THE U. S. DRY LAWS.

Prohibition is ruining the health of the American people in the opinion of noted foreign surgeons attending the convention of the American College of Surgeons at Boston this week.

"Americans eat too much fats and carbohydrates and drink so much water with them that systemic poisons are generated for lack of alcohol to burn them up," declared Herbert Schlink, of the Royal Prince Alfred Hospital, Sydney, Australia.

"Prohibition was defeated in our State, New South Wales, three weeks ago by four to one on a referendum vote, and we think the result proves the good sense of the people," Dr. Schlink continued. "I am impressed by the difference in the looks of Australians and you Americans. Our folks look so much more healthy and vigorous."

"Americans as a nation suffer from indigestion because body poisons are not burned up by the moderate use of wines and beer. We have controlled drinking inaugurated as a war-time measure in 1915, and since that time I have never seen a drunken person in our city."

Sir George Syme, president of the Australian College of Surgeons at Melbourne, Australia, agreed with his colleague, declaring: "I always have noticed the healthy look of my country men after a visit to America. The secret drinking in this country is far worse than moderate open drinking."

"One of the worst features of American prohibition, it seems to me, is the disrespect for the law which your young people have developed along with it," was the comment of Dr. Farquhar MacRae of Glasgow, Scotland. "As prohibition now works in this country, I think you would be far better off with modification of that law. A moderate amount of liquor does not make a drunken population, but rigid prohibition seems to make both drunkards and law-breakers."

WHEAT PRODUCTION.

Canada's rise to eminence as a wheat-producing country forms by all odds the most far-reaching feature of the Dominion's economic advance during the present century, and the preliminary estimates of this year's production, as recently issued by various authorities, indicate that the 1928 crop will be one of the fascinating pictures of Canadian development. It is hard to realize that the wheat crop for the opening year of the twentieth century fell below 60,000,000 bushels and that not until 1905 did the harvest for the first time reach 100,000,000 bushels. In the ten years following 1905 new records were reached good for the following four years. Now, according to the best information, the 1928 crop has well exceeded the coveted figure of 500,000,000 bushels, and the Dominion has for the eleventh time since 1900 surmounted all previous high marks for wheat production.

According to a correspondent of Willison's Monthly the Province of Nova Scotia has had a wonderful tourist season. He says: "It has been a tremendous summer for Nova Scotia. Even the hearts of inveterate pessimists have been warmed, and their voices have been stirred to something like enthusiasm, as they have seen such indubitable tokens of better times they said would never come. The influx of tourists has been beyond a dream. At this time of writing one still hears it remarked that our streets are thronged with unfamiliar faces and that whatever else is missed "the American car" is everywhere to be seen."

It is reported that an appeal is to be taken to the Privy Council against the decision of the Supreme Court of Canada, which declared woman to be

inelligible to sit in the senate. It is understood that the costs of both sides will be borne by the government. Even should the right of women to sit in the Senate be established what good it is going to do? There are not nearly enough senatorships to supply the men folks. For instance what chance would a woman have of landing the New Brunswick vacant senatorship?

The departure of Mr. and Mrs. J. W. Spurden from the city to Oklahoma, where they will make their future home will be deeply regretted by all classes of citizens. Both Mr. and Mrs. Spurden emexplifying the very highest type of christian citizenship. Mr. Spurden was for many years manager of People's Bank of New Brunswick, which had its head office in this city, and while discharging his duties with zealous care he found ample time to devote to church work. Besides serving as deacon and Sunday School Superintendent in the Brunswick Street Baptist Church he was for many years a valued member of the church choir. Unfortunately Mr. Spurden is no longer a young man and his object in removing to the west is that he may spend the evening of his life with the only surviving member of his family.

Highway crossing accidents in Canada during September totalled 33, in which 15 persons were killed and 44 persons were injured. Figures compiled by the Board of Railway Commissioners indicate that automobiles were involved in 32 of these accidents. In all but four cases the crossings were unprotected. It is about time the local crossing was eliminated in the interests of public safety.

NOWADAYS YOU PRESS A BUTTON

Or perhaps a switch, or some little gadget, and a lot of things happen around home that lighten labor and banish trouble. A Whirling Fan brings a cooling breeze, and a little copper, dish-like affair throws out a sizzling blast that warms the room in no time. Another button boils coffee, toasts bread and cooks waffles. Another does a better job than a broom. Another makes a happy laundress out of a dismal washwoman. Another one cools the ice-box. Another—but why go on? Labor and time saving devices have come and are today within the reach of the humblest home. And one of the chief reasons why they have come and why they are within the reach of the humblest home is the power of advertising. Advertising has carried the news of these better ways of doing things to every home. It has created a desire to possess them, and countless thousands have purchased them, and live better because of them. Reading advertising not only tells you about new, helpful mechanical devices for the home, but it is an unfailing guide to reliable products. READ ADVERTISING REGULARLY. IT POINTS THE WAY TO BETTER LIVING.
