CANADA'S CLIMATE HAS BUILT UP A MIGHTY RACE; COUNTRY HAS BEEN MUCH MISREPRESENTED

(By John R. Bone, Boston Transcript.)
Toronto, July 3.—Thursday Canada had fifty-nine candles on her birthday cake.

Naturally there was a good deal of stock taking. Columbus of newspapers space was devoted to figures showing Canada's growth since 1867 when the Confederation of the four original provinces became an accomplished fact. The figures are impressive but running through many of the articles is a note of restraint occasioned by the fact that Canada's growth in population does not keep pace with her growth in wealth. The twentieth century, which was to be Canada's is now more than one quarter gone and has failed as far as population is concerned to develop the promise of its early years that inspired Laurier's effervescent phrase.

Progressing With a Joke.

Far seeing observers declare that there is no ground for disappointment other than impatience. Canada's progress in face of prejudices that are not yet wholly eradicated is really amazing. Even the ninth edition of the Encyclopedia Britannica declared that the bleak treelessness of the Canadian prairies was due to the fineness of the soil which made the growth of trees forever impossible. No doubt the effect of that libel still lives on, although on these "infertile" prairies fewer persons than live in the city of Toronto are producing food enough to feed 30,000,000 people. For generations, officials of the Hudson's Bay Company which held inviolate a mighty fur trade monopoly did little to dispel prejudices respecting either Canada's climate or the resources of the soil and rocks.

Prejudice Harmful.

The climate prejudice has done Canada untold injury. Kipling's graphic phrase, "Our Lady of the Snows," while intended to be complimentary, created a distrust which no doubt has accomplished irreparable harm. But Canadians cannot throw stones at Kipling. They have been themselves the chief offenders. A generation of Canadians still living memorized from one of their school readers a poem on Jacques Cartier which told how the bold "sailor of St. Malo" on his return from his first winter in Canada thrilled the home folk with his tales "of a region, hard, iron-bound, and cold. Nor seas of pearl abounded, nor mines of shining gold; Where the wind from Thule freezes the word upon the lips. And the ice in spring comes sailing athwart the early ship; And piled fresh fuel on the hearth to make him better cheer." In these later days minds schooled in the methods of the publicity agent see that even literary merit must be sacrificed if it carries insidious propaganda.

A Mighty Race.

It used to be an accepted belief that Englishmen and English horses deteriorated in Canada. It is early to claim that a distinctive Canadian race has been developed, but the physique and mental capacity of the Canadian army in the Great War was a promise that where the race has developed along even more distinctive lines it will not be a deteriorated race. The part of the prejudice about deterioration of the human species may be said to have vanished, but the part relating to animals still persists in obscure corners despite strikingly successful results by competent Canadian breeders.

The impatient ones do not make sufficient allowance for the effect on Canada of her war effort which has influenced half of the years of the present century.

Many Great Developments.

Despite the hesitation in growth

caused by the war, great basic developments are proceeding which in a few years will produce a rich harvest for Canada. Reference has been made to the now proved fertility of the western plains. An annual wheat production of 400,000,000 bushels by 9,000,000 people is a stupendous fact. And Canada's wheat growing possibilities have as yet only been scratched.

Water power development is another factor which will profoundly affect Canada's future prosperity just as England's coal mines gave her industrial supremacy last century. Canada's nine million people have as much water power at United States' 110,000,000 people, and have been quick to take advantage of it. And as yet in a development which is scarcely two decades old, only a start has been made.

Canada's timber resources, like her fur trade, are an old story. Yet they are having striking current developments. In the production of newsprint during several months this year Canada surpassed the United States. The pulp and paper industry of North America, now a huge industry, is migrating to Canada. By 1928 it is estimated Canada will produce one-third of the newsprint of the world.

It may be that greater than any of these things is the new era that is dawning in Canadian mining. Canada does not claim that all her broad acres are tillable. Including Arctic regions perhaps three-quarters are untillable. In almost every province there are great rocky wildernesses. It used to be a grim boast that these granite-like rocks that cover a great area of central Canada were the oldest known to geology. They were called Laurentian and Huronian. Now they are called pre-Cambrian and the pre-Cambrian is coming into its own. The mighty V of pre-Cambrian formation that enclosed Hudson Bay is known as the pre-Cambrian Shield (of Hudson Bay). It covers more than half of Canada and a little corner of the United States famous for its copper and iron mines.

Of this pre-Cambrian shield Canada owns 1,825,000 square miles, the United States 90,000. Already, by the development of a few small parts of the fringe of this pre-Cambrian shield, Canada has achieved the first place among the countries of the world in the production of nickel, the third in the production of silver, and the third in the production of gold. L. D. Hunt, former head of the mining department of Yale University, predicts that Canada will have second place in the production of gold in 1928. The Hollinger mine alone is producing twice as much as the largest gold mine in the United States and more than the Golden State of California.

