## MANY WITNESSES CALLED IN TEXAS SHOOTING CASE; WEALTHY LUMBERMAN SHOT BY MINISTER

Fort Worth, Texas, July 19—Grand Jury investigation of the slaying here last Saturday of D. E. Chipps, wealthy lumberman, by the Rev. J. Frank Norris, Baptist minister and fundamentalist leader, will get under way tomorrow. L. H. Nutt, deacon in the First Baptist Church, of which Dr. Norris is pastor, and said to have been the only eyewitness of the killing, is among 14 witnesses summoned to testify before the Grand Jury. Dr. Norris remained silent tonight. He made a blanket denial of interviews and statements attributed to him by several news services.

"I have made no statement since that to the District Attorney, and I have none to make," he said.

No Authorized Statement.  
B. F. Bouldin, Chairman of the Board of Trustees of the church and attorney for the minister, declared that he had not authorized a statement that the First Baptist Church is in possession of evidence that there was a plot to kill Dr. Norris. The church has held no meeting since Saturday and could not issue a statement without a meeting, he said.

J. J. Mickle, who described himself as a "general assistant to everything around the First Baptist Church," earlier in the day had issued a statement telling of the alleged plot.

Mayor Declines Discussion.  
Mayor H. C. Meacham, friend of the slain man and the object of attacks in The Searchlight organ of the First Baptist Church, declined to be drawn into a discussion of the case. He merely repeated that Chipps had given him no intimation that he intended to call on Norris last Saturday.

Dr. Norris today sat in his study, where the slaying occurred, and received callers, telegrams and letters, and conferred with heads of the various departments of the church.

The calm with which he faced 5,000 persons at his Sunday morning service had largely deserted him.

Thomas Jackson, Chief of Detectives, stated late today that the police had uncovered nothing which could be made public before the Grand Jury sits in the case. Asked specifically about the disappearance of Mrs. Fannie Greer, switchboard operator at the Westbrook Hotel, reported to have heard Chipps' conversation with Norris before he went to the church, he declined to answer. Leo S. Grevenberg, room clerk at the hotel, also reported to have heard Chipps' end of the conversation, reaffirmed his refusal to talk.

Speaks of Conspiracy.  
"The First Baptist Church is in possession of evidence that there was a diabolical conspiracy to kill the pastor of the church," declares a brief statement issued by J. J. Mickle of the church and Searchlight staff, this afternoon.

"When the proper time comes," the statement concluded, "this evidence will be proved by unimpeachable witnesses."

After giving the statement, Mickle, who described himself as a former United States Secret Service and news paper man, indicated that there were three principals in the alleged conspiracy.

"They sacrificed the best man of the three," he declared.

"You mean Chipps?" he was asked.

"Yes," said Mickle, and declined to say any more.

Released on \$10,000 bond shortly after the shooting, Dr. Norris made a statement to authorities, declaring he shot in self-defense. Chipps, according to Dr. Norris, came to the First Baptist Church study and threatened his life unless the pastor discontinued remarks about Mayor H. C. Meacham and other city officials. Chipps, the pastor said, took exception to the stand he had taken on the administration of city finances.

L. H. Nutt, an official of the church was the only eyewitness to the shooting. He appeared before District Attorney R. K. Hanger and told a story similar to that of Dr. Norris. Nutt said that Chipps threatened the pastor but that he was unable to describe the actual shooting, as he did not see Dr. Norris obtain the gun. The pastor said he took the pistol from a drawer when Chipps refused to leave the study and made a move as if to draw a gun.

Detectives declared they failed to find a pistol when they searched Chipps' clothing.

## A BRIEF HISTORY OF THE PLOW; ITS HISTORY GOES BACK TO THE DAYS OF ANCIENT EGYPT

The oldest of the world's industries, agriculture, was the first to enlist the aid of the engineer in carrying out more speedily, efficiently and economically the various operations concerned with cultivating the land, gathering the crops, preparing the produce for the market, and doing the host of other things which are part of, or incidental to, farming. The most important operation in agriculture is that of plowing the land and its subsequent cultivation. The principal implement employed, the plow, may truly be classed among the romantic things of the world.

Has Long History.

Its history goes back to the ancient Egyptians, and the early biblical writers were familiar with its use. The Romans, in their long occupation of four centuries, brought plows to this country (England), and it is said they used the wheel and the removable breast, but they found plows in Britain when they arrived. These early plows were of a crude type, the most primitive being entirely of wood. Wrought-iron plowshare or points were, however, used many centuries before the Christian era by the Romans and the Persians. In those troublous times it was often a case of plowing one year and fighting the next so that the plow points would be hurriedly beaten into spears and swords, only to be converted again into shares when the war had come to an end, writes Frank Ayton in Engineering (London, England.)

