## The Governor General and Premier Baxter to Inspect Power Plant at Grand Falls

Inspection by Notable Party Today Follows Turning on of Power on First Unit Sunday—Marks Completion of First Major Project of Great Industrial Development Plans for the Province.

(Special to The Daily Mail by the British United Press.)

GRAND FALLS, N. B., Oct. 1—An important unit was added to the industrial life of the Province of New Brunswick when the hydro-electric plant at Grand Falls on the Saint John river was placed in operation last night.

Unattended by ceremony and in the presence of a group of prominent engineers the first of four units of 20,000 horse power with which the plant is being equipped began the output of energy on Sunday at 3 p. m., after water had first been let into the tunnel, which is the largest water pressure tunnel in Canada, at 1.43 p. m. After the first preliminary tests the unit was brought up to normal speed and voltage so that at 8.47 p. m. and thereafter it stood ready to deliver as required energy to the extent of 20,000 horse power to the Fraser Companies' pulp and paper mill at Edmundston.

Largest in Maritimes.

Modern engineering and construction methods have combined to produce the largest hydro-electric development in the Maritime Provinces at this point and the turning on of the motor of the first unit under the impulse of the waters freed from the great works about the Grand Falls constituted an historic occasion. Power from this heretofore unemployed natural source will operate the large pulp and paper plants being constructed and expanded in northern New Brunswick and the development makes possible the activities in the forest industries of the Province which will bring about what it is predicted will be the greatest industrial expansion this Province has ever known.

Lord Willingdon Present.

Today the development, including the power house, the dam and the other works are being inspected by His Excellency Lord Willingdon, Governor General of Canada, who arrived here this afternoon on a combined official and holiday visit to New Brunswick and the other Maritime Provinces in which he is combining official visits to some of the cities and towns with fishing and hunting expeditions. His Excellency was met here by Hon. John B. M. Baxter, Premier of New Brunswick, who is motor-ing through the Upper Saint John river valley accompanied by Col. W. H. Harrison, M. L. A., for Saint John City, Hon. J. L. O'Brien, Speaker of the Provincial Legislature, and G. Percy Burchill, of Nelson, former president of the New Brunswick Lumbermen's Association. Premier Baxter set off the charge of dynamite which marked the commencement of the development operation at Grand Falls on August 10th, 1926.

A Great Plant.

Designed for four generators of 20,000 horse power each, the power house is to have an initial installation of three units and will be operated by Saint John River Power Company, a subsidiary of International Paper Company. One of the interesting features of the development is the pressure tunnel, which is the largest in Canada; excavated through solid rock under the town of Grand Falls, this tunnel conveys water from just above the dam to the power house. The tunnel is 2,755 feet long, 24½ feet in diameter and is lined through-

out with concrete. A. H. Tweedie, formerly of Chatham, N. B., and a son of the late Hon. L. J. Tweedie, who was for some time Premier and later Lieutenant Governor of New Brunswick, is superintendent of this newest addition to the hydro electric plant operated in Canada by International Paper Company interests and present at the inaugural and technical tests when the first power was turned on were: T. F. Malone, general superintendent of the Gatineau Power Company; Walter Blue, manager of the development department of the Gatineau Power Company, and R. L. Hearn, chief engineer of H. G. Acres and Company Limited.

Big Development Promised.

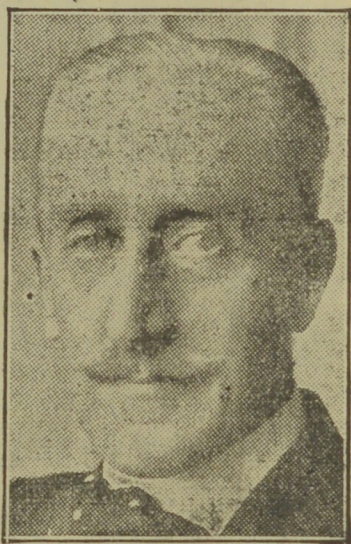

The placing in operation of the Grand Falls power development marks the practical completion of the first of a number of major enterprises which International Paper Company is undertaking in New Brunswick and all of which are interdependent upon the development of Grand Falls. At Dalhousie on Chaleur Bay on the North Shore of the Province, New Brunswick International Paper Company has commenced the construction of a newsprint mill. Of the best construction which modern engineering skill can devise this plant will be designed for a daily capacity of 50 tons and will have an initial installation of two machines of a daily capacity of 250 tons of newsprint paper. There will be complete ground wood and sulphite departments at the mill so that wood will be carried through all the various manufacturing processes, leaving as newsprint paper. As the mill will be located on tide-water ocean-going vessels can go directly to the mill docks and raw materials can be sent in and paper shipped out about eight months of the year by water. Power to operate the Dalhousie mill will be supplied from the Grand Falls hydro electric development, a high tension transmission line about 125 miles long connecting the power house with the mill. As a reserve from which to draw the pulpwood required by the mill International Paper Company has assembled 2,362 square miles of timberlands, an area slightly in excess of that of the whole province of Prince Edward Island.

