

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is the finest
tea in the best package—Aluminum

HOOF PRINTS

Imperial, Pa., Jan. 20—Guy Dean, one of the star 3-year-old trotters on the Grand Circuit in 1926, has been retired to the stud here. He is in charge of Bob Wright, who drove him in his big time engagements. Guy Dean finished a close second to the now champion, Guy McKinney (4), 1:58½, in the inaugural Hambletonian stake at Syracuse, N. Y., in 1926.

Fremont, O., Jan. 20—The track in this city again is being used by numerous harness horse trainers for winter headquarters. Frank Cares, the veteran Detroit reinsman, has the largest string, 30 head.

Goshen, N. Y., Jan. 20—Ted Horan, for years an assistant to the famous Grand Circuit reinsman, Walter R. Cox, has entered the ranks of owners for the first time. At the recent Old Glory sale in New York, he purchased a yearling by Peter the Brewer (4) 2:02½, a big time star of a few years ago.

Windsor, O., Jan. 20—Johnnie Duncan (2) 2:18½, the last foal of the great trotter, John A. McKerron, 2:04½, owned by H. K. Devereux, president of the Grand Circuit, has been placed in the stud here. He was the winner of first prize at the Burton, O., fair last year.

Urbana, O., Jan. 20—Dr. Hugh Parrish, who won more races than any other reinsman in the country last year, has a 2-year-old trotter by The Senator (3) 2:03½ at the track here that is causing widespread comment. He is called Senator Audubon and recently travelled an eighth in 17 seconds.

DELANEY AND HEENEY MARCH 1

New York, Jan. 19—Jack Delaney and Tom Heenev, rival heavyweight contenders, came to terms today, through their managers, for a 15-round elimination match at Madison Square Garden on March 1.

The match was signed with John M. Chapman, new assistant general manager of the Garden.

Chapman declined to disclose the basis on which an agreement was reached. Heenev, offered 30 per cent of the receipts, had previously held out for 32½ per cent, leaving only 17½ for Delaney, out of the maximum of 50 per cent, allowed by the State Athletic Commission to principals.

Jack Sharkey and Johnny Risko probably will be matched for the second elimination contest March 15, the winner to meet the Heenev-Delaney victor.

Assessment Notice

The Board of Assessors of Taxes for the City of Fredericton hereby require all persons liable to be rated for the year 1928 forthwith to furnish to the Assessors true statements of all their Personal Estate and Income, which is assessable under the City of Fredericton Assessment Act, 1926, and true statements of wages or salaries paid to employees, and hereby give notice that blank forms on which such statements may be furnished, may be obtained at the office of the Chairman of the Board of Assessors, and that such statements must be perfected under oath and filed in said office on or before the 15th day of February, 1928.

Dated this 12th day of January, 1928.
PETER FARRELL,
Chairman of the Board of
Assessors of Taxes.

THE COST OF GETTING EGGS IN THE WINTER

(Experimental Farms Note.)

The cost of the eggs produced during the four winter months is a factor worth considering, where cash returns are the main objective and we take it that all poultry raisers have that objective in mind.

The importance of this is best demonstrated by taking two of the pens with the lowest winter production and comparing theme with the two pens with the highest winter production, making a total of twenty-four birds in each lot. Lot 1 (low pens) laid 121 eggs at a total feed cost of \$19 or \$1.88 per dozen. The market value was \$6, showing a loss on feed cost of \$13 or over \$54 cents per bird. Lot 2 laid 1131 eggs at a feed cost of \$21.97 or \$3.3 cents per dozen. The market value of these eggs was \$56.08, realizing a labor and investment return over feed cost of \$34.11 or \$1.42 per bird. Lot 2 consumed only \$3.97 worth more feed than Lot 1, but they gave \$50 more returns for feed consumed.

From the preceding figures, one is certainly impressed with the importance of getting the pullets hatched early and having them well-matured by the last of October or first of November for it is during the winter months that one receives the best price for eggs. Moreover, if one can secure a profit over feed cost during the four winter months such as is shown from Lot 2, namely \$1.42 per bird, satisfactory returns from the plant are fairly well assured. But on the other hand if the eggs are costing from \$1.88 to \$2 per dozen to produce during the winter months with a market value of only 65 cents, it will take many dozen during the summer months to overcome this handicap.

In comparing the quantities of the different kinds of feed fed and eaten by each lot it was very interesting to note that there was very little difference, in the quantities consumed of grain, milk, grit or green feed or beef scrap fed in hoppers but Lot 2 (the heavy producers) consumed twice the quantity of dry mash and shell that Lot 1 consumed. Of course Lot 2 would receive considerably more beef scrap than Lot 1 from the dry mash but so far as the hopper feeding was concerned, there was practically no difference.

To keep the winter cost at a minimum, raise bred-to-lay stock, have the pullets hatched as early as possible, have them properly matured by the first of November, then feed them properly during the winter. With grain fed twice daily in litter, dry mash in hoppers, a plentiful supply of grit, oyster shells, green feed and fresh water (with the chill taken off) the pullets will make satisfactory returns.

FOX PACE STAKE GOES TO INDIANA STATE FAIR, 3-8

Indianapolis, Jan. 20—The Fox pacing stake, richest harness racing fixture for 2-year-olds, regardless of gait, in the world, again will be contested at the Indianapolis Grand Circuit meeting, Sept. 3-8. Frank P. Fox, its sponsor, has awarded the event to the Indiana State Fair, which annually conducts the big time racing here.

