are many double exposures of the sort, all naturally done, and with comic effect. Eleanor picks Matt Moore to be her hero—the man she will tame. Matt has his own ideas on the subject, however, and we see them, engaged, but wary of each other.

ASPIRIN BRACES UP CUT FLOWERS

Experiments have confirmed the fact that cut flowers may be prevented from fading by giving them an aspirin tablet. The experiments were conducted with chrysanthemums. The treated blooms outlasted the untreated by three days. Flowers which were badly wilted were given fresh water and an aspirin tablet. They revived in two hours, looking as fresh as they did when picked. The leaves, however, remained wilted. The aspirin acts as an antiseptic, interfering with the enzyme which causes the clogging of the stem at its cut surface.

Mr. and Mrs. Ralph Neill of Montreal are the guests of his parents Mr. and Mrs. J. S. Neill.

LUMBER ON MILL YARDS ONE THIRD OF LAST YEAR'S

(Continued from page eight.)

In a short time. Woods operations are well under way in many sections particularly in the north and the total cut is expected to be at least as great as usual. Lath-sawing will be carried on extensively in various sections during the winter. The market for lath is slightly better than it has been.

The American lumber market is up to a slight extent and conditions in the United States are believed to be better than they have been.

Fraser's on Oromocto.

Fraser Companies Limited are to operate more extensively on the Oromocto than has been the case in the past. The sawmill which has been operating at Magaguadavic for some years is to be dismantled and removed to Pride's Landing on the Oromocto a mile and a half below Fredericton Junction. A spur line from the C. P. R. is to be constructed for the mill. Frasers has extensive holdings on the Oromocto.

As stated some time ago the Victoria Mill operated here by Fraser Companies Limited is to saw lath during the winter as it has for several seasons past.

The Stumpage Reduction.

The reduction in the rate of stumpage from \$3 to \$2.50 by the Provincial Government is said by those associated with lumbering to be likely to have the effect of increasing operations on Crown Lands and reducing those on granted lands as it will be to the advantage of operators using both to let their own lands grow and increase in value, and make their cut on the Crown Lands.

Sealed tenders addressed to the undersigned, and endorsed "Tender for Breakwater, Escuminac, N. B." will be received until 12 o'clock noon, Monday, October 19, 1925, for the construction of 310 feet of proposed breakwater, at Escuminac, Northumberland County, N. B.

Plans and forms of contract can be seen and specification and forms of tender obtained at this Department, at the offices of the District Engineer, Customs Building, St. John, N. B., and at the Post Office, Escuminac, N. B.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained therein.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to 10 per cent of the amount of the tender. Bonds of the Dominion of Canada or bonds of the Canadian National Railway Company will also be accepted as security, or bonds and a cheque if required to make up an odd amount.

Note—Blue prints can be obtained at this Department by depositing an accepted cheque for the sum of \$20.00 payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order,

S. E. O'BRIEN,

Secretary,
Department of Public Works,
Ottawa, October 9, 1925.

C. G. D. Roberts Coming Here

Charles G. D. Roberts formerly of this city who has achieved fame as a poet and writer, is expected to visit Fredericton in the near future. Steps are to be taken to welcome him and it is probable that he will deliver a lecture while in the city.
