GERMANY ENTERS THE LEAGUE

BRITISH M. P. SAYS EVENT IS IMPORTANT

Seven Sailors Were Killed and Fifteen Were Wounded.

BATTLE FOUGHT NEAR HANKOW

Commander of British Cruiser Despatch was Among the Slain.

Special cable to the Daily Mail by the British United Press.
London, Sept. 8.—Captain Wedgewood Benn, member of Parliament and a leader of the Liberal party, told the United Press today that Germany's admission to the League of Nations was the most important event since the war.

"It finally destroys the distinction between the so-called allied and enemy powers," he said, "while its effects in Germany will be considerable, its main significance is that it marks another step toward making the League what, if it is to fulfil its function, it must be, a true Parliament of man."

SEEK TO PUT THE SCOTCH OUT OF GLASGOW

London, Glasgow, Sept. 8.—Glasgow will be the center in the next few weeks of the keenest battle yet fought between the wets and the dries in Scotland when they will vote under the local option act whether to permit the continuance of liquor sales. The temperance party plans to launch a vigorous offensive against the publicans.

Brawny Highlanders already are flourishing posters which say "Scotland's Honor Demands You Stand Firm for Freedom and Vote Wet." The dries in Glasgow enter the campaign handicapped, having admitted defeat in twenty-three of thirty-seven city wards by declining to offer a fight in those districts and centering their efforts in the other fourteen, where they think thirst is slackening.

AIRPLANES TO DROP MAILBAGS BY PARACHUTE

London, Sept. 8.—Wayside stations where air liners can drop bags of mail without stopping or slackening speed are being planned for Continental airways. Experiments under way have evolved a method of dropping mail bags 5,000 feet without damage.

The device is secret, but it is understood that it is a parachute operated by clockwork. The bags fall until within fifty feet of the ground, then the parachute opens automatically and the bags land gently. The stations will be clear space in the countryside reserved for the reception of mail bags.

Croaks Angrily When Visitors Approach the Nest.

(Special cable to The Daily Mail by the British United Press)
Llandrinio, Wales, Sept. 8.—An evolving frog has confounded science by displaying a mother instinct usually thought to be reserved for the higher animals.

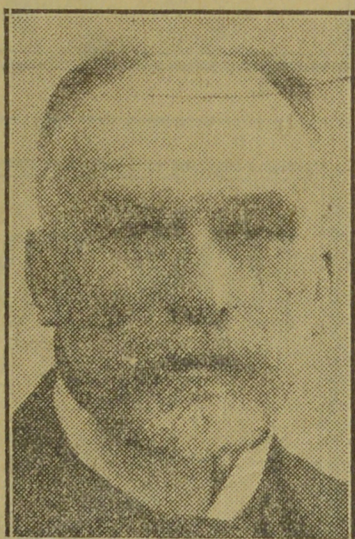

In a hedge bank near here, the frog, a female, is bringing up a family of robins, whose mother apparently had been killed.

She is busy all day collecting worms and flies for her foster family pausing only to croak angrily when curious visitors get too near the nest.

Mr. Boone is a native of Tracey Station, Sunbury County, but has been a resident of Fredericton for fifty two years. With the exception of Mr. Francis McGoldrick he is Fredericton's oldest citizen. Mr. Boone is not as able to hear distinctly as he once could, but otherwise his health is excellent. He does all his own chores about the house, and is frequently seen about the streets.

Germany Admitted To Membership in League of Nations

Has Also Been Given a Permanent Seat on the League Council—Diplomatic Equilibrium of Europe Has Been Vastly Altered—Three Non Permanent Council Seats Created by the League.

(By Henry Wood, United Press Staff Correspondent).
GENEVA, Sept. 8.—Germany was admitted to the League of Nations today, and was immediately elevated to permanent membership on the League Council. The diplomatic equilibrium of Europe and the League was thereby vastly altered.

At frequent intervals during the eight years since the close of the war Germany has been summoned before the bar of allied or other justice to explain, promise or deny. Henceforth Germany may be expected to occupy a comfortable chair at international council tables and her representatives will speak and argue on a parity with the other representatives, not only of the nations which were neutral but also those which opposed her during the war.

Simultaneously with its action in creating a permanent council seat for Germany the League assembly created three non-permanent council seats, thus increasing the membership of the Upper House of the League from ten to fourteen.

There are now five permanent council seats possessed by the British Empire, France, Italy, Japan and Germany. One other permanent seat is being held for the United States.

He arrived on the anchor liner Tuscania yesterday, attempting to hide his identity and eager that whatever might be said about him, would not emphasize the fact that he was "his father's son". Hartford, Can., Sept. 4.—Making the punishment fit the crime is an old device which the village of Southington has thus parodied: making the extinguisher fit the fire. Persons summoning the firemen are expected to indicate whether the fire is small or large. Unless the size of the fire is specified, according to Chief John Cronin the small truck will respond.
