Prospects are Bright for Industrial Peace in G. B.

Many Observers Previously Skeptical Now Admit This—Great Importance Attached to Recent Statement by Sir Alfred Mond—Experts Will Examine the Eiffel Tower—May Have to be Abolished.

London, Jan. 23—Many observers, previously skeptical, now admit there is strong possibility of industrial peace in Great Britain.

Well informed circles find two indications in Sir Alfred Mond's recent statement at the joint conference of employers and trades union representatives, that settlement of industrial relations involved examinations of problems so "better organization could exist in industries by means of amalgamation, nationalization and the introduction of new process and new methods, both technical and administrative."

Eiffel Tower is Doomed

Paris, Jan. 23—A commission of experts of the city of Paris will crawl around the whole Eiffel Tower in May to determine whether it should be demolished. Private engineers said today the tower is doomed and that the highest structure in the world must be torn down within ten years before it falls down, a catastrophe which would threaten the lives of thousands of residents in one of the richest quarters in Paris.

The ministry of interior, in announcing today appointment of the commission of experts, said that examination last May resulted in the replacing of many rivets, the tower was pronounced safe, however.

MINTO MAN KILLED IN A COAL MINE

Alfred Flewelling Met Tragic Death on Saturday Afternoon—The Roof of Mine Caved in.

Minto, N. B., Jan. 22—The caving in of the roof of the Clarence Yeaman mine brought sudden and awful death to Alfred Flewelling, of South Minto, formerly of Cumberland Bay, at about 12.30 o'clock Saturday afternoon. He went into the mine at 12 o'clock and it was while he was in the act of timbering his level that the accident occurred. He was killed instantly.

He was found by his fellow workers half buried and in a position which showed he had been stooping when the roof collapsed. He was extricated in a few moments and although it was found there were no bones broken it was believed he had been crushed internally. Blood was coming from his ears and mouth and his head and face were swollen and purple. Dr. Nugent, the coroner, viewed the body and gave permission for burial, stating no inquest would be necessary. The remains were taken to Minto by the brother of the dead man, Melvin Flewelling, of this place, and will be interred at his former home, Cumberland Bay.

The man who met so tragic a death was 41 years of age and besides his brother in Minto he leaves three small children, all boys. His wife died a few years ago. He had been employed in mines for several years, having first worked for the Avon Coal Company and been in its employ for about seven years. He had been working in Clarence Yeaman's mine for more than a year. The mine is on the Grand Lake road, just below Minto.

Free speech: Sometimes the thunder of statesmanship, sometimes the rumble of "blah."

AERONAUTICAL CONFERENCE AT THE CAPITAL

Ottawa, Jan. 22—Canada's first aeronautical conference the initial annual general meeting of the Air League of Canada, which will bring representatives of clubs and aircraft manufacturing concerns from all over the Dominion to Ottawa, will open tomorrow morning. His Excellency the Governor General will be present at the inauguration ceremonies and it is expected the Hon. J. L. Ralston, Minister of Defence and Hon. P. J. Veniot, Postmaster General will attend the sessions.

Major General J. H. MacBrien organizer and temporary chairman of the executive of the league will be in the chair when more than 60 representatives of the 22 branches of the league, flying clubs from Halifax to Vancouver and representatives of aerial transportation and aircraft manufacturing companies as well as aviation publishing houses take their place as delegates.

In view of the establishment shortly of a faculty of aeronautical engineering at Toronto University, Professor Parkin of the university will be a delegate at the convention.

The agenda for the meeting includes the election of a permanent slate of officers, plans for a membership drive to be launched in every city and town in Canada and confirmation of the aims and objects of the Air League, and reports on progress of flying clubs already established.

The sessions will be concluded Tuesday.

HELIUM GAS DISCOVERED

(Special to the Daily Mail by British United Press)

Berlin Jan. 23—The first known helium gas in Europe has been found at Ruesselsheim, Baden 600 metres under the surface. The deposit was said to be extensive.

NEW INVENTION TO BE BOON TO POLITICIANS

Bell Telephone Laboratories Have a Device to Throw the Human Voice a Mile.

(Special to the Daily Mail by the British United Press)

New York, Jan. 23—Politicians, boxing announcers and champion horse callers were shamed to approximate silence today with announcement that a loud speaker had been perfected to throw the human voice a mile without distortion.

The speaker has been developed by the Bell Telephone Laboratories. The powerful instrument was designed primarily for public addresses and for reproduction of a speech and music in connection with talking motion pictures.

Telephone officials estimated that the device would enable 1,000,000 persons in an area up to a mile away to hear public addresses and other reproductions of sound.

MR. A. G. TURNEY, PROVINCIAL HORTICULTURIST, INSPECTS THE FRUIT TREES PURCHASED IN U.S.

Attended Annual Meeting of State Horticultural Society at Rochester—Ontario Prices for Young Trees are Too High—N. B. Apple Growers Urged to Improve Their Production and Marketing Methods.

Provincial Horticulturist A. G. Turney has returned from Rochester, N. Y., where he attended the annual meeting of the New York State Horticultural Society and also inspected 5,000 young apple trees which have been purchased in New York State for distribution in 1928 by the New Brunswick Fruit Growers' Association under their co-operative purchasing plan.

Incidentally Mr. Turney visited Montreal, which is the principal market for New Brunswick's export apple trade, and in a statement regarding his trip issued today expressed the view that "the next twenty years should show the Eastern portions of the United States and Canada supreme in the quality of pack as well as in quantity of production of apples in North America". He also issued a warning to New Brunswick apple growers to "improve their production, packing and marketing methods all along the line" if they are to hold "the good reputation which we have built up for our apples on the Montreal market."

