

AFTER EVERY MEAL WRIGLEY'S

Sealed for You

Wrigley's is made of pure chicle and other ingredients of highest quality obtainable.

But it is no use to make WRIGLEY'S 100% in quality and then reach you in poor condition.

So we put it in the wax-wrapped package and SEALED IT TIGHT to keep it good—for you.

Aids digestion—keeps teeth white—helps appetite.

Wrigley's Doublemint is peppermint flavor in double strength.

Of Interest to the Women

USES FOR OLD AND NEW STRING

String both old and new can be put to many excellent uses in a household. It takes but a very little time to wind string taken off packages when undoing them, and make it into a secure little hank. This can be dropped into a string bag which should be kept for the very purpose. A little economy this but it means a bit of thriftiness which lessens the small items of expense in a home, and these items when combined amount to goodly sums at the end of a year.

Many women do over their dish mops with just such bits of string as this. Those who live in a city can easily replace these cheap mops but it is not always so easy to get one if you live in the country. And if you are at a camp or in some shack in a far distant but charming spot for the summer, utensils are often difficult to re-stock when they give out.

To make the mop of string, wind the string about a cardboard as wide as the strands of the mop are long. Make a very thick covering of lengths of the string. Run a stout but not too thick cord under the strands along the top of the cardboard and tie. Then cut the string at the other end of the cardboard. Remove all the string from the old mop.

Making a Dish Mop.

Arrange the doubled strands of the string about the end of the mop thus uncovered. Pull the drawstring tight in the groove where the old strands were tied about the handle. Tie very tight. With a small tack, nail the two ends of the drawstring to the end of the mop handle.

Bring all the strands down over the end where the tack was just put. Wind a strong (not heavy) cord about them several times, and tie just as tight as you can. Make a second winding of the cord about the strands close to the place where the drawstring tied, then to the handle at first. Tie securely. Shake the mop well and then clip the ends of string to make them even. The mop is done, and one as good as new is ready for use without a penny having been spent.

String Balls.

A ball of string in a knit case, or one made of knotted raffia will be found a great convenience when hung near a writing desk. A wee pair of scissors suspended from the same hook that holds the ball of string will complete this handy arrangement.

More Uses For String.

Dish cloths can be knitted or crocheted from old pieces of string or they can be made from new white string. Rugs can be made by crocheting strong string over strips of cloth. The crocheting gives a pleasing resemblance to weaving, and the rugs are strong and durable.

ORANGE ICE.

Make a syrup by boiling two cups

STRENGTHENS THE STOMACH

Improves Digestion

By Clearing the System of Sour, Fermenting Wastes, Dr. Hamilton's Pills Quickly Restore Health.

If fermentation of food in the stomach can be prevented, you go a long way towards stopping the most frequent ailment of the day. After once using Dr. Hamilton's Pills the stomach is cleared of the sour, fermenting matter that causes gas, heartburn, indigestion and headaches. You will be pleasantly surprised at the smooth, easy way in which Hamilton's Pills tone up the liver, kidneys and stomach. To secure the aid your system needs, use Dr. Hamilton's Pills. 25c. at all dealers.

of sugar and four cups water twenty minutes; then add two cups of orange juice; cool, strain through a fine sieve and color a deep pink with cooked blueberry juice or red fruit coloring and freeze, using three measures of crushed ice to one measure of rock salt.

MOTHERS ARE BLAMED FOR CROOKED LIMBS

London, July 10—England is a bandy-legged nation, declared Sir Arbuthnot Lane, the noted surgeon, at the Health Society meeting held here this week. This fact has long been unknown to the great mass of British people, said Dr. Lane, but it is now being revealed because of the short skirts that women are wearing that barely reach to their knees.

Very few Englishmen or women had straight legs, he said; most of them were knockkneed or bowlegged, or rickety, or had some other shortcoming. Crooked legs, pointed out the distinguished surgeon, are due to early disease which comes from bad treatment and feeding, and the blame for this he placed on Englishwomen.

"Women are by far the most important people in the world," declared Dr. Lane. "They give us all the pleasure and happiness we have, but by feeding their children badly they are also responsible for all our disease and disability."

Incidentally Dr. Lane stated that the finest and biggest men in the American police force came from the west of Ireland where the people, though they lived on a plain diet of potatoes and milk were healthier than in any other section of the British Isles.

SUNNY ITALY IS NOT SUNNY

Rome, July 10—Sunny Italy has seen less of the sun this summer than for a generation.

Instead of the usual rainless period, beginning early in May and continuing until late September, Rome and Naples have had downpours almost daily. A violent storm broke over Naples last night, and Rome has had incessant rain for the last 24 hours. Today was as unseasonable in the capital as hot brilliant sunshine in London in November.

Northern Italy also is having bad weather. Snow seven feet deep is reported in the valleys near Novara.

There is no pacifier that will stop a squawking radio.

Here and There

Tremendously rapid development of forest and water power resources of the Province of Quebec is indicated in the forecast of revenue totalling \$6,000,000 from these sources for the current year. Last year the same resources produced a revenue of nearly \$4,500,000.

