COLLEGE FEDERATION SCHEME WILL BE DISCUSSED TODAY; THE PROSPECTS ARE ONLY FAIR

Halifax, N. S., July 15—The move to concentrate the principal Maritime Universities in one centre under a college federation scheme sponsored by the Carnegie Corporation of New York which body some years ago offered \$3,000,000 to further such a movement was discussed here today with a view to reaching a final decision, and will be finally dealt with tomorrow at a meeting to be held at Sackville, N. B., with a committee composed some time ago to discuss the advisability of Mount Allison University's entering the Federation.

No definite announcements were made at the meetings today and it is not expected that final decision will be reached until the Carnegie officials have reported the result of their investigations to their headquarters in New York.

One Joins Federation.

The federation to date has resulted in only King's College, formerly of Windsor, joining with Dalhousie at Halifax. The prospects for further federation and the necessary action to qualify for the \$3,000,000 grant from the Carnegie Corporation, were said today to be only fair. Mount Allison had previously indicated a willingness to federate, but the matter was left in the hands of a committee which will report at the meeting in Sackville tomorrow, and Dr. Trueman, president of Mount Allison University, would not make any forecast of the recommendation likely to be made by the committee tomorrow. It was understood that in the event of Mount Allison joining the union, a Catholic school in Halifax would also enter on a basis satisfactory to the sponsors of the union.

Work in Ancient Colony.

At today's meeting Dr. Burke and President Paton reported on the suc-

cess of the Memorial College in St. John's, Newfoundland, and so much progress had been achieved as shown in the report, that the Carnegie officials extended hearty congratulations to the Newfoundland representatives.

Dr. A. H. Moore, president of King's reported upon the recent campaign for funds carried on by that college when the objective of \$400,000 in order to qualify for a grant of \$600,000 from the Carnegie Corporation, and stated that only \$325,000 of the total had been pledged within the time-limit set. He was congratulated upon the success of the campaign and hope was expressed that an extension of time would be granted to enable the university to raise the full quota.

Rev. Brother Culhane and Dr. Phalen, St. Mary's College, Halifax, explaining the situation in that school, said that while circumstances made a full federation of Catholic colleges impossible, they were ready to co-operate with Dalhousie, especially in the professional schools, and hoped to build a men's residence for Catholic men who wish to take the work at Dalhousie.

Those present were: Dr. Frederick Kepel, president of Carnegie Corporation, New York; James Bertram, secretary, and Morse Cartwright, assistant to the president, both from New York; Presidents MacKenzie, of Dalhousie University; MacPherson, St. Francis Xavier University; Patterson, Acadia University; Moore, King's University; Trueman, Mount Allison University; Patton, Memorial College, Newfoundland; Chancellor Jones, of the University of New Brunswick; Dr. Burke, Deputy Minister of Education, Newfoundland; Brother Culhane and Rev. Dr. Phalen, St. Mary's College, Halifax, and Dr. Borden, chairman of the board of regents of Mount Allison University.

FRANKAU'S BON MOT HITS THE DRY REGIME

London, July 16—By common consent the prize for the week's best bon mot goes to Gilbert Frankau the well known British novelist who has just returned from America. With the explanation that a saloon in England is called a public house and ordinarily shortened to "pub" here is Mr. Frankau's epigram:

"If you take the pub out of republic you leave relic and that's what's happened to America."

Less publicity has been given to another impression which he received in the United States. He says: "The 100 per cent American realizes that we saved America twice—once in the war, and the second time, most of them think, by the general strike."

HARRY THAW'S MOTHER IS 96, NOW BEDFAST

Pittsburgh, Pa., July 16—Mrs. Mary Copley Thaw, mother of Harry K. Thaw, is 96 today. Although her mental faculties are undimmed by the ravages of time and worry, she is practically helpless and unable to leave her bed.

The victim of an accident several months ago in which she fractured her hip, Mrs. Thaw's life for a time was despaired of by the attending surgeons. She was confined in the hospital for several months and then removed to her home to spend the remainder of her days an invalid.

Aside from her family affairs Mrs. Thaw's great interest is in her charities. No woman in this city has given so abundantly to the needy. Her philanthropies, never advertised, are widely scattered and run into many thousands of dollars each year.

Until the last few years Mrs. Thaw's life was an active one. Due however to advancing age and the worries entailed by the escapades of her son, Harry, she has rarely left her home during the past ten years. Her mental faculties, however, are unimpaired and she spends her time with her various philanthropic plans.

We have just read a statement to the effect that while appearing in two different plays each day recently an English actor had to speak 20,000 words daily. There's a chap who was probably glad to have his wife do all the talking when he got home.

DR. CURREN IS PRESIDENT OF MEDICOS

Moncton, July 15—Dr. L. M. Curren, of Saint John, was elected president of the New Brunswick Medical Society at the session here today. Dr. J. B. MacKenzie, of Loggieville, was elected first vice-president; Dr. C. J. Veniot, of Bathurst, second vice-president and Dr. John R. Nugent, of Saint John, was re-elected secretary-treasurer. Chatham was decided on as the place of meeting of the Society in 1927, the date to be decided on later.

Members of the Council of Physicians and Surgeons were elected as follows: Doctors, J. M. Barrie, of Fredericton; G. A. B. Addy, Saint John; L. R. Price, Moncton; P. H. Laporte, W. D. Rankine, of Woodstock.

The executive is composed of Dr. R. W. Earl, Saint John; L. G. Pineault, Campbellton; E. W. Lunney, Saint John; D. W. Ross, Fredericton; W. P. Kirby, Moncton, and Dr. Alphonse Sormany, Shediac.

The convention closed this afternoon.

A FISH STORY FROM BANGOR

Bangor, Me., July 15—The salmon season on the Penobscot River closed today until April 1, 1927. The catch of the fly at the Bangor pool has been about 350 fish averaging from 11 to 12 pounds, by far the largest on record, a catch of 100 in a season being considered good. The good luck of the fly fishermen is attributed to weather conditions of a backward season, the water remaining cool at the time the "June school" arrived and the fish remained for some time in the pool instead of keeping on through the fishway to the spawning grounds. Catches of from 25 to 30 fish have been made in a single day when the sport was at its height. The largest catches have been made by the veteran anglers, Walter B. Crossman being high line with over 30.

The Gaiety.

"Miss Nobody" is the photo play at the Gaiety for Friday and Saturday with Anna Q. Nilsson in the leading role. Miss Nilsson again hasquered as a man. Another chapter of that exciting serial "The Green Archer" is on the bill.

A watch for the boy

To give a boy a good watch is to awaken his sense of responsibility. His roller skates, his bicycle—these are just boy's things, after all. But a good watch is a symbol of his growing up, a possession of which he will be very proud.

Hay Loaders

The International Loader has rapidly made its way in Eastern Canada because of its strong durable construction and the conveniences which it possesses that are not found on other Loaders of this type. It is practically all steel which is a distinct advantage when it is necessary to leave the loader out of doors.

The adjustable carrier section permits the delivery end of the loader to be lowered about three feet. Thus when starting to load hay on a windy day with the gale sweeping across the rack, the hay is delivered directly to the man on the wagon where he can catch it before the wind has a chance to blow it off.
