SATURDAY, MAY 22, 1926.  
FOR THE JAZZ AGE.

In Milwaukee the other day a judge, after hearing the testimony in a divorce case, refused to break the marriage bonds that had become hateful to the pair, declaring that neither the husband nor the wife was fit to marry again. Therefore he deemed it his duty to keep the two legally linked to each other. And he gave the custody of the two children, aged 4 and 2, respectively, to the mother.

"To permit those who have shown themselves to be total failures as husbands and wives to marry again, regardless of their fitness," said the judge, "would be a serious detriment to the state and to the welfare of society." This is a searing verdict deliberately pronounced.

Now that marital shipwreck is so common, the question arises whether the man who has proved unfit to be a husband or the woman who has proved unfit to be a wife is fit to be a parent. When both husband and wife have proved themselves unfit what of their children? What chance have they to grow up into fit men or women?

When homes with children in them are broken up the children remain to be reared. This pleasure-loving home particularly needs to think upon the duties of parenthood. Such thinking should prove a sovereign antidote for that form of social sickness which makes men and women unfit to enter, and, having entered, unfit to depart from the married state.

SMOKING AT COLLEGES.

By the time the leading colleges for women reopen their doors for a new academic year in September next young women seeking the higher learning will find it necessary to consider a wide variety of regulations touching undergraduate smoking before making their choice. Bryn Mawr, which started the present stir over this question, will be wide and broad—unless the faculty should have a change of heart in the meantime. The woman's department of Boston University recently decided to go to the other extreme and will insist that all students pledge themselves not to use tobacco in any form. Now comes Mount Holyoke College, leaning in the direction of Boston University and yet leaving a small loophole for mental reservations. Students entering in September "will be considered as having given their word of honor not to smoke while under college jurisdiction." There are probably some middle-of-the-roads yet to be heard from.

NO EASY TASK.

The full story of Amundsen's exploit is still to be told, but it is already evident that the business of travel by dirigible across the Pole is not to be the common or easy thing that Stefansson and other Arctic experts have been claiming it will be. It must be disconcerting to these wise ones to discover that for nearly one-third of the time the Norge was aloft on the journey from Spitzbergen it was fighting gale and fog and its navigators were often in expectation of disaster. The weather conditions at the start from King's Bay were described as ideal, but they did not last—they seldom do last, it seems, in those mysterious regions. Stefansson declares that the winter is the best time for flying in the neighborhood of the Pole, but the winter is a terribly bad time to get up to Spitzbergen, Point Barrow or any other base without striking distance of the supposedly calmer regions of the Pole itself.

A FISHING TRIP.

(From the Toronto Star.)  
Preface—Anticipation, speculation, prognostication, vacation, elation.  
Chap. I. (He's off)—Embarkation, destination, rustication.  
Chap. II. (The Big Fish That Got Away)—Navigation, stimulation, roo-excitement, fascination, imprecation, perturbation, lubrication, illumination, spiffication.  
Chap. III. (Back at the Club)—Celebration, recitation, interrogation, reiteration, irrigation, elaboration, irrigation, equivocation, irrigation, exaggeration, irrigation, prevarication, irrigation fabrication, saturation, inebriation.  
Though only a week old, the general strike produced several stand-

Up-for-England poems. It is believed he fear that poetry would become epidemic contributed in part to the quick settlement.

Now Harvard is sending a scientific expedition to Africa to hunt for "hitherto unknown diseases." This seems a curious proceeding, the prevailing impression being that the market is already overstocked.

The American girl, says an insurance examiner, is becoming measurably taller. So maybe the shortening of skirts has come about through natural causes.

It is strange that agriculturists who have perfected bantam corn and the shot-size pea can do so little about a dwarf lawn grass.

Jack Dempsey, we read, is to fight any man Tex Rickard selects, but if Tex knows his stuff he'll be careful in his selection.

An Egyptian tomb 2000 years older than King Tut's has been discovered. Well, they've got to be older now to compete.

The strange thing is that the average modern Dictator is able to look that way entirely without the assistance of a large black mustache.

To illustrate the fine distinctions the modern psychiatrist is able to draw, a nut comedian on Broadway has been found to be insane.

The January cold bath bore has a brother who gets up to some lake in July and writes back that he has to sleep under two blankets.

Who remembers the old-fashioned tiller of the soil who looked for farm relief in the weather forecasts?

There isn't much hope for the girl who prefers a cake eater to a bread winner.

The great trouble with a family skeleton is that it is never as dead as it seems.

It isn't every man who can sing his own praise without striking a discordant note.

When a man has no music in his soul it is a waste of energy to try to play upon his sympathies?

Just because a man wants to know the whys and wherefore, don't regard him as a questionable character.

THROUGH OUR SIEVE

Cross the street cautiously. You can't take your right of way with you to the hospital.

"Virtue is its own reward," remarked the Man on the Car, "but is not always satisfied with it."

Early rising is not very popular. Most people are willing to let the robins hail the dawn.

