

MATCHES

RED HEAD MATCHES
11c Box, 3 boxes 30c, 5 boxes 50c
EDDY MATCHES
12c Box, 5 boxes for 55c.

Fruit Syrup

We have this nice Fruit Syrup in jugs
Only 29 cents.

Toilet Paper

Our usual good quality.
4 cents roll, 7 rolls for 25 cents.

Biscuits

You will need some for the Hot
Weather.

Village Cake 2 lbs for 25c.
20 Boxes Village Cake 11c lb.
3 lbs. Soda Biscuit 40c.
Soda Biscuit (small wooden boxes)
13 cents per lb.
Soda Biscuit (small paper boxes)
14 cents per lb.
2 pkgs. Cream Sodas 25c.
McCormack's Fancy Biscuit
Very low prices.

Canned Salmon

EMBLEM SALMON 15c can.
PECHEUR SALMON 20c can.

Soaps

LUX TOILET SOAP
10c cake, 3 for 25 cents.
PALM OLIVE SOAP
3 cakes for 25 cents.
CASTILE SOAP
7 cakes for 25 cents.
GOOD LAUNDRY SOAP
6 cakes for 25 cents.
SUNLIGHT SOAP
4 cakes for 25 cents.

Flour

98 lb. bag
PURITY \$4.75
5 ROSES \$4.65
5 CROWN \$4.65

Feeds

CRACKED CORN \$2.15
CORN MEAL \$2.15

COAL REFINING IS NOW SEEN
AS AID TO THE BRITISH MINER;
SOME GERMAN EXPERIMENTS

London, June 18—The suggestion said to have been made by the miners in the latest futile conference between the mine owners and workers that the government permanently subsidize that section of the industry devoted to the export of coal should bring home to American readers who have followed the course of American farm debates in the last few years the real nature of the controversy which is now dragging its weary way across British industrial life. Subsidizing the export of coal would be a McNary-Haugen bill which applies to differing conditions but which essentially is the same thing.

It is a problem of a thoroughgoing readjustment to new conditions, and just as the American farm problem could not be settled by the American farm Congressmen, so the British coal problem is not likely to prove amenable to shadowy debates in face of the dour fact that there is now more coal in the world than the world can buy and many more miners in Great Britain than any one cares to employ.

***Demand Law Rules.**

It is for that reason that the announcements from Germany that the dye works and oil companies, including the Standard Oil and Shell groups were preparing a new syndicate for the extraction of oil from coal were received here this week in front page displays almost equal to the miners' and owners' die-hard pronouncements about the immediate question of the striking coal miners.

Confronting the great extension of oil and electric power and the more efficient utilization of low-grade foreign coals, like German lignite, which formerly were more expensive to burn than high-grade British coal, there remains only one hope for the British coal industry, and that is to make British labor so productive and British coal so efficient that the actual power represented by an hour's work of a British coal miner will be so great that the world can afford to pay an adequate price for it.

Coal May Yield Good Oil.

The German announcement means that a definite start will soon be made on the problem of a large-scale application of the low temperature carbonization of coal. It is possible that the breaking up of coal into oil and gas into an ideal smokeless fuel will give a much larger return of final power than is obtainable by any system of burning original coal under any steam boiler now in use. British interests are said to have contributed \$125,000 toward German experimentation in perfecting the process for commercial application, and British coal mines as well as the German will benefit from

the introduction of these efficient methods.

Experiments have been carried on by various private British investigators for some time. One test run on a newly patented process just before the strike showed that it was impossible to obtain from one ton of the lowest grade "slack" coal seventeen and a half gallons of crude oil equal to the best grade of natural crude, 6,000 feet of gas, fourteen hundred-weight of coke, and a by-product of ammonia.

A process developed by another British engineer showed such good results that an American syndicate recently put up \$2,000,000 to obtain the American patent rights. The experimental results of this process yielded from a ton of coal fifteen and a half gallons of oils of various grades, eight gallons of tar acids, thirty-six and a half pounds of sulphate, sixteen hundred-weight of smokeless fuel and thirty-eight pounds of pitch.

Better Burners Are Made.

An advance is also being made in the direction of better machines for burning fuels. Trials just concluded indicate that coal may return to rival the Diesel engine in ships through perfection of the high pressure steam turbine under the guidance of Sir Charles Parsons. When used with an oil burning boiler the turbine delivers the same efficiency as a Diesel engine, but it also can be used with the boiler burning pulverized coal, which, according to tests made last week, is now possible for use after the extraction of oil ammonia in a form, which is as safe and easily handled as oil.