In explanation of the New Brunswick Fruit Growers Association's action in going into the United States to purchase nursery stock, Mr. Turney says that restrictions prevent importations from Nova Scotia, while Ontario prices are at least one third higher than the quotations at which purchases were made in Northern New York.

Mr. Turney's Statement.

The complete statement issued by Mr. Turney upon his return today follows:

Not only is the annual meeting of the New York State Horticultural Society the largest and best meeting of apple growers in the Eastern States but it is probably the best meeting of its kind in the entire country.

The apple show was small and evidently it has not been the intention of the Society to develop this part of the meeting to any extent.

The outstanding feature of the

BIRTH CONTROL OF DOGS IS NOW SUGGESTED

Canines Should be Limited to Reasonable Proportions.

MANY ARE NOW DESTROYED

Supt. of London Home of Dumb Animals Makes the Suggestion.

(Special cable to The Daily Mail by the British United Press)

London, Jan. 23—Birth control for dogs was suggested today as a remedy for the problem of the rapidly increasing birth rate among London dogs, Miss E. S. Kennedy, Superintendent of the North London home of "Our Dumb Friends" League, sponsored the solution.

"It seems the only way of limiting the dog population to reasonable proportions", Miss Kennedy said. Breeding of dogs should be restricted and the annual tax on them—now \$1.85 might be increased.

"It was estimated that 40,000 lost dogs are picked up in London in a year and that 10,000 of them are returned to their owners."

More than 50,000 dogs and cats are destroyed each year by the Royal Society for the prevention of cruelty to animals.

Balmoral Castle is Now Threatened by Waters of River

Is the Country Estate of King George at Aberdeenshire, Scotland—River Dee Overflowed Its Banks During the Week End—Heavy Losses Among Sheep Herds in the Vicinity Reported.

(Special to the Daily Mail by the British United Press)

London, Jan. 23—Balmoral Castle, the estate of King George in Aberdeenshire, was threatened by floodwaters which came fater the river Dee had overflowed over the week end. Fields adjoining the royal estate were under water three to six feet and fifty three houses in the vicinity were inundated.

There were heavy losses among the sheep herds in the vicinity it was reported. Floods were reported elsewhere in Scotland, particularly in Portshire, where several families were reported marooned for hours by high waters.

PARTRIDGES ARE ON THE INCREASE IN THIS PROVINCE

Forest and Stream, New York, Jan. 23—A few years ago the partridges of New Brunswick were threatened with extinction from the ravages of insect pests that were destroying them by the thousands.

The provincial government with the foresight that has distinguished them on other matters having to do with the protection of fish and game placed the birds under complete protection. For a number of years their recovery has been slow, but we are glad to report that encouraging reports are now being received.

A party of Boston sportsmen in a recent communication state that this year they counted over one hundred birds in one area in the Tobique territory where last year there were none at all.

Mrs. W. E. Vaughan left on Saturday evening for Toronto to attend the automobile show.

from the East but as was almost inevitable the evils attending such boom development have militated against its permanent success. The comparatively enormous cost of land, the expense of irrigation, the greater cost of insect and fungus protection, and the higher land taxes combine to give an overhead that make profitable apple growing in those sections exceedingly difficult to obtain and in many cases impossible. The handicap of such a large overhead has been added to in part by the failure to realize the superior growing conditions which were claimed, also by the long distance from the large markets of the East, attendant with its high freight cost.

Survival of Fittest.

Summarized, these conditions mean that the working out of the law of the survival of the fittest will give dominance in apple production to the better growing conditions, the superior geographical position and the unflinching values of the best of our Eastern apple growing lands. In this development New Brunswick has an excellent opportunity but the good reputation which we built up for our apples on the Montreal market is in danger of being lost unless the growers improve their production, packing and marketing methods all along the line. Better feeding and mulching of the land, more thorough spraying of the trees thinning of the fruit on some varieties, and above all, better handling of the fruit from the tree to the market, are essential to the further development of apple growing in New Brunswick.

COSGRAVE GIVES PRAISE TO BIG BILL

President of Irish Free State Thinks that Chicago is a Wonderful City.

En Route To Washington Jan. 22—Fired with enthusiasm for Chicago its Mayor and its citizenry, but slightly fatigued after his 24 hour visit there William T. Cosgrave head of the Irish Free State tonight was traveling toward Washington where he is to spend the next four days.

"There is no city so libelled as Chicago" Mr. Cosgrave told an Associated Press correspondent aboard the train. "I never saw such order such perfect control of traffic such marvelous buildings and such cordial people. The Irish there are uptop Americans. You ask me about that libelled man, Big Bill Thompson. If I were not in the habit of discounting much I would have thought before I came here that he was a tough and a roughneck. He is a kindly big American who is full of enthusiasm for his country and its history is bubbling over with the idea of making Chicago the greatest of American cities by connecting it with the sea."

Attends Mass.

Prior to boarding the train Mr. Cosgrave and his party attended mass in one of the oldest Roman Catholic churches in Chicago. He was particularly pleased with the singing of Irish ballads including the "Shamrock of Ireland" by the choir and the Irish atmosphere of St. Patrick's church.

Before his call at the White House tomorrow Mr. Cosgrave will attend a private luncheon to be given by Col. William Donovan of the "Fighting 69th" Regiment, New York National Guard. Tomorrow evening the Irish Free State leader will dine with Hon. Vincent Massey, Canadian Minister to Washington.

ADMIRAL LEAKE PASSES AWAY

(Special cable to The Daily Mail by the British United Press)

Marshallware, Eng. Jan. 23—Vice Admiral Francis Martin Leake 59 who retired from the Navy in 1926 died today. He was the third admiral to die within a week.