Sixty men from the training camps in Brandon and Claydon, England, have been accepted by the Canadian Government and sailed on the "Empress of France" at the end of June. They proceeded to Winnipeg after landing at Quebec and will be placed on specially selected farms.

Saskatchewan exported last year 77.4 per cent. of its total production of creamery butter, according to a statement made by the Provincial Dairy Commissioner. The increase in production in 1925 over that of 1920 had amounted to 126.8 per cent., the output last year totalling 15,946,233 pounds.

Close on one hundred pilgrims from St. Paul and Minneapolis passed through Montreal recently on their way to the famous shrine of Ste. Anne de Beaupre, near Quebec. They were the advance guard of the great army of pilgrims that visit the shrine every year. While stopping off in Montreal they visited the St. Joseph Oratory in that city, also well-known as a shrine.

Hundreds of students and co-eds from Canadian and American universities have been passing through Montreal recently to board ships for Europe in connection with the Overseas Collegiate Tours that have grown increasingly popular of late years. Many of these collegians travel by Canadian Pacific boats, the "Empress of France" on a recent trip carrying over 250 of them.

Clad in gorgeous scarlet tunics, plentifully decorated with gold braid, forty members of the world-famous Coldstream Guards Band, of London, reached Quebec recently on the Canadian Pacific liner "Montcalm" on their third visit to Canada, having been here in 1904 and again in 1911. Under the command of Lieutenant R. G. Evans they will play at Brandon, Calgary, Edmonton, Saskatoon, Regina, Vancouver and the Toronto Exhibition.

The electrification of the main line of the Imperial Japanese Government Railway system from Tokyo to Shimonoseki, 750 miles, has been long projected, and recently the 45-mile section between Tokyo and Odawara has had experimental trains drawn by electric locomotives run twice a day between these points. Owing to the great expense involved it is feared it will be many years before the entire main line can be electrified.

Founded 92 years ago in gardens on the site of which the Canadian Pacific Railway Windsor Street Station in Montreal now stands, the St. Jean Baptiste Society of that city celebrated that event on June 24th last by having a memorial tablet affixed to the walls of the station. The tablet was the gift of Victor Morin, former president-general of the society, who was present and unveiled it.

Negotiations have been completed for the erection, and work will shortly commence, upon a terminal warehouse and cold storage plant, to cost about five million dollars and to be built in Montreal. It is stated that it will be constructed within ten months from the end of June, will be ten storeys in height and will have a total space of 600,000 square feet, of which one-third will be for cold storage. The plant will be built by the Montreal Rail and Harbor Terminals, Limited, and cost will be financed by Municipal Bankers' Corporation of Toronto.

NATIVE WINE BUSINESS HAS DEVELOPED

St. Catharines, Ont., July 10—As evidence of how the native wine business in Niagara district has developed an announcement is made by one of the local wineries that it is making additions to its big plant, which will mean 300,000 gallons capacity to 800,000 gallons.

In making this announcement, the management says that 80 per cent. of the wine it makes is exported. To turn out this quantity of wine this year 25,000 tons of grapes will be required. Last year the average price paid here for grapes was \$73 a ton. This winery is only one of a dozen or more in Niagara Peninsula, all of which are of surprising capacity.

BALLADE OF A COMPLETE FLOP.

Sad the matter of which I speak
Deep the trouble of which I sigh
To the heavens my woes I shriek—
I'd just love to sit down and cry
Though I hate to admit it, my
Battering average is less than fair
Generous gentlemen pass me by—
All that they give me is the air.

Rich man, beggarman, merchant,
shiek,
Actor, congressman, human fly,
Argentinian, Czech and Greek
Give and give, till the well runs dry
Gifts of elderly Scotch and rye,
Gifts of jewels and orchids rare
To a more competent Lorelei—
All that they give me is the air.

What's the matter with my technique
I can't fathom or even try.
I'm intelligent, fond and weak—
Why don't I get a regular guy?
Jus for others, the goose hangs
high;
All love's tokens that form my
share
May be placed in a pig's left eye—
All that they give me is the air.

L'ENVOI:
Princess, tell me the reason why
What's the trouble and how, and
where?
Where did Santa Claus go and die?
All that they give me is the air.
—DOROTHY PARKER in Life.

"Dear," said the boiler-maker,
"Please take our Junior's toys,
He's tooting on a whistle
And I can't stand the noise."

BLUNDERS

WHY IS THIS WRONG?

One of the many annoyances that the postal service has to contend with is the receipt of bundles of carelessly sealed letters, many of which are stuck together. Since letters can be run through the cancelling machines only one at a time, all those stuck together must first be pulled apart by some postal employee. This may result in mutilation of the addresses or in placing the letters to one side until other mail has been handled.

"We are spending too much money foolishly in educating too many people," says a Yonkers millionaire. He must be mistaken. Education doesn't hurt more than a small per cent. of the people who are all right otherwise.

Ma—Were you and daddy good boys when I was gone?
Son—Oh, yes mother.
Ma—And did you treat nurse respectfully?
Son—I should say we did.
Ma—And did you kiss her good night every day?
Son—I should say we did.