The development of an electric super-power system in which this government is following the example of many other countries in order to obtain a better power return from a given amount of coal, is familiar for repetition. The government is paying less attention to low-temperature carbonization and mechanical development, but the fuel research board has announced that it is studying the steps necessary to obtain a large scale introduction of the economic methods of using fuel.

In the mean time every new announcement of high pressure engines and more efficient boilers anywhere in the world brings new hope to British coal miners. Any sudden increase in the efficiency of coal would have as its first result a lessening of the immediate coal demand in terms of tons. But while American farmers face the difficulty that the world cannot eat more than a definite quantity of bread British coal industrialists believe that the demand for power will be unlimited if the price can be brought down.

THE MIRAMICHI RIVER IS
SECOND ONLY TO THE ST. JOHN

(Telegraph-Journal.)

For many years the vast territory enclosed within the boundaries of Northumberland county has been generally called "The Miramichi" after the well known river bearing the latter name, which is said to mean "a Micmac 'happy retreat'." The remarkable stream includes 220 miles of water and it has numerous tributaries, all of which are important factors in the great lumbering industry of the county. The river is widely known among hunters and fishermen.

The Miramichi rises "in the heart of the ancient wood" far into the interior of the province, its headwaters all but mingling with those of the great Saint John. It drains some 6,000 square miles of a country rich in the resources of field and forest. Many a good ship was launched at Newcastle and Chatham and other river points in the great shipbuilding days of the past. Today more than a score of large milling plants, fringe the river shores from Boiestown to the Gulf of St. Lawrence, more than a hundred miles. Acres of sawn lumber, awaiting transport by rail and ship, tell the story of vast service which the Miramichi country renders to the needy world.

Home of the Moose.

These forests, too, are the home of moose and deer and caribou that in their season lure the sportsman to "trial by combat," and within the law resident and non-resident hunters by the score win glory and reward in their battle with the fleet-footed deer and the antlered monarch of the forest wild. These streams afford many a paradise for the disciples of Isaac Walton. The man with the fishing-rod finds many a quiet pool or gurgling brook or coursing river where speck-

led trout or silvery salmon tempt him, to their own destruction and his immeasurable delight. Experienced guides can be found to show the sportsman to the favored haunts of antlered or finny game.

Three main provincial highways lead to the Miramichi, all well constructed and kept in good repair. From the western part of the province and the New England States the traveler by auto will cross the Saint John River at Fredericton and for more than 100 miles in an easterly direction pass along one of the finest rural driveways in Eastern Canada. An alternative route from Saint John is via Moncton, whence joining with the traveler from Nova Scotia he follows the trunk road northerly for 90 miles through an open country diversified with interesting river scenery, reaching the banks of the Miramichi at Chatham, the largest town on the river, with a population of 5,000. From Chatham to Newcastle, the shiretown of Northumberland county and an important railway centre, the autoist drives by the riverside six miles along a splendid tarvia highway. The traveler by auto from central Canada will naturally follow the road from Levis on the St. Lawrence down the far-famed Matapedia valley and the Restigouche country, along the shore of Bay Chaleur to Bathurst. At Bathurst he may take the direct road 45 miles to the Miramichi, one-half of which is through an unbroken forest country; or he may follow the coast line 90 miles to Burnt Church near the mouth of the Miramichi or 112 miles to Chatham and 118 miles to Newcastle. The roads by either route are included in the improved highway system of the province.

CHAPTER 1: HE'S
A COWBOY, 9; 2 AND
3: HE ISN'T

Detroit, June 18—Peter Marderosian Jr., 9 years old, announced to an admiring group of school fellows his intention of going west and becoming a cowboy.

"But before I go" he said, "I'm going to kill all my enemies. The first victim will be the teacher."

Peter is an unwilling member of the third grade at the Willard School in Highland Park.

"There won't be any more school," one of Peter's friends told his mother. "Peter Marderosian is going to kill the teacher. He stole his father's revolver out of the clothes closet and he's after her."

Calls the Police.

The mother hastily telephoned to the Highland Park police and Detectives Charles Crook and Fred Peters set out for the Marderosian home at 128½ Kendall avenue. The future cowboy playing in front of the house recognized their car as it drew up at the curb. Drawing his pistol he trained it on Detective Crook and ordered him to halt.

