Russian Ice Breaker Has Failed to Locate Amundsen

The Krassin is Today Steaming Through Northern Waters in an Attempt to Save the Life of Captain Mariano Who Was Taken From an Ice Floe—His Leg Was Badly Frozen and Gangrene Has Set in.

(By EUGENE LYONS, United Press Staff Correspondent.)

Moscow, July 17—The Russian ice breaker Krassin steamed swiftly through northern waters today in an attempt to save the life of one of the sixteen men she had so successfully brought out of the ice bound wastes of the north, Capt. Adalberto Mariano, rescued off an ice floe near Foyne Island reported was in a serious condition. One leg was badly frozen while he, Capt. Filipp Zeppi and their leader, Finn Malmgreon attempted to walk for aid.

It was reported today that gangrene had set in and that Mariano's condition was critical. There has been no trace of Amundsen since he and his Swedish and French companions started from Tromsø, Norway, June 18 in an attempt to carry relief to the men of the Italia. The latest search for them has failed, reports indicated today.

Capt. H. Riser-Larsen and Lieut. Luetzow-Holm, flew away from the steamer Hobby on a wide reconnoitering tour to try and find the Amundsen party. They returned, saying that the flight had been fruitless.

DR. KIERSTEAD ADDRESSES THE ROTARIANS HERE

Tells of Trip to Chicago Convention of District Governors—British Members Gave Luncheon.

An interesting talk on the convention of the Rotary Convenors just concluded at Chicago was given at the weekly luncheon of the local Rotary Club in the Palms at noon today by Dr. W. C. Kierstead, who has just taken office as Rotary Governor of the 32nd district.

Includes Newfoundland

The 32nd district includes the Maritime Provinces and Newfoundland. In the district are sixteen clubs, of which five are in New Brunswick, one in Newfoundland, one in Prince Edward Island and the remainder in Nova Scotia. Dr. Kierstead was selected as governor at a meeting held in Halifax early this summer and took office the first of July while he was en route from the district conference at St. John's, Newfoundland and to his home in this city.

Interesting Convention

The convention at Chicago was very profitable, Dr. Kierstead said. There were governors there from every district in the sixty-one countries which are represented by Rotary International. One of the features of the conference was a luncheon given by the representatives of the districts of the British Isles. All the other delegates were entertained by the British and the Canadians and those from other parts of the Empire had good reason to be proud of the showing made by the members from the Mother Country.

For any who desire to get the greatest personal suffering out of hot waves we advise giving the mind over to the subject. Talk about the heat constantly and read stories of prostrations.

LAWYER WAS FINED \$11 FOR SPEEDING

St. George, July 16—Hastening to this town for the purpose of defending a case in court here, Earle Smith, St. Stephen barrister, was arrested by Traffic Officer Stephen Mellday of the N. B. Provincial Police, formerly of Saint John, but now stationed in this district, and was fined \$11 by Magistrate Magowan upon his appearance in the police court.

The case which he was defending was that of Charles Daggett, of Bangor, who was apprehended at Chamcook by Sergeant E. D. Howard, of the Provincial Police, following an accident near St. George, in which a car driven by Ollie Nickerson, a commercial traveler, of Saint John, was badly damaged.

The incident occurred about 11 o'clock this morning, when Nickerson's car was side-swiped by the other auto driven by Daggett. He did not stop, but was given chase by Officer Howard and was soon overtaken. He was accompanied by two friends from Calais.

Magistrate Magowan dismissed the accused for lack of evidence, but immediately upon his release he discovered that his car had been seized by the Customs authorities because of not having registered. The Nickerson was damaged about \$100.

FRANCE HAS A VARIETY OF WEATHER

(Special to the Daily Mail by the British United Press)

Paris, July 17—Varying climatic conditions were reported throughout France today with terrific heat vying with heavy rain and hail storms. From Lyons came reports of a temperature of 102 degrees. Intense heat at Perpignan caused a vast forest fire.

THE PREMIER KEPT BUSY IN ENGLAND

Met Lloyd George and H. G. Wells at the Country Home of Lord Beaverbrook.

St. John, July 17—To view a large ice field, measuring several miles in area, opposite Belleisle, in the Atlantic Ocean, was the experience of Premier Baxter while returning home from London, as a passenger on the Empress of Scotland, which docked at Quebec on Saturday.