A Miramichi Mill.

International Paper Company have also made known their intention to build a mill on the Miramichi river,

## THE GOVERNOR GENERAL HERE ON WEDNESDAY

It was announced today that a change had been made in the itinerary of His Excellency the Governor General who is now on an unofficial visit to the province and that he will spend Wednesday in this city. Today His Excellency is at Grand Falls making an inspection of the electrical power plant installed by the International

\*VISCOUNT WILLINGDON\*

Paper Company and tomorrow he will spend the day at Woodstock, and in the evening will proceed to Fredericton. No definite plans for his stay in this city have yet been arranged but it is understood that he will have a round or two of golf. While here he will make his headquarters in his private car. It is possible that he may spend Thursday duck hunting in the Sunbury County meadows. On Friday he will proceed to Enniskillen to try his luck at woodcock.

## NEW BETTING SCALE GOES INTO EFFECT

(Special cable to THE DAILY MAIL by the British United Press.)

London, Oct. 1—The modified betting scale, drawn up by Winston Churchill went into effect today. Under the new system Dutch on course betting have been reduced from two to one percent and duties on betting elsewhere have been reduced from three and one half to two percent.

STRIKE IN GERMANY.

(Special cable to THE DAILY MAIL by the British United Press.)

Kiel, Germany, Oct. 1—Thirteen thousand shipyard workers went on strike in Germany today, seriously tying up the industry.

This plant will probably have a daily capacity of 100 tons of bleached sulphite pulp. Tributary to this mill the company has at present timberland reserves of about 1,201 square miles. These several enterprises reflect a carefully co-ordinated plan on the part of International Paper Company for development in New Brunswick, utilizing the water power resources for the manufacture of forest products and thus providing profitable employment within the Province. They have been planned and are being built for permanence and should, therefore, contribute materially to the continuing prosperity of the Province.

## A COALITION COMBINATION IMPOSSIBLE

No Hope of British Labor and Liberals Getting Together.

STATEMENT BY PRESIDENT

Lounsbury Says the Only Aim of Labor is Socialism.

(Special cable to THE DAILY MAIL by the British United Press.)

Birmingham, Oct. 1—Hopes held by some Liberals for consolidation of the Labor party and the Liberal party were dispelled abruptly today by George Lounsbury in his presidential speech to the Labor Convention.

"Any attempts to unite our forces with the decadent remains of Liberalism are foredoomed to failure," Lounsbury said.

"Our one and only aim is socialism. To this goal all other British parties are violently opposed. So between them and us no coalition combination is possible."

## MOOSE HUNTING SEASON IN N. B. OPENED TODAY

Many Big Game Hunters From the United States are Now in the Woods — Moose Reported Plentiful.

The moose hunting season in New Brunswick opened today and hunters from every section of the United States were flocking into the woods during the week-end.

A good many hunters have been in the woods for some days, some since September 15th when the deer hunting season commenced. There is every indication that big game is especially plentiful in New Brunswick this year, as a large number of deer have already been shot and moose have been wandering even into cities and towns and are evidently numerous.

A few days ago a two year old bull moose visited Fredericton and spent some time cavorting about the provincial capital's public park; he paid little attention to citizens and tourists who looked on with interest and seemed aware of the fact that his safety should be complete until October 1st. In 1927, 800 moose and over 7,000 deer were killed by hunters in New Brunswick and the moose with the largest spread of any taken in Canada during the season was shot by A. W. Cristiani of Red Bank, New Jersey, a few miles north of Boiestown, which is on the Miramichi 42 miles north-east of Fredericton.

The popularity of deer hunting in New Brunswick is growing annually and this year more visiting hunters than ever have come to the Province for the early season deer-hunting, although the best deer hunting conditions are not until the month of November. Among those who have been successful deer hunting are Louis J. Ehret of New York and Mr. and Mrs. Joseph F. Riley of New York. Mr. and Mrs. Riley each shot a good sized buck deer, leaving for New York by automobile on Saturday with the heads, antlers and most of the carcasses of their deer tied to their automobile.

Woodcock Season

In conjunction with the opening of the moose season, comes the period for shooting woodcock. This is another fine diversion for the hunters who are out for a good time and who excel as marksmen. The daily bag limit for this bird is ten.

## A Hurricane Causes Great Damage on The Belgian Coast

Debris Washed Ashore Indicates Disaster to Shipping—The Yzer District of Flanders Believed to Have Been Flooded—Street Rioting Reported in Berlin.

(Special to the Daily Mail by the British United Press)

BRUSSELS, BELGIUM, October 1—A hurricane did extensive damage along the Belgian coast during the night. Debris washed ashore indicated that several ships had been wrecked.