Another argument for peace is that the automobiles can kill more people than war.

Life is full of paradoxes. Before a man can settle down he must settle up.

Prohibition is not a complete success yet, but it doesn't have to run Keely cures on the side.

Lima Beane says the time to blush at feminine underwear advertisements was forty years ago.

Men are pretty good after all. The best of them attribute what success they have to their wives and take the blame for their failures.

Thousands of Thankful Mothers

Strongly Recommend Baby's Own Tablets to Their Friends.

Once a mother has used Baby's Own Tablets for her little ones she would use nothing else. The Tablets give such results that the mother has nothing but words of praise for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N. S., who writes: "I have used Baby's Own Tablets for my children, and from my experience I would not be without them. I would urge every mother of young children to keep a box of the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion break up colds and simple fevers and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

PUBLIC OPINION  
WANTS A REAL GIRL.

Editor Daily Mail  
Sir—I'd like to know just where Lulu Warren gets the idea that boys have changed for the worse. What about the girls?

I have yet to see any "modern" girl who is willing to cook, sew and keep house for a man. They're all too intent on having a "good time" to even think of those things.

I personally know a score of fellows who are looking for girls who can and are willing to do the above-mentioned things. If they could get one they would marry her as soon as they could get a license. The trouble is, there are no more of that kind.

The real men in this world far outnumber the effeminate, spineless pests she mentions. Most of the real fellows are praying for a real girl to come along, but I fear that if one did, the shock would be too much for them.  
BILL  
Fredericton, May 21st 1926.

FRASERS BUY  
PROPERTY OF  
SINCLAIR CO.

Newcastle, May 21—It has been rumored in lumber circles that the Sinclair Lumber Co., of Newcastle, have sold their lumber lands to Frasers Ltd. Although nothing authentic has been given to the public, it is understood that negotiations have been going on between the two lumber companies for some time. The Sinclair Lumber Company own 256 miles of Crown lands and 15,000 acres grant. All this is said to have been sold to Frasers Ltd.

The Sinclair Lumber Company was founded by the late Edward Sinclair in 1901. The business was sold to the late Mr. Sinclair's son-in-law, John McKane, who operated the business for some three years when William and E. H. Sinclair, sons of the founder, repurchased the property and have operated it successfully ever since.

GOVERNMENT MEETING.

Will Open Tuesday Night and Continue a Couple of Days—Hon. D. A. Stewart Went Home.

The Provincial Government is to open a meeting here on Tuesday night next. The cabinet will be in session on Wednesday and probably on Thursday. The last meeting was held at the close of the session of the House of Assembly.

Hon. D. A. Stewart, Minister of Public Works, left for his home in Campbellton last night. As stated in the Mail some days ago he inspected the Woodstock-Houlton highway and decided upon improvements. He will return to Fredericton, Tuesday.

ANNOUNCEMENT

Dr. W. W. Clark

MEDICAL ELECTRICAL SPECIALIST  
has opened an office at  
317 QUEEN STREET  
(West End)

Treatments for all acute and chronic ailments. If you are sick or ailing and have tried other remedies without relief—see Dr. Clark and know the joy of good health.

We are ready to fit up your windows.  
Oilcloths in all widths  
Congoleum Rugs in all sizes.  
John J. Weddall & Son  
AGENTS FOR PICTORIAL PATTERNS

Discontinue Supply.  
Saint John Globe—Arrangements have been made by the N. B. Hydro Commission to discontinue supply of electrical energy to the N. B. Power Co., Wednesday next, after Musquash has served the company since February 23 last. The carrying of the Power company load was possible by virtue of an agreement between the commission and the company whereby the company is required to purchase seasonal surplus power from the commission and whereby the commission can secure power from the company at any period of water shortage. Technically, the agreement has worked out excellently as the connection of the two plants in parallel has operated satisfactorily. The agreement enables the Commission to take on heavier loads than would be possible without an auxiliary.

Dr. Gerrard  
DENTIST  
OFFICE AND RESIDENCE  
571 KING STREET

Those old roots, broken down and decomposing dead teeth and pus-laden gums will eventually undermine your general health. We extract such teeth without the slightest hurt by means of our own New Method or for those who prefer chloroform or ether we have every convenience.

HAVE YOUR BAD TEETH REPLACED WITH A SET OR PARTIAL SET OF GOOD AND PERFECT FITTING

OUR NEW METHOD IS IDEAL FOR Nervous People

You do not experience the slightest hurt and as this preparation does not contain cocaine or other poisonous drugs, it does not cause pain or soreness afterwards.

WE HAVE PRICES AND TERMS TO SUIT EVERYBODY

YOUR DOCTOR'S ORDER  
Prescriptions FIRST!

Prescriptions have the right-of-way here. No matter how busy we may be, they are always filled promptly.

Your responsibility to the sick demands that you select your prescription druggist with greatest care. Prescriptions filled here are guaranteed for accuracy.
