Niagara Dusters For Potatoes "This is the Duster that established the method"

The success of the NIAGARA Dust Method has been due to three outstanding things.

1. THE DUSTER

The Niagara Duster is designed to put the dust "down on" and "up under" the potato vines. This Duster was not built to run dust through and out on the Potato Patch-it was designed to cover all the foliage of the plant with a film of dust, It is light of draft, sturdy in construction and easily operated. Covers four rows at a time.

2. THE DUST

to find the same cook 'ere today.

NIAGARA D-25 contains just the right amount of Monohydrated Copper sulphate-balanced to control Blight.

NIAGARA D-18 is processed identically the same way as D-25 but in addition it contains just the right amount of poison to kill the "bugs".

3. KNOWING WHEN AND HOW TO DUST Niagara Dusters and Dusts. Sold exclusively by
