The total production last week was 928 eggs and the grand total at the end of the 32nd week was 22,719.

Stone in the Fire-Nozzle.

Damage to the amount of some hundreds of dollars was done late Monday afternoon by fire at the residence of J. Brown Maxwell, George street, immediately adjacent to the C. N. R. crossing. Mr. Maxwell and family had left but a few days ago for their summer home in Lincoln. The fire evidently was started by a spark on the roof at the rear of the building. The firemen had to work some time on account of the fire getting in some hay stored in the building. Trouble was caused by a small stone working into a fire-nozzle. Children are said to have the habit of unscrewing hydrant caps and dropping in stones and other objects. The fire pressure often drives these articles into the nozzles and the firemen are delayed until they are removed.

Some Good Advice From the Magistrate—Had Been Under Arrest For About a Fort-night.

The vagrancy charges which attracted great attention in this city during the past fortnight as the result of the arrest of two young girls, were disposed of finally in the police court this morning when the second of the girls was let go by Magistrate Limerick. His Honor gave some good advice to the accused before letting her go and warned her against late hours and questionable company. As the girl had been in custody for about a fortnight she accepted her release joyfully.
