OCTOGENARIAN WALKED ONE HUNDRED AND ONE MILES, FOUND IN SHEDIAC

Shediac, Sept. 5—David Gallant, aged 84 years, who has been missing from his daughter's home on the Black River road, near East Saint John, since Aug. 28, reached Shediac on Saturday, having traveled all but five of the 106 miles on foot. Chief of Police William E. Gunn recognized the man from the description printed last week and took him in care. He is now comfortably cared for in the town hall awaiting the arrival of his relatives from East Saint John who are expected tomorrow.

The old man was in an exhausted condition when the Chief of Police noticed him and was walking up the main street in town. Today he was somewhat recovered from the severe strain of his long hike and told of his experiences on the way.

Tells of Trip.

He said that with the exception of a five mile lift in an automobile between Hampton and Sussex, he had walked all the way from East Saint John. He had been feeling a bit restless and wanted a tramp and had recalled that someone residing near Shediac whose identity he has not disclosed, had borrowed his shotgun and also owed him some money, so he set out to meet the man and obtain his property. He took a large supply of food with him when he set out and also carried a sum of money. He stayed at farm houses on several nights, but on two nights he slept out under trees. He was not asking for food or for assistance and always offered to pay for anything he asked for. One night he slept under a tree because a farmer had refused him permission to sleep in the barn and he caught cold, from which he is still suffering. He walked along the highways for

most of the trip but followed the railway from Moncton to Point du Chene. He arrived at Point du Chene on Friday and spent the night there at the home of his nephew George Gallant.

Sailed Out of Saint John.

David Gallant was born near Cape Egmont in Prince Edward Island, and about 30 years ago came to Shediac to reside. He lived in this vicinity for about 10 years and followed the sea, serving under Captain McDonald, father of Mayor E. R. McDonald of Shediac. For about 20 years he shipped as cook on two-masted and three-masted vessels sailing out of Saint John. About two years ago he went to reside with his daughter, Mrs. John McDonald on the Black River road.

Word was sent to Sergeant Detective Powers in Saint John as soon as Gallant had been located and it was said he would be well cared for here in Shediac until such time as his relatives arrive.

Trap Nests

If you are in the Poultry business go at it systematically.
Keep tabs on your hens by trap nesting them.

It's the only way to pick out the boarders.

FORMER YORK CO. MAN SOME SPUD GROWER

(Houlton Times.)

A former New Brunswick man, who has become wealthy and famous as a potato grower, is believed to be beating records this year by having what is said to be the greatest acreage of potatoes any individual has ever grown in Aroostook county—and perhaps in the world. This man is Walter R. Christie of Presque Isle, a native of Keswick Ridge, York County, N. B. who informed a representative of the Times on Monday that he had 1100 acres of potatoes growing. If he averages 100 barrels to the acre which is said to be a minimum for him—he will have at least 110,000 barrels of potatoes to market this Fall, which will probably bring him more than half a million dollars. In fact if prices skyrocket as they did with last year's crop Mr. Christie's 1926 potatoes may sell for as much as a million dollars.

Some of the finest fields of potatoes in Maine's famous potato belt are included in the vast acreage which Mr. Christie planted this year and the general expectation is that he will average considerably more than 100 barrels to the acre.

Growing conditions have been so favorably the past few weeks that the expectation now is that potato digging will be under way in Aroostook county by the usual date this year after all, instead of being several weeks late.

Early marketing is quite a feature in Aroostook potato business for the potatoes sometimes bring unusually high prices.

At present new potatoes are selling at 55 cents a peck in Presque Isle retail stores.

(Mr. Christie is a native of Keswick, York County.)

She—So you don't remember me?
He—My dear girl, I do and I don't.

You are—
She—Mollie Jones. Now don't—
He—How stupid of me, and yet there is something different.

She—Oh, I've had my knees lifted since I last saw you.—Life.

Donald's music teacher had advised him to practice while on his vacation. His postcard read: "There is no piano where we are staying, so I went and bought a mouth-organ."

