REPORT OF PRINCIPAL BRIDGES ON PROVINCIAL NORMAL SCHOOL; GOOD WORK ACCOMPLISHED

Following is the annual report of Principal Bridges on the Provincial Normal School, as taken from the educational report:

The enrollment in the regular classes of the school in September was limited to 350 students in the proportion of one-third, one-half and one-sixth for the Classes I, II and III. As there were nearly 500 applications for admission, the work of selection proved a difficult and puzzling task, with results unsatisfactory to many applicants.

The number recorded in the French Department was 35 in August, so that for the first term to the end of December, 387 students were in attendance.

In January, 16 came back for advance of class and 27 joined the French Department. The total enrollment, therefore, for the year was 430. Of this number, 72 were young men.

Of those in the French Department the first term, 10 who had passed their entrance examination for Class II completed their year's work and passed their final examination for that class of license.

The different Counties were represented by numbers as follows:

Albert, 8; Carleton, 32; Charlotte, 18; Gloucester, 32; Kent, 29; Kings, 40; Madawaska, 36; Northumberland, 34; Queens, 18; Restigouche, 13; Saint John, 40; Sunbury, 12; Victoria, 10; Westmorland, 33; York, 75. Total, 430.

And the following is the registration of the students by religious denominations:

Anglicans, 44; Baptists, 116; Methodists, 44; Presbyterians, 75; Roman Catholics, 146; Other denominations, 4. Total 430.

As the selection of students was made according to marks made at the different examinations, the general scholarship was undoubtedly higher than before. A much larger proportion were High School graduates and all those admitted for the temporary license of Class III had passed the entrance examination for Class II.

For this reason more than the usual number of promotions were won by students beginning the work for Class II and Class III.

For the final examinations for licenses issued by the Board of Education the students were presented:

For Class I, 171; For Class II, 181. Of the remainder, presented for Class III, 62 were of the French Department. On account of their better standing as to the entrance examination, those who obtained a temporary license of Class III will in all probability return for their Second Class License at an early date.

Health Was Gone

The health of the students was uniformly good and the percentage of attendance was larger than for many years. There are few complaints indeed from the staff on that score, and the danger, if any, is rather from overwork than neglect on the part of the students.

In the French Department the attendance was large than for many years, being 62 for the two terms. As there were 33 Acadian students enrolled in the regular classes in September the total of these, therefore, was 95 students, over 20 per cent of the total enrollment, which is a greater percentage than in any previous year.

Teacher Resigns

The Model School suffered, at the close of the year, by the resignation of Miss Mary Gallagher who had conducted the department comprising Grades V and VI for over ten years. Miss Gallagher was of great assistance to the student teachers as she never failed to give them of her best and her supervision of practice teaching was always carefully performed. It is a difficult matter filling the place of such a teacher. Miss Mildred Haines of Devon was appointed to the position and began work in August.

There have been no changes in the other departments as far as teaching staff is concerned. They are successful teachers of some years' experience and exhibit keen interest in doing what they can to aid the Normal School.

There have been no changes in the Normal School staff. During Miss

Lynds year's leave of absence, we were fortunate, indeed, in having the services of Miss Marguerite Porter, in the department of Reading and Elocution, which is a difficult department to fill well.

For fifteen years now a school garden has been maintained in connection with the Normal School. The work of preparation and seeding has been performed for years by the students themselves under the direction of Major Good. What is done here serves well enough to show the students what might be done in the way of a school garden in connection with a rural school. A large number of students in recent years, after leaving the Normal School, have taken up work in the Summer School at Sussex, almost immediately after leaving Fredericton. This is a tribute to Major Good's work in the Normal School as well as to the fact that Dr. Hagerman is one of the lecturers in that course.

Manual Training

The Manual Training Department, although not as many students as formerly are taking the full courses, has been efficiently maintained and will be reported on more in detail by the director.

All the young men spend at least three hours a week and some spend much more than the minimum. All the young ladies spend one afternoon a week with Miss Knapp in Home Economics and this is certainly one of the most popular department in the school. Indeed, the tendency among many of the young ladies to specialize in this connection after leaving the school is quite pronounced.

While our students have given close attention to their professional duties the athletic side has not been overlooked. The young men maintained a well-balanced football team, and their basketball team stood well up in the league.

The classes in Physical Training were maintained throughout the year and all, save one or two short term students obtained B Certificates after a rather difficult examination in class demonstration of teaching this work. The excellent opportunities for instruction in our fine Drill Hall have added much to this course. It would be ideal to have one of our own teachers teach this work, but Sergeant Oliver is careful and painstaking in his work and achieves results. His assistance in training the basketball team and his supervision of play are deserving of praise.