While in London the Premier paid a visit to Hendon, where he witnessed the big "air show." In speaking of this demonstration, he said he was greatly impressed at seeing planes performing miraculous stunts. He told of seeing a large squadron of planes enter the air and another squadron attack them as in war time duels, with anti-aeroplane guns, working from the ground.

The performers also carried out a bombing exhibition in which they set fire to a large balloon and its pilot was obliged to land by parachute.

Premier Baxter also visited Dumfriesshire, Scotland, the birth place of his maternal grandmother and thence proceeded to Edinburgh, where he saw the showing of the picture "Dawn," which caused considerable controversy in the British Isles and on the continent. While in Edinburgh the Premier was present with a detachment of U. S. naval men placed a wreath on the memorial tower, Stirling Castle.

He also spent a very pleasant evening with Lord Beaverbrook at his country home "Leatherhead," when Lloyd George and H. G. Wells were also invited guests for the occasion.

Coming from Edinburgh back to London, Premier Baxter had his first experience in an English sleeping car and said that he was sufficiently tired to find that he could sleep just as well in an English coach as in a Canadian sleeping car.

On the evening of June 28, Dr. Baxter had the pleasure of being present at a reception given by Mr. and Mrs. John Walter at Claridge's Hotel, where he met Sir Andrew Duncan, H. P. McMillan, K. C., former Lord Advocate of Scotland, Chief Justice and Mrs. Anglin, C. A. Magrath, of the International Waterways Commission; Lord Hanworth, the Master of Rolls; Mrs. Alec Tweedie, popular authoress, and Mrs. L. P. D. Tilley and her daughters, and others.

While overseas the premier had several conferences with Hon. P. C. Larkin, Canada's High Commissioner in London.

VOLCANIC ERUPTIONS REPORTED

(Special to the Daily Mail by the British United Press)

Dutch Harbor, Alaska, July 17—Heavy volcanic eruptions on Akutan Island, one of the Aleutian chain were reported today by the U. S. coast guard cutter Unalga. The inhabitants of native villages on the island also are being terrorized by earthquake shocks, the Unalga reported. Steam and lava were seen coming from the crater of the volcano on the island, officers of the boat said.

We need some heavyweight literary luminary to tell us if the brunet who is now marrying the gentleman used to be a blond whom he preferred.

NICARAGUAN WOMEN FORM A BATTALION

Amazons Aid Rebel Sandino in Central America Civil War.

FIGHT SIDE BY SIDE WITH MEN

First Commander Killed in Action—Make Gallant Soldiers.

Special cable to The Daily Mail by the British United Press

Barranquilla, Columbia, July 17—A modern battalion of women—Amazons who fight for the rebel cause along with the famous Augustini Sandino rebels of Nicaragua—has been formed and is active now according to an interview General Jose Cesar Rivas gave the newspaper La Nacion.

Senora Adriana Florese was one of the first leaders of this group of women and she was killed in action, the general said. Since then the women's battalion has been commanded by Margarita Aroz, Sandino's wife and Rivas wife, the general told the newspaper.

"The women have distinguished themselves in the fighting side by side with the men whose dangers they share without shirking," Rivas was quoted as saying. He said they had done heroic work in battle and that the battalion now encamped at Campo Bonanza had the fullest confidence of their leader.

BRUNSWICKAN MAKES ITS FINAL APPEARANCE NOW

The Brunswickan, the official organ of the students of the University of New Brunswick made its final appearance for the student year 1927-1928 today. The final or graduating number as it is called is a very attractive one with many pictures of interest to the students and the friends of the university. Among the pictures is one of the Rt. Hon. Sir George E. Foster, K. C. M. G. taken when he was a professor at the U. N. B. in 1875. There is also a picture of the old Arts building taken in the year, so the Brunswickan states, 1870.

Many Articles

Among the many articles in the book are the valedictory and a history of the class that graduated this year. The valedictory was delivered by R. J. Love of Devon. On the Front Page is an ode on the Centennial Anniversary of the Arts building written by A. G. Bailey, B. A. Mr. Bailey is a recent graduate of the university who has already published one volume of verse that has been very well received by reviewers in Upper Canada.

HOOVER FOR CONTINUED PROSPERITY

(Special to the Daily Mail)

Superior, Wis., July 17—Herbert Hoover has informed President Coolidge that he intends to emphasize the issues of continued prosperity and integrity in governmental management in his campaign for the White House.

