## Britain Urged to Develop Competitive Air Service

(Special to The Daily Mail by the British United Press.)

LONDON, Aug. 22—The reported intention of the Junkers firm of Germany to establish an airplane service from Ireland direct to the Continent, flying over England, has aroused the keenest demand for Britain to undertake the development of a competitive aerial service.

The Junkers company is said to be planning to connect with trans-Atlantic liners at Queens-town, to take off their passengers and carry them to Dublin, Liverpool, Hull, and over the North Sea thus linking up with the present German air lines, which already have a monopoly in Central Europe.

Lord Beaverbrook's papers are demanding that before this is allowed Britain's "disgracefully humiliating position in civil aviation" should be completely overhauled.

He called on the town marshal, who produced a large gilded key which he presented to the lodge to open all doors to greatest freedom. His remarks were enthusiastically received.

Past Chancellor Mydes Saunders of Saint John, replied to this address of welcome. Tantramar Lodge, the local lodge, was represented by Chancellor G. A. **Manager of Royal Bank at Georgetown Thinks C.N.R. Cold Storage Plant at Halifax Will Be a Great Help.**

(Special to The Daily Mail.)

Saint John, Aug. 22—The export of butter and cheese and other like products to British Guiana and the West Indies should be materially increased by the provision of a cold storage warehouse at Halifax, N. S., declared Mr. J. Dalgleish, manager of the Royal Bank of Canada at Georgetown, British Guiana on his arrival here yesterday on board the S. S. Canadian Pathfinder of the Canadian National steamships ex British Guiana, the West Indies and Bermuda with a cargo consisting of sugar, molasses, cocoa, coconuts etc. A cold storage warehouse is now under construction at Halifax. The corner stone of which was laid by Sir Henry Thornton, K. B. E., President, on Monday last.

British Guiana, Mr. Dalgleish stated, offers a good market in addition to butter and cheese for dried codfish and flour, fairly large quantities of which are imported from Canada at the present time. The principal exports of British Guiana are sugar, copra, rice, daukite diamonds, the diamond trade amounts yearly to between \$700,000 and \$800,000. Rice is principally exported to the West Indian Islands while the sugar goes to Canada and the bauxite principally to the United States, copra is general while most of the diamonds produced find their way to Great Britain and Amsterdam, the great diamond market of the world. Mr. Dalgleish considered that British Guiana offers excellent opportunities for tourists as the climate is very delightful there being no extreme heat and the scenery is of a character distinct from that of the West Indies.