The stake is expected to be worth \$20,000 this season. Last year when it had its inauguration, Red Plato, holder of the world record of 2:05½ for 2-year-old pacing geldings owned by Hilt & Sprow of Sandusky, O., and driven by the local reinsman, Sep Palin, won in straight heats.

WORTH REMEMBERING.

A few drops of glycerine added to thin cream will cause it to whip more readily

A little grated orange rind added to an apple pie greatly improves the flavor.

Either coffee grounds or tea grounds will clog a sink pipe. Drain both as dry as you can and throw into the garbage can.

Oxalic acid is good to apply for removing paint from window glass.

To clean brass beds, rub first with sweet oil to remove spots then polish with rottenstone on a bit of thin flannel.

When hanging out clothes hang skirts by the band night dresses by the shoulders and stockings by the toes.

The cheapest and best hand lotion is made from 1 ounce of glycerine 3 ounces of rose water and 10 drops of carbolic acid.

Fresh pineapple is excellent for the throat and will clear the voice.

Do not wash cotton voile in hot water; use water with just the chill off and use only white soap.

A little box of clips or paper fasteners such as are used in business offices will save much work and time when there are long seams to stitch on the machine. Instead of basting a seam use several of these clips to hold the edges together and in place.

PRUNE FRAPPE.

Cook half a pound of prunes as usual, cool, drain and remove stones cut in pieces and add to the prune juice the juice of one orange and one half a lemon. Sweeten to taste and freeze to the frappe stage pile in sherbet glasses and top with whipped cream.

PRUNE WHIP.

Soften one tablespoon gelatin in two tablespoonfuls cold water dissolve over boiling water and add a cup of hot prune pulp and one half cup of sugar. Beat while cooling, and when beginning to stiffen, fold in a cup of whipped cream and the well beaten whites of two eggs. Turn into individual molds and chill. Garnish with two halved prunes filled with halved marshmallows. Top each, whip with a whipped cream.

SOFT CHOCOLATE CAKE.

The distinguishing feature of this cake, aside from its delicious flavor is that, due to a cup of mashed potato in the recipe, the cake keeps moist and soft for at least one week—if it lasts that long.

Two cups sugar 2-3 cup butter, 1 cup hot mashed potato, 1-2 cup milk, 2 cups flour, 2 teaspoons baking powder, 4 eggs, 2 squares grated chocolate, 1 cup chopped walnuts, 1 teaspoon vanilla, 1 teaspoon salt 1 teaspoon cinnamon.

Cream butter and sugar together add eggs one at a time and beat thoroughly. Then add the flour mixed and sifted with baking powder and other dry ingredients alternately with the milk. Turn into an oiled pan and bake 45 minutes in a moderate oven.

BUTTERSCOTCH BISCUITS.

Four cups flour, 4 teaspoons baking powder, 1 teaspoon salt, 1-3 cup butter, 1 3-4 cups sweet milk.

Mix dry ingredients cut in the butter and add the milk stirring to soft dough. Turn out on a flour-

Of Interest to the Women

ed board and pat out to one half inch thickness. Spread thickly with this mixture:

1 1-2 cups brown sugar, 2-3 cup butter

Roll up like a jelly roll and bake in a buttered pan for 30 minutes. Have the oven hot—at 400 degrees—for the first 10 minutes then reduce the heat to 350 degrees.

WINTER-FOREST.

Here lies a road no recollection knows,

Wound solidly in cerements of snow Where only scouting feet of foxes go And keen-eyed lynx and leaping deer with does.

This house that trains one crumbling window far

On hemlocks wrestling with the crafty cold,

Remembers merry children, long grown old

And scattered like these wind piled snowdrifts are.

Tonight, while marching regiments of frost

Advance upon the clearing—millions strong—

An ancient hemlock lifts his voice in song,

Mourning for mighty brothers he has lost,

And all the trees mourn with him—all night long.

—J. CORSON MILLER in New York Sun.

FOR SALE — Several Barred Rock Cockerels from stock with egg records from 225 to 275. Price \$5 each. J. H. Ferguson, Brunswick Street.

THE BEE'S PART IN PRODUCTION OF OTHER CROPS

(Experimental Farms Note.)

How many of us, when eating a rosy-cheeked apple or juicy plum, ever think of the forces that combined to produce such luscious fruit. We see the growing plants, admire their loveliness when in bloom, and rejoice when they are laden with fruit, but the factors which aided in bringing about the final achievement escape us. One important factor in the production of fruit or seed is that of cross-fertilization. Experiments have shown that most of the fruit, some vegetable, and seed producing plants are partially or wholly self-sterile and, therefore, unable to produce fruit of themselves. It is also an accepted fact that those fruit or seed producing plants, which are self-sterile, will yield much more heavily because of cross-fertilization. To bring about cross-fertilization the pollen or male element of one plant or flower must be conveyed to the pistil or female element of another plant or flower and the chief agents in such distribution are wind and insects. It has been shown that wind plays little or no part in the cross-pollination of the above-mentioned plants but that insects are of utmost importance. Of the many flower loving insects the industrious and methodical honeybee is the most efficient pollen carrier; and in regions or seasons where wild bees are scarce or when frequently unfavorable weather during the blossoming period demands that pollination be accomplished quickly, a few hives of bees in or near the orchard or field are a necessity. Fruit and seed growers are aware of this fact and if they do not keep bees themselves are glad to have specialist beekeepers place their apiaries so that the bees may visit their trees or plants when in bloom. It has been estimated that bees are of equal value as agents in cross-pollination as they are as honey producers.