Big Improvements in 1800.

Up until the year 1785 plowshares were made in wrought-iron, but in that year a patented process of making and hardening shares in cast-iron was introduced, to be followed in 1803 by a method, Ransome's patent, by which the under side of the cast-iron share was chilled. This permitted the upper and soft side of the share to be worn away at a quicker rate, leaving the lower, or chilled, edge always projecting and sharp. The year 1808 witnessed a further and notable advance in the design of the plow, which had up till that time not been constructed

in such a way as to facilitate easy replacement of parts in the field. The new designs introduced overcame this difficulty. From being fashioned as it was in remote times from the branch of a tree the plow has evolved through the ages to the present-day types by definite stages.

Many Different Types.

Plows are constructed in a great variety of types for haulage by animals, and others for use with mechanical power, and for various classes of work, such as ordinary plowing, subsoiling, ridging, draining, etc. For ordinary plowing they are made to turn a single furrow or two, or more furrows at a time. In Africa and certain other parts of the world, where very dry conditions are met with, and the surface of the land is baked into a hard crust, another type of plow is frequently used, known as the "disc" plow. Each furrow is turned by a revolving disc of saucer shape, with a sharp cutting-edge, the plane of the disc being set at an obtuse angle to the surface of the ground, and at an angle in relation to the direction of plowing.

For Special Uses.

In tilling virgin land, tree-stumps and hidden rock are frequently met with. Special designs, in the form of "stump-jump" plows, for withstanding such conditions are in considerable vogue in Australia. These are both of the mould-board and the disc types, so constructed that when meeting a buried rock or tree-stump the plow body or disc will automatically climb or slide over the obstacle and enter into work again without damage to itself. For reducing the adhesion of sticky soils, and in such manner lightening the draft of the plow, many plows are now fitted with mould-boards of a hardened special steel, having a highly-polished, glass-hard surface. With mouldboards of this type a cleaner turnover of the furrow is also obtained. Mouldboards made from the so-called stainless steel would appear to offer advantages by reason of its non-rusting qualities, but at the present time this material is too costly to employ for this purpose.

If Troubled With  
**Diarrhoea**  
YOU SHOULD USE

IT WILL GIVE YOU  
**PROMPT RELIEF**

This valuable preparation has been on the market for the past eighty years, and holds a reputation, second to none, for the relief of all bowel complaints. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

## CATS AND DOGS HAVE MANY OF OUR ILLS

New York, July 17—Invalids who recount their sufferings will be surprised to learn that dogs and cats are subject to the same diseases they have. The weekly reports of the Ellin Price Speyer Hospital for Animals show that laryngitis, gastritis, otitis, conjunctivitis, cystitis and other ills attack canines and felines as readily as they do men and women.

The pampered, petted Pekinese is subject to a great deal of indigestion usually caused by improper feeding and indolence. Eczema marred the complexions of a number of household pets brought to the hospital, and nearly forty required surgical operations. The preponderance of fractures among the surgical cases indicated that the automobile is doing the modern dog little good.

Fifteen of the 269 dogs treated during the first week of July suffered bronchial affections, including asthma, pneumonia and laryngitis and kidney disease, jaundice and Hardner's gland made life unattractive for others. One thoroughbred was suffering from "general collapse" and thirty had ills of the digestive tract. One in every five dogs was threatened with pyorrhea. A number of cats suffered from paresis, meningitis and canker ear.

### THREE LYRICS.

Maryland Yellowthroat.  
Out of the tangle of briar  
Upward and upward winging  
Flitting higher and higher,  
Hark to the Yellowthroat singing—  
Witchery! Witchery! singing.

Song of fulfilled desire,  
With joyous melody ringing  
And a flash of golden fire  
Hark to the Yellowthroat singing—  
Witchery! Witchery! singing.

Beauty Hidden.  
Why, oh why, does Betty wear  
Bands of black about her hair  
Hiding all the lovely gold  
Every eye would fain behold?

If perchance she set it free  
In its glowing witchery,  
Every heart would turn to her  
And become her worshipper.  
'Tis for pity she has bound  
All that gold with black around  
lest, by reason quite forsook  
None at other maids should look.

Song.  
Her cheek has the bloom of May,  
And her hair flames out in red  
And her eyes are tender and grey—  
Who could love another instead?  
Oh, her eyes like the sea are grey  
And her hair like the sun is red  
And her heart, her heart is gay—  
And you'll love none other instead.  
—EDWARD FULLER in Philadelphia Enquirer.

Rub the scalp with Minard's  
four times a week. It removes  
Dandruff, stimulates the scalp  
and makes the hair soft and  
glossy.