The Republican candidate indicated he would name these two as the dominant issues in the speech of acceptance of the nomination at Palo Alto, Calif., August 11th, the United Press was reliably informed today.

The kind of weather we do not care about is the kind you tell your grandchildren about, 40 years later.

Many Business Men From the Old Country Coming to Canada

Persistent Boosting of This Country By the Prince of Wales is Having Beneficial Results—Trans-Atlantic Shipping Companies Report a Big Increase in Travel—Industrial Magnates Coming in August.

(By HERBERT BAILEY, British United Press Staff Correspondent.)

London, July 17—The Prince of Wales, who because of his great affection for Canada, never misses an opportunity of doing good for the dominion, is declared to be responsible for the big rush of British business principals to the land of the maple this summer. The British United Press has been informed by trans-Atlantic shipping companies that there is a large increase in such visits. For instance, a party of twenty Britons, mostly the heads of big business institutions, has just left for the Canadian National Exhibition at Toronto, a party of 30 industrial magnates is going to Canada for a business holiday in August and will tour the eastern provinces, studying markets, and many other similar individual or party trips by business men are being arranged.

MARITIMERS TO BE HONORED IN TORONTO

The Three Lieutenant Governors and all Provincial Law Makers May Attend Canadian National Exhibition.

The three Lieutenant-Governors and the entire membership of the legislatures of the Maritime Provinces are guests in Toronto for three days during the Canadian National Exhibition in the ambitious project announced today by the Maritime Provinces' Association of Toronto. The Empire Parliamentary Association is scheduled to be in Toronto Aug. 30, and it is planned to have the Maritime Provinces representatives present to participate jointly in the entertainment that will be provided by the Ontario Government, the City of Toronto, Lieut.-Gov. W. D. Ross and many of the outstanding clubs of the city.

Invitations have been sent to the Lieut.-Governors, all the legislative members, the presidents of the Maritime Provinces' Universities, and representatives of the Associated Boards of Trade and of the Press, and it is expected that practically all will accept. Special trains have been arranged for and well-conducted plans are being made to make the occasion noteworthy. Not the least interesting are the courtesies which the directors of the Canadian National Exhibition plan to extend to the guests; a special luncheon, and the freedom of the grounds during the three-day visit.

Announcement of the formation of a Maritime Provinces' Association by Maritime folk of Toronto appeared in the press of Toronto and the Maritime daily papers, a little over a year ago. The Association now numbering over eight hundred has been interesting itself in encouraging Ontario firms to look to the Maritimes for larger supplies of the produce of the farm, factory, fisheries, and the forest. They have been distributing folders prepared by the Maritime Publicity boards and Tourist Associations, descriptive of the Maritimes as a tourist resort, and from its office, 811 Federal Building, Toronto, are distributing literature intended to bring home to Ontario readers, the contribution the Maritimes are making and the greater

FOREST FIRES ARE RAGING IN MANITOBA

Serious Outbreaks at Flin Flon and Cormorant Lake Districts.

Winnipeg, July 16—Sweeping through northern districts, in the mineral belts adjacent to The Pas, forest fires are reaching alarming proportions, and unless rain comes soon fear is expressed that they will get beyond control of the rangers and prove a great menace to mining camps and settlements of the north.

Over the week-end thirty fires were reported to forestry officials here—some are of large extent covering a wide area while others are small. Cormorant Lake and the Flin Flon districts of the north report the most serious outbreaks, coming after weeks of hot, dry weather.

The fires are within a three-hundred-mile area and have taxed the fighting forces of the Forestry Department.

Aided by aeroplane patrols, forest rangers are fighting a day and night battle in an endeavor to check the spread of the flames. Additional equipment and men has been sent from The Pas while from mining camps and other northern settlements the fighting forces have been augmented. As fast as a new outbreak is discovered by the scout plane fire fighters are rushed to the threatened territory by the Canadian Air Force.

Camp Fires Blamed

According to a report received by the forestry officials here most of the fires are blamed on "green" prospectors who neglect to deaden their fires when they shift camp.

For a time on Saturday, Manitoba's newest mining town, Cranberry Portage, north of The Pas, was threatened with destruction from a brush fire, but rain came just in time to check the progress of the flames. Every available man in the town fought the flames, which were gaining headway and nearing the settlement when the rain came.

Is a student who cheats in an examination engaged in skulduggery?

contribution they can make to Canadian industrial life.