"The Cinderella of the Northlands."

"The Cinderella of the Northland," as one writer describes Canada, seems destined soon to meet her Fairy Prince. This year there was no special celebration of Canada's birthday. But the sixtieth anniversary next year promises to be suitably marked. Canada's semi-centennial fell during the war and passed unnoticed. The Empire Club of Toronto are pressing proposals for a huge national celebration next year. Co-operation is sought from provincial boards of education, Canadian clubs, all military regiments, all woman's associations, all boards of trade, the general manager of every bank, all soldier and sailor organizations, the Red Cross Society, the men's and women's teachers' federations, the mayors of all cities, all manufacturing and labor bodies, the leading exhibition associations, all fraternal associations and service clubs, the Y. M. C. A. and Y. W. C. A., the rail and steamship lines, all hotels, all sporting and recreational clubs, the universities, and art and music organizations. Efforts will be made to have a member of the royal family, perhaps the king himself, visit Canada in connection with the celebrations.

WHEN PACKING FOR VACATION NEVER FORGET

You are sure to need some handy remedy for Sunburn, Insect Stings, Thorn Scratches, Sore Places. Zam-Buk has been proved to be the best. Take a box with you.

50c box, all Druggists and Stores.

NEW TELEPHONE EXCHANGE AT HAMPSTEAD

Following their usual progressive policy of development wherever there is sufficient demand for service, the New Brunswick Telephone Company are just completing the installation of a Switchboard and Telephone Exchange in the Village of Hampstead. This Exchange will serve the territory that formerly was covered by the Toll Offices of Central Hampstead, The Quarries, Spoon Island and Hampstead, and the Hampstead Toll Rate will apply to the Long Distance calls to and from the entire territory in future.

Connection is given through the New Exchange to the subscribers of the Jerusalem Mercantile Company, a Rural Company operating in Jerusalem, the territory adjacent to Hampstead.

Following is a list of the subscribers at the new Hampstead Exchange;—

Bartell, Hilding, Hampstead.
Cameron, Geo. B., Hampstead.
Cameron, Wm. R., Hampstead.
Dougan, John A., Hampstead.
Eveleigh, Samuel, Hampstead.
Fenwick, Rev. L. A., Central Hampstead.
Green, Geo. A., Hampstead.
Harrington, R. D., Hampstead.
Jones, Willard M., Evandale.
Merritt, Chas. C., Queenstown.
Merritt, Myles E., Queenstown.
Mooney, B. & Sons, Spoon Island.
Neilson, John, Hampstead.
Palmer, Bruce, Hampstead.
Palmer, F. W., Central Hampstead.
Pennery, Mrs. Ruth, Hampstead.
Rathburn, A. C., Hampstead.
Rathburn, Wm., Hampstead.
Ross, E. Harry, Hampstead.
Scott, Gordon, Lumber Merchant, The Quarries.
Slipp, D. C., Hampstead.
Slipp, G. B., Central Hampstead.
Slipp, Mable G., Central Hampstead.
Stults, F. C., Hampstead.
Stults, Harold C., Hampstead.
Thompson, A. C., General Store, Hampstead.
Thompson, Fred H., Hampstead.
Vanwart, J. Arthur, General Store & Hotel, Hampstead.
Vanwart, L. Nase, Hampstead.
Walker, Geo. W., Hampstead.
Walker, John T., Central Hampstead.

Wasson, C. H., Hampstead.
Watson, C. B., General Store, Hampstead.

Young, Chas. J., Hampstead.
The Switchboard is installed in the office of D. C. Slipp, Hampstead, who has been the agent of the Company at Hampstead for many years.

It is felt that the opening of this Exchange will give a much needed service to the residents of this vicinity. The service to the St. John River section has hereto been restricted to Toll Offices—there being no Exchange between Westfield and Gagetown.

The Telephone has today become a necessity in the business and household, whether in the city, village or in the farm house, and the country sections are being linked up with the system whenever there is sufficient demand to warrant the installation of an Exchange.

Telephone Service is fast becoming universal.

O TEMPORA! O MORES!

Golf on Sunday, Go to Church in Knickers; Pastor Approves.—Headline.

What matter how the shepherd winks At stray lambs lured back from the links?

Certain it is that Satan snickers When elders sneak to church in knickers.

Aches!

Aches vanish when Minard's is used. For headache rub the forehead with Minard's in water. For toothache bathe the face with Minard's and place a piece of cotton saturated with Minard's in the cavity. Quick relief assured. • 57
