FISH AND GAME.

A province that is well stocked with fish and game is a province that will attract a large number of sportsmen to its territory and make life more enjoyable to those of its own people who take delight in hunting and fishing. In the old days when men went out to shoot or fish in order to supply the family dinner there was no talk of game laws and fishing regulations. The time came when the rivers began to show signs of depletion through excessive netting and the game birds and animals grew scarcer owing to the wanton destruction of game by men who were devoid of the instincts of which the modern hunter boasts. The authorities took precautions to put an end to this indiscriminate slaughter and to enforce reasonable regulations to preserve the river fish. They were backed in their efforts by various organizations composed of disciples of Isaac Walton and it is pleasing to know that there has been a measure of success. The salmon is one of New Brunswick's most valuable assets, bringing hundreds of thousands of dollars into the province each year, and everything possible should be done to conserve and protect it. There are some who say that were it not for the fact that our rivers are frozen over five or six months out of the year there would not be a salmon reach the spawning beds or if they did they would never be able to make the return trip to the sea. It is estimated that tourist travel to the Dominion last season was worth \$300,000,000. As one-twentieth of the Dominion, New Brunswick's share should be \$15,000,000 and the protection of our inland fisheries will hasten the day when that goal is reached.

In the transfer of Mr. G. Bruce Burpee of Saint John, district passenger agent of the C. P. R. to Toronto, the Maritime Provinces will lose one of its most capable and popular railway officials. His transfer comes in the way of a promotion and he is merely following in the footsteps of Mr. C. B. Foster and other graduates of the Saint John office who are now serving the world's greatest railway corporation in a larger field. There is no question but that Bruce Burpee will make good in the Queen city.

His Majesty's loyal subjects throughout the Empire will rejoice over reports from Buckingham Palace of an improvement in his condition. A radiological examination of the right lung yesterday corroborated examinations by needle that there was no appreciable effusion. God save our gracious King will be the keynote of fervent prayers which will go up from thousands of churches tomorrow throughout the British Empire.

Noting Bob Ryder's observation that "another thing a middle aged man never expected to see, but did is severely tailored lingerie" we can't help wondering in our idle way whether that old cuss on the Ohio State Journal ever settles down to constructive effort.

Fairly Large Market

The usual Saturday morning market at Phoenix Square was about average in size with the chief produce being pork, potatoes and wood. Pork sold at 13 and 15 cents per pound and almost every farmer had one or more quarters of this meat. Potatoes sold for \$1 per barrel. Wood was quite plentiful and the prevailing price was \$7 and \$8 per load. Eggs were bought at 60 cents per dozen but were rather scarce. Butter sold for 40 and 45 cents per pound. Beef and lamb sold at 13 and 15 cents per pound. Other prices were about the same as on previous market days. Turnips brought 75 cents per barrel and cabbage sold for \$1 per dozen and less.

Wills Probated

The estates of two persons were probated before Judge of Probate H. G. Fenety, recently. In the estate of L. Jace Armstrong who passed away some time ago, letters testamentary were granted to J. Simeon Armstrong, widower. The estate was sworn in at \$1400; \$900 of which is real and the balance \$500 personal. The estate was left entirely to the husband of the deceased. In the estate of the late Charles G. Cremin letters testamentary were granted to his widow, Mary G. Cremin. The estate was sworn in at \$16,458. \$12,358 of this is personal. Besides this, the above left in life insurance \$9000 payable to his widow.

Skating on Nashwaak

A number of persons from this city are taking the opportunity today to enjoy a skate on the Nashwaak river, where the skating is reported to be fairly good. Young persons with skates on their backs were seen during the day making their way across the river bent on spending the afternoon enjoying a whirl on the blades. To some it is the first of the season, but others have been skating in this locality every since the first freezing of the river across from the city.

NOWADAYS YOU PRESS A BUTTON

Or perhaps a switch, or some little gadget, and a lot of things happen around home that lighten labor and banish trouble.

A Whirling Fan brings a cooling breeze, and a little copper, dish-like affair throws out a sizzling blast that warms the room in no time.

Another button boils coffee, toasts bread and cooks waffles. Another does a better job than a broom. Another makes a happy laundress out of a dismal washwoman. Another one cools the ice-box. Another—but why go on?

Labor and time saving devices have come and are today within the reach of the humblest home.

And one of the chief reasons why they have come and why they are within the reach of the humblest home is the power of advertising.

Advertising has carried the news of these better ways of doing things to every home. It has created a desire to possess them, and countless thousands have purchased them, and live better because of them.

Reading advertising not only tells you about new, helpful mechanical devices for the home, but it is an unfailing guide to reliable products.

READ ADVERTISING REGULARLY. IT POINTS THE WAY TO BETTER LIVING.