The locks of the river Yser were smashed and part of Nieport was under water the highest tide of the year was due at 2 p. m. and it was feared the whole lowlying Yser district of Flanders might be inundated.

Berlin, Oct. 1—Street rioting marked the first appearance in Prussia of Adolphus Hitler, leader of the 1923 Munich Putsch, when he spoke at the sport palace last night.

Communists clashed with the Hitlerites after the meeting, both sides firing pistols. Seven persons were reported to have been seriously injured.

## POLLING IN THE N. S. ELECTIONS GOING ON TODAY

Eighty Candidates are Seeking the Suffrages of the Electorate for the Forty-three Seats.

Halifax, N. S., Oct. 1—Polling in the Nova Scotia provincial elections is taking place today under favorable weather conditions. Every constituency in the province is being contested there being a total of eighty-eight candidates in the field, including two Laborites in Cape Breton East. Following is the complete list:

Annapolis—O. P. Goucher and H. T. MacKenzie, (C). J. D. MacKenzie and D. C. Owen, K. C., (L).

Antigonish—John MacIntyre and John MacLellan, (C). Hon. William Chisholm and Dr. R. McIsaac, (L).

Cape Breton Centre—Hon. G. S. Harrington and Joseph McDonald, (C). M. A. Patterson and Luke Daye, (L).

Cape Breton East—R. H. Butts and Don Cameron, (C). L. D. Currie and D. C. McDonald, (L). J. B. McLachlan and Forman Wayne (Labor).

Colchester—Frank Stanfield and W. A. Flemming, (C). Dr. W. R. Dunbar and Dr. D. L. MacKinnon, (L).

Cumberland—Hon. P. C. Black, D. G. McKenzie and A. Terris, (C). J. F. Smiley, Kenneth Cochrane and C. Read, (L).

Digby—J. Robichaud and H. Wagner, (C). Hon. A. S. MacMillan and J. Willie Comeau, (L).

GGuysboro—H. A. Rice and S. O. Giffin, (C). M. E. Morrison and C. W. Anderson, (L).

Halifax—Hon. J. A. Walker, Hon. J. F. Fraser, J. F. Mahoney, Dr. A. Morton, and Hon. F. P. Blight, (C). Dr. T. Byrne, E. J. Cragg, B. W. Russell, Dr. Kennedy and G. B. Isnor, (L). Hants—Hon. E. N. Rhodes, Hon. A. Parsons, (C). J. W. Reid, Robert Gass, (L).

Inverness—H. M. Aucion and Malcolm McKay, (C). M. E. McCarey and J. Proudfoot, (L).

Kings—R. T. Caldwell and G. C. Nowlan, (C). F. J. Porter and J. Durno, (L).

Lunenburg—Hon. W. N. Rehffuss, W. H. Smith, (C). J. J. Kinley, G. E. Romkey, (L).

Pictou—John Doull, R. A. Douglas and H. A. McQuarrie, (C). Don F. Fraser, C. E. Carruthers and A. T. Logan, (L).

## FROST HAS BEEN VERY APPARENT IN THIS VICINITY

More Delicate of Plants Have Been Destroyed During Recent Frosts — Weather Gradually Getting Colder.

Though the district around this city has been visited by several nights of frost, and cold weather, the damage has not been as much as might be expected on account of the dampness which has been prevalent in the way of fog and rainfall. A report from the Experimental Station this morning showed that the more hardier plants and flowers have not been affected by the frosts. However the more delicate owners have felt the frost keenly and were killed off. The last several evenings has seen the thermometers as far down as 30 degrees which is the minimum for the month.

Weather Colder

The maximum temperature for the month of September was 75 degrees. Since the middle of the month the temperature has gradually fallen and during the past two weeks the weather has been quite cool especially in the evenings. Following are the statistics for the month: Maximum, 75; Minimum, 30; Lean, 53.84; Precipitation in rainfall, 3.92 inches; Hours of sunshine, 1.46½. Altogether the months of September just closed has been a rather unusual month. There has been more than the average of rainfall for this autumn month and the thermometers have shown a decided drooping tendency during the past week.

What half the world doesn't know about how the other half lives, it discusses in whispers.

Queens—Hon. W. L. Hall and D. W. McKay, (C). F. W. Dickie and R. M. Irving, (L).

Richmond—Hon. B. A. LeBlanc and J. A. Stewart, (C). Alonzo Martell and Charles Doyle, (L).

Shelburne—F. R. Nickerson and Capt. N. E. Smith, (C). H. R. L. Bill and W. McP. Robertson, (L).

Victoria—Phillip McLeod and H. A. Grant, (C). D. A. Cameron, K. C., and D. B. McLeod, (L).

Yarmouth—Hon. J. F. Cahan and R. d'Entremont, (C). R. W. E. Landry, K. C., and L. M. Gardner, (L).