"I'll shoot if you take a step" he promised.

Crook continued his advance. The child strained at the trigger, but could not pull it according to the detectives. At the gate Peter made another stand but still Crook moved toward him. Then he ran into the kitchen, slammed the door and pointed the pistol through the glass. Looking over the boy's shoulder, Crook shouted:

"Don't hit him with that club!"

Just a Ruse.

Peter turned and in an instant the detective had thrown open the door and snatched the revolver.

While the authorities ponder what to do with him he is held at the Juvenile Detention Home. Before taking him there Detective Crook made an experiment. He removed the cartridges from the pistol, handed it to Peter and told him to pull the trigger. Peter tried, using both hands, but couldn't.

"That's what I thought" said Crook, "and may Heaven's blessings fall on the man who made the trigger so stiff."

THAT YOUTH PROBLEM.

Editor, Daily Mail.

Sir,—I have read in the Mail the letters on "the youth of today," and I have been getting more and more aroused over the stand the boys are taking.

I insist that the girls are not to blame for all these petting parties that are going on. Any fair-minded boy will admit that a girl who will not pet has no chance of having a good time or being popular. If she refuses to let a boy kiss her, she is put down on the boy's list as slow and she spends her evenings sitting at home. But if she does let a boy "maul" her around as much as he pleases, she is put down as "hotsy-lotsy" and finds herself popular.

Why don't some of these young men who are always howling for the "old-fashioned girl" realize that it is the girl he sees at school or at work who is called unpopular that is the girl he is looking for?

ANOTHER GIRL.
Fredericton, June 17th.

Claudia—I hate you beastly men I hate you! I hate you!
Claud—Well, what are you going to do about it?

Claudia—I'm going to get a job as a telephone operator.

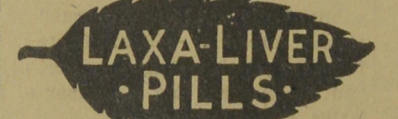

Myrtle—Why did Maud throw over the banker?

Gert—Said she wasn't going to be a drudge all her life and was going to marry a bricklayer or a plumber.

Tongue Was Coated
Bad Taste In Mouth
Every Morning

Mrs. J. R. Adams, Assiniboia, Sask., writes:—"For months I was troubled with a coated tongue, and had a bad taste in my mouth every morning.

One day I saw where your
Milburn's

were advertised for just such a condition as mine, so I went at once and bought three vials of them, but after using one-and-a-half, all my troubles disappeared."

For 32 years Laxa-Liver Pills have been put up only by The T. Milburn Co., Limited, Toronto, Ont.

PALMER'S
Moose Head Brand
Hunting & Fishing Boots

For generations hunters and fishermen all over the continent have appreciated the utter dependability, honest materials and sterling construction of these time-tested boots.

Through brush, streams and the roughest going, these sturdy yet flexible boots will ensure your entire foot comfort. And their wear is proverbial.

Knee High, waterproof with noiseless Flexible Sewed-on Sole of heaviest oil-tanned leather.

Hand made to your individual measure.

Send for Catalogue, showing our complete line.

A Boot For Every Purpose
JOHN PALMER CO., LIMITED
FREDERICTON, N. B.

WE HAVE IN STOCK OUR SPRING AND SUMMER
SUITINGS OF GRANITES
AND SPOTEX TWEEDS, ENGLISH WORSTEDS AND GUARANTEED
TEED BLUES AND GREY SERGES. Also a nice line of SPRING
O'COATINGS. English and American Style plates. PRICES RANGE
FROM \$35.00 TO \$65.00.

Queen St. Fredericton

Anglers, Attention!

SALMON ANGLING SEASON
OPENS MON., MAY 24th.

IN anticipation of this we have imported from England a complete stock of angling equipment from the best and largest fishing tackle manufacturers in the world. It consists of Salmon and Trout Rods, Reels, Lines, Leaders, Fly Boxes, Leader Boxes, Flies, Spinners, etc. Our Flies were selected by experienced anglers and are especially adapted to New Brunswick waters.

We have some astonishing bargains in two Handed Salmon Rods, also Reels and Lines.

If you are in need of a Pair of Hip Boots for the fishing season we can supply them at the Right Price.

Buy Your Fishing Outfit From Fishermen.
