Double breasted business suits, with full, turned up trousers, are still fashionable. Hats, ties and socks are to harmonize with the main color scheme.

CONSUMPTION OF HORSE MEAT IS INCREASING

Berlin, Oct. 8.—More horse meat is being eaten in Prussia today than at any other time in history not excluding the war period, when horses were slaughtered because there was little other meat available.

The ministry of agriculture reports that the increased consumption is not due to a great relish for horse steaks, but to distressing economic conditions. The consumption of horse flesh increased 20 per cent this year over the corresponding period in 1925.

TRAFFIC RULES HAVE INVADDED ROTTEN ROW

London Oct. 7.—Fashionable Rotten Row in Hyde Park, where England's aristocracy has long ridden horseback, has succumbed to a "traffic control" system. For some time equestrians have been riding eight abreast but the authorities now prohibit more than four abreast.

The fault originated with certain riding masters who took out large parties of pupils out for a ride together when proficient. These pupils kept up the practice thus interfering with other riders.

Disputes.

DESCRIBED AS BLOOD SUCKERS

Premier Baldwin Ap-
proves of Collective
Bargaining System.

(Special cable to The Daily Mail by the
British United Press)

Scarborough, Eng., Oct. 8.—Conservative party conference ended today after all phases of radicalism had been denounced in resolutions or from the platform.

Today the delegations adopted a resolution urging the termination of the Russo-British Trade and Diplomatic agreement and the immediate closure of all Soviet agencies in Great Britain. The foreign personnel should be compelled to return to Russia, the delegates decided.

Their solution emphasized the "alarming continuance of subversive propaganda in Great Britain and the Soviet agents flagrant breaches of the agreement."

Sir William Bull, M. P., who moved the resolution, said the Soviet Government had openly declared itself the enemy of Great Britain.

James Gardner, of Stockton-on-Tees, said that all Russian Communists were "blood suckers, who were at the bottom of all British industrial disputes of the last three years."

Another resolution stated the opinion of the delegates that any general strike was unconstitutional and treasonable, and that the participants in such a strike should be prosecuted by criminal indictment or by a bill of impeachment.

Increased production and higher wages comprised the problem now before Great Britain, Premier Baldwin told the meeting.

The Premier did not refer to the miner's resolution to withdraw the safety men from the pits but he said "those who caused the general strike as well as the coal strike learned their theories abroad."

The stoppage had necessitated new laws with respect to trade unions, but the system of collective bargaining, he said was still necessary to society.

VIOLET RAYS IN 1927 TO BE MORE NUMEROUS

Pasadena, Cal., Oct. 8.—The curative powers of the sun's rays are to be greatly increased during the next year according to Dr. Edison Pettit of Mount Wilson Observatory here. He has announced that he has found that the ultra-violet rays of the sun the part of the sunlight that cures some diseases—and also causes sunburn, are to be more numerous in 1927. This is caused he said by the increasing of the spots on the sun. Dr. Pettit figures that the sun will give off about 2½ times as much ultra-violet light in 1927 as it did in 1923 when the spots were less numerous. The 11-year maximum of spots on the sun will be reached next year, he said.