SAINT JOHN EXHIBITION FORMALLY OPENED ON LAST SATURDAY NIGHT

Mayor White Denies That Saint John People are Discontented—Hon. Lewis Smith and President F. A. Dykeman Also Among the Speakers.

Saint John, Sept. 6—With the explosion of two skyrockets at 9.30 o'clock Saturday night, at the conclusion of the address of His Worship Mayor W. W. White, who officially opened the Saint John Exhibition, the "big fair" of the Maritime Provinces was declared under way for 1926 and is expected to welcome within its gates today between 15,000 and 20,000 holiday seekers, from the ages of nine and under to ninety and over.

The interior of the main building is filled almost to capacity with brilliant displays, the livestock and dog shows are expected to be the best in years, the pike has been fitted out with amusement features calculated to enthrall young and old, and the out-door vaudeville bill has brought the cream of the show-world performers to the City of Saint John.

"It is reported," said Mayor White in his address, "that Saint John has a dissatisfied and discontented people. I deny this emphatically. We have been calling strenuous attention to the fact that we wanted our just dues and nothing more. From public utterances and press reports, I would say that our case has been won."

F. A. Dykeman, president of the Saint John Exhibition, made a brief address Saturday night and declared that the displays this year showed progress along many lines and this brought to our attention that Saint John was not standing idle. Hon. Lewis Smith, Minister of Agriculture, eulogized the natural gifts of New Brunswick and said that this province compared favorably with any other part of the Dominion.

Main Building Filled.

With the exception of one or two booths, all space in the main building has been taken up by exhibitors. The displays are of a high order and skillful ingenuity has been shown in the fashion in which the goods are displayed.

On the main floor the Atlantic Sugar Refineries, Ltd. the C.N.R. and the C. P. R. have striking displays. The C. N. R. booth, in charge of F. L. Dougan, traveling passenger agent, of Moncton, and W. H. Tout, Atlantic

Region safety engineer, is backed with a highly artistic canvas depicting Jasper Park and the Rocky Mountains territory through which the C. N. R. lines run. Electrically lighted pictures of various scenic spots along the C. N. R. lines make this booth a striking one.

Railway Displays.

The effect of the decoration of the C. P. R. display is strikingly artistic. Portraits of the various hotels, summer resorts and parts of Canada through which the C. N. R. passes are attractively shown. Harold Hamilton and Douglas Allan are in attendance at the booth.

The south wing of the second floor is filled with displays of women's work, and the products of returned soldiers' hospital workshops. A considerable portion of the soldiers' work comes from the Sanatorium at River Glade and is of a high order. Children's toys, parlor lamps, brushes, trays baskets and knicknacks of all descriptions. The emergency hospital of the Saint John Ambulance Association, in charge of Miss Irene Barber, V. A. D., and (Miss Dorothy Purdy, V. A. D., is located in this part of the building. The Ambulance Association presents a dainty and attractive appearance. Shields and cups for proficiency in first aid and other medical work are on exhibition here.

Art Show Instructive.

The displays in the art room, adjacent to the women's work department, are of an exceedingly interesting and instructive nature. Several portraits, said to be the finest reproductions of the work of the masters of the different schools, have been secured for exhibition purposes from the Boston branch of the Medici School of America. The "Mona Lisa," Raphael's "Madonna," Sir Joshua Reynolds' "Age of Innocence," Whistler's works and those of Margaret W. Taunt, famous painter of fairy tale illustrations, are outstanding exhibits.

Work of the pupils of the Saint John Art Club, charcoals, oils, china, brass, leather and wood work, are displayed in another section of the fine arts department.

LESLIE VYE OF MILLBANK DIES BENEATH OVERTURNED CAR NEAR NEWCASTLE

Newcastle, N. B., Sept. 5—Pinned beneath an over-turned automobile for about 20 minutes before help could be brought, Leslie Vye of Millbank, aged 48 years, died a few seconds after assistance had come and a short while before he was extricated from beneath the car. A second occupant of the car, a man named McKay of Bridgetown, also received severe injury in the accident being also caught beneath the car but his injuries were on one arm only.