The Cadet Corps, also, under his instruction, has always stood well up on the list in the annual inspection. A number of teachers who are now maintaining efficient Cadet Corps received their first instruction in this Corps.

Medical Lectures

Mention has been made in a former report of the lectures given by Dr. Melvin, Chief Medical Officer under the Health Department. These were maintained throughout the year. Outside of regular hours, as is the case with instruction in Physical Drill, instruction by lectures and by practical illustrations was given in First Aid and all students received their card certificates in this work.

A matter worthy of mention here is the increased attention on the part of students to the course in music. For several years, now a number of young men have won their certificates to teach this subject, and the students work, in chorus singing is pleasant indeed to listen to. Mr. Smith spares no pains in his work and those who pass his tests are worthy, and yet the number is increasing each year.

The Governor-General's medals, which are given for the best standing in purely professional work, were won by Miss Etta Murray of Doaktown and by Miss Aline Slipp of Upper Hamstead. Miss Murray won the silver medal which is awarded for the highest standing among students taking the course of Class I, and Miss Slipp the bronze medal for the work in the course for a License of the Second Class.

Closing Exercises

These medals were presented at the closing exercises held on June 5. A large attendance was present to see the students on closing day, among whom were His Honour the Lieutenant-Governor and several members of the Board of Education. Hon. Dr. Roberts, Minister of Health, delivered an address to the students which was listened to with a great deal of interest. His Worship Mayor Phillips presented the City of Fredericton silver medal to Miss Katherine A. Cox for highest average standing in all examinations for the year.

A happy incident was the entertain-

Had 43 Boils And Carbuncles At One Time

Mr. Cland Melanson, Castleford, Ont., writes:—"In regard to your remedies I have to say that B.B.B. was the only medicine I could get to relieve me of my boils and carbuncles.

I had forty-three at one time, and my doctor told me to take

Burdock BLOOD BITTERS

The first bottle I took gave me such great results that I took three more, and after I had used them I was completely relieved of my boils and carbuncles."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

ment given by the students themselves on the evening of closing day. It provided an opportunity for the students to meet one another socially for the last time and to show their loyalty to the school which has done much for them.

The action of the Board of Education in still further limiting the attendance at the Normal School to 300 students certainly receives the applause of the Normal School Faculty for several reasons. It is all that our instructors can reasonably well take care of. The supply of teachers is at least fully up to the demand and from reports this fact is true in the different provinces of Canada at the present time. Teachers are returning from, rather than going to the west as they did some years ago. There is, therefore, no longer the desirability of assisting the students by government loans. Indeed, some students, next year may be placed in the awkward position, as teacher, in not being able to obtain a position to earn the money necessary to discharge their obligations.

There is, undoubtedly, a feeling growing among our experienced teachers that our highest class of license is too easily obtained and that further professional training should be demanded of our students in training for a license of the First Class. It does not seem unreasonable that a further period of preparation of at least six months should be demanded in this connection and that some experience in teaching should be exacted before our highest class of license should be made permanent.

BARN BURNED.

Fredericton Jet., March 12—Fire of unknown origin which totally destroyed Benjamin Peterson's barn here; also two cattle, four tons of hay, 4,000 feet of boards, 6,000 shingles and some farm machinery and other things. The total loss is about \$1,000 with only small insurance carried.

Sour Stomach

"Phillips Milk of Magnesia"
Better than Soda

Instead of soda hereafter take a little "Phillips Milk of Magnesia" in water any time for indigestion or sour, acid, gassy stomach, and relief will come instantly.

For fifty years genuine "Phillips Milk of Magnesia" has been prescribed by physicians because it overcomes three times as much acid in the stomach as a saturated solution of bicarbonate of soda, leaving the stomach sweet and free from all gases. It neutralizes acid fermentations in the bowels and gently urges the souring waste from the system without purging. Besides, it is more pleasant to take than soda. Insist upon "Phillips." Any drugstore.

Notice of Legislation.

Notice is hereby given that application will be made at the next Session of the Legislative Assembly of the Province of New Brunswick for the passing of an Act to revive, continue, consolidate and amend the Act of Assembly 44 Victoria (1881), Chapter 69, entitled "An Act to Incorporate the Southwest River Driving Company," and Amendments thereto; to re-enact and continue, subject to change and amendment, the rights, privileges, powers, franchises, responsibilities and liabilities granted to or imposed upon the said Company and its stockholders by the said Act and Amendments thereto, and to make provision for the driving of pulpwood and other logs and lumber, and the fixing of the tolls therefor.

Dated at Fredericton this 25th day of January A. D. 1926.