The accident occurred shortly after midnight on Saturday about two miles above Newcastle at Eel Ground on an Indian reserve. The two injured men were accompanying a man named Sleeth, of Douglastown, who was driving the car. The party was coming towards Newcastle when the car went into the ditch and the forward wheel snapped off. The automobile overturned, crushing Vye horribly.

Goes to Rescue.

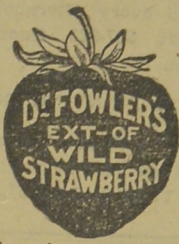

At the time of the accident Sleeth was thrown forward from the car and, although he was quite badly bruised and cut, he was able to come to the rescue of his companions. There are very few houses in that locality but he roused all the neighbors and returned to the scene of the accident with all possible speed. Vye was crying out for help from under the car as the rescue party came up but by the time they were close to the overturned car death had claimed him and his cries were silenced. The body was taken from beneath the car and carried to the rooms of Undertaker Bell.

The other victim, McKay, was caught by one arm only and was got out from under the car safely and his injuries cared for.

Inquest Ordered.

Coroner Dr. J. A. Bell decided to hold an inquest at once and having empanelled a jury made an inspection of the scene of the accident. He gave

TATTOO PARADES VERY POPULAR IN OLD COUNTRY

London, Sept. 3—Owing to the great success of the Torchlight Tattoos given in the provinces this year, many applications have been made to the War Office from towns all over the country.

It is impossible to accede to all the requests, and the Army Council will have to settle, as a matter of policy, which shall be granted. Wherever possible, the history of the local regiment has been worked in as a pageant which has added greatly to the attraction of the display from a spectacular point of view, and generally the financial results have been excellent. Sir Charles Harrington, G. O. C. Northern has been besieged by requests, but will not undertake to make any promises until the training season is finished.

Another One Likely.

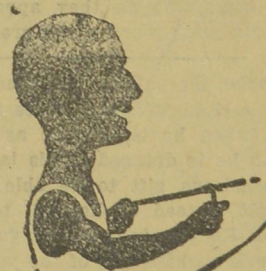

It is probable, however, that a great Tattoo will be held in the Newcastle area, where the history of the Northumberland Fusiliers and Durham Light Infantry offers a fine field for a pageant. These stirring military displays have given a fillip to recruiting, especially for Territorial units. London is promised a more thrilling experience even than a Tattoo—nothing less than a series of air raids. These raids have already been carried out in a preliminary way by the Royal Air Force.

People Puzzled.

People have been puzzled by searchlights at night, and sometimes awakened by the roar of engines as the aircraft passed overhead. This aerial war has been planned to test London's sky defences. It is sound, practical work for both pilots and for those on the ground who have to operate the anti-aircraft guns and the searchlights. An ingenious type of sound locator is just now being tested. It is infinitely better than anything that was in use during the war, and, with the searchlights, forms the eyes and ears of the gunners. The searchlights have an important part in these operations. The sound locators first ascertain the approximate locality of the plane, then the searchlights scour the immediate area, sometimes with success and sometimes vainly. In any case, the new method of locating an approaching machine is of immense value.

A LITTLE THING

THE power called habit is a little thing * * * *
but it can pull your eyes open at a certain hour every morning, determine whether you dress the right or left foot first, drop a fixed amount of sugar into your breakfast coffee—free your mind for thoughts that demand actual choice.

The little habit of glancing over these advertising columns daily, checking this and that which appeal to you, frees your mind from any guesswork about the merits of a product; helps you choose wisely when you buy. If you are familiar with newspaper advertisements, you can discriminate merits, weigh one product against another, these truths against those. And the habit of buying only advertised goods takes the hazard out of shopping; puts in a good, sturdy sure.

Start a Friendly Little Habit That Will Pay.
Read the Advertisements in These
Columns today.
